Extraterrestrial Friends And Foes:

Extra-Terrestrial Friends and Foes George C. Andrews,1993 Extraterrestrial Altruism Douglas A.

Vakoch,2013-09-14 Extraterrestrial Altruism examines a basic assumption of the Search for Extraterrestrial Intelligence SETI that extraterrestrials will be transmitting messages to us for our benefit This question of whether extraterrestrials will be altruistic has become increasingly important in recent years as SETI scientists have begun contemplating transmissions from Earth to make contact Technological civilizations that transmit signals for the benefit of others but with no immediate gain for themselves certainly seem to be altruistic But does this make biological sense Should we expect altruism to evolve throughout the cosmos or is this only wishful thinking Is it dangerous to send messages to other worlds as Stephen Hawking has suggested or might humankind benefit from an exchange with intelligence elsewhere in the galaxy Would extraterrestrial societies be based on different ethical principles or would we see commonalities with Earthly notions of morality

Extraterrestrial Altruism explores these and related questions about the motivations of civilizations beyond Earth providing new insights that are critical for SETI Chapters are authored by leading scholars from diverse disciplines anthropology astronomy biology chemistry computer science cosmology engineering history of science law philosophy psychology public policy and sociology The book is carefully edited by Douglas Vakoch Director of Interstellar Message Composition at the SETI Institute and professor of clinical psychology at the California Institute of Integral Studies The Foreword is by Frank Drake This interdisciplinary book will benefit everybody trying to understand whether evolution and ethics are unique to Earth or whether they are built into the fabric of the universe Alien Intrusion Gary Bates,2004 Most people at one time or another

have probably been curious to know What could account for all of those strange objects in the sky that many credible witnesses see Or what about the modern mystery of alien abductions and stories of visitations by beings claiming to be from other planets or star systems Are aliens really making contact with human beings Is it important anyway At last an easy to understand book traces the history of this strange phenomenon utilizing the research of many of the heavyweights of UFOlogy and it s been making sense to a lot of people This is a book for everyone The author s research and conclusions will surprise you and challenge your thinking not just about UFOs but about the nature of life itself This is a landmark volume that brings together the most important evidences coming to conclusions far more sinister yet profound than most could imagine Publisher Nothing in This Book Is True, But It's Exactly How Things Are, 25th Anniversary Edition Bob

Aliens and Us Are We Prepared Yet? Vikas Gupta,2010-04-23 The subject of aliens is not a new one and has been around for a really long time now We talk about it all the time News and articles about the possibility of alien visits or attacks are everywhere Perhaps this has become so common that people have started to shrug it off thinking this is just one of those science fiction topics that media loves to sensationalize If all of a sudden we have an alien encounter one day are we psychologically prepared for this Like many of you even I think we are not In fact we might be in a state of shock as they might turn out to be completely different from any of our imaginations about them But if we are prepared for anything then such an alien encounter might not be shocking The objective of this book is to prepare its readers psychologically to deal with the subject of aliens and the first alien encounter In other words aiming to prepare humanity with the cope of a possible shock upon an impending alien encounter There are a lot of mysteries in this world that might have some paranormal behavior associated to them but they are kind of scattered and appear here and there In other words although these mysteries have been documented well enough by a lot of people from time to time but they do not appear related This book attempts to bring together these mysteries and relate them with one possible explanation that is common the alien

About the Book I plotted our sun's course through space to discover that our sun was born in the constellation Orion. After the planets were formed Earth was covered with a five mile thick coating of ice one billion years with an atmospheric pressure of over 750 pounds per square inch. Sunlight could not penetrate such an atmosphere extending 2,500 miles above the planet. We eventually drifted near the Sirius multiple star system. Little Sirius B 1.5 solar masses grabbed hold of our sun putting it in orbit around Sirius A. Earth has lost 98% of its atmosphere AKA radiation shield. Our sun does not have enough power to keep us out of the ice ages. The additional light and heat from Sirius star system that melted the ice caps and got life started in the oceans. Over time the 750 PSI carbon dioxide atmosphere was laid down as coal oil and limestone using photosynthesis and light from Sirius A and B. Dinosaurs couldn't live in today's atmosphere because their lungs were too small. 65 million years ago the atmosphere was 30 to 60 PSI. Earth has lost 98% of its atmosphere. It is now 14.5 pounds per square inch. We have a limited time to get our act together and get off the planet to seed life in other biospheres.

While looking at conspiracy theories that range from the moon landing and JFK's assassination to the Oklahoma City bombing and Freemasonry this reconstruction reveals newly discovered connections between wide swaths of events. Linking Dracula to George W. Bush, UFOs to strawberry ice cream and Jesus Christ to robots from outer space this is truly an all original discussion of popular conspiracy theories.
