Hurricane Information and Atlantic Tracking Chart, 1971 **Large-Scale Evacuation** Michael K. Lindell, Pamela Murray-Tuite, Brian Wolshon, Earl J. Baker, 2018-12-07. Large Scale Evacuation introduces the reader to the steps involved in evacuation modelling for towns and cities from understanding the hazards that can require large scale evacuations through understanding how local officials decide to issue evacuation advisories and households decide whether to comply to transportation simulation and traffic management strategies. The author team has been recognized internationally for their research and consulting experience in the field of evacuations. Collectively they have 125 years of experience in evacuation including more than 140 projects for federal and state agencies. The text explains how to model evacuations that use the road transportation network by combining perspectives from social scientists and transportation engineers fields that have commonly approached evacuation modelling from distinctly different perspectives. In doing so it offers a step by step guide through the key questions needed to model an evacuation and its impacts to the evacuation route system as well as evacuation management strategies for influencing demand and expanding capacity. The authors also demonstrate how to simulate the resulting traffic and evacuation management strategies that can be used to facilitate evacuee movement and reduce unnecessary demand. Case studies which identify key points to analyze in an evacuation plan, discuss evacuation termination and re entry and highlight challenges that someone developing an evacuation plan or model should expect are also included. This textbook will be of interest to researchers, practitioners and advanced students.
