[Practical Panarchy for Adaptive Water Governance](#) Barbara Cosens, Lance Gunderson, 2018-04-18 This book presents the results of an interdisciplinary project that examined how law policy and ecological dynamics influence the governance of regional scale water based social ecological systems in the United States and Australia The volume explores the obstacles and opportunities for governance that is capable of management adaptation and transformation in these regional social ecological systems as they respond to accelerating environmental change With the onset of the Anthropocene global and regional changes in biophysical inputs to these systems will challenge their capacity to respond while maintaining functions of water supply flood control hydropower production water quality and biodiversity Governance lies at the heart of the capacity of these systems to meet these challenges Assessment of water basins in the United States and Australia indicates that state centric governance of these complex and dynamic social environmental systems is evolving to a more complex diverse and complex array public and private arrangements In this process three challenges emerge for water governance to become adaptive to environmental change First is the need for legal reform to remove barriers to adaptive governance by authorizing government agencies to prepare for windows of opportunity through adaptive planning and to institutionalize the results of innovative solutions that arise once a window opens Second is the need for legal reform to give government agencies the authority to facilitate and participate in adaptive management and governance This must be accompanied by parallel legal reform to assure that engagement of private and economic actors and the increase in governmental flexibility does not destabilize basin economies

or come at the expense of legitimacy accountability equity and justice Third development of means to continually assess thresholds and resilience of social ecological systems and the adaptive capacity of their current governance to structure actions at multiple scales The massive investment in water infrastructure on the river basins studied has improved the agricultural urban and economic sectors largely at the cost of other social and environmental values Today the infrastructure is aging and in need of substantial investment for those benefits to continue and adapt to ongoing environmental changes The renewal of institutions and heavily engineered water systems also presents the opportunity to modernize these systems to address inequity and align with the values and objectives of the 21st century Creative approaches are needed to transform and modernize water governance that increases the capacity of these water based social ecological systems to innovate adapt and learn will provide the tools needed to navigate an uncertain future

The Accountability of Armed Groups Under Human Rights Law Katharine Fortin, 2017 Today the majority of the armed conflicts around the world are fought between States and armed groups rather than between States This changed conflict landscape creates an imperative to clarify the obligations of armed groups under international law While it is generally accepted that armed groups are bound by international humanitarian law the question of whether they are also bound by human rights law is controversial This book brings significant new understanding to the question of whether and when armed groups might be bound by human rights law Its conclusions will benefit international law academics legal practitioners and political scientists and anthropologists working on issues related to rebel governance and civil wars This book addresses the debate on this topic by employing a theoretical historical and comparative analysis that spans international humanitarian law international criminal law and international human rights law Embedding these different perspectives in public international law this book brings several key points of clarification to the legal framework Firstly the book draws upon social science literature on armed conflict to present a new viewpoint on the role that human rights law plays vis a vis international humanitarian law in non international armed conflicts Secondly the book sheds light on the circumstances in which armed groups acquire obligations under human rights law It brings illumination to these topics by combining historical and comparative research on belligerency insurgency and international humanitarian law with a theoretical analysis of legal personality under international law In the final part of the book the author tests the four most utilised theories of how armed groups are bound by human rights law examining whether armed groups can be bound by virtue of i treaty law ii control of territory iii international criminal law and iv customary international law In the book's conclusions the author presents final remarks that are designed to provide concrete guidance on how the issue of armed groups and human rights law can be dealt with more thoroughly in practice

A Theory of International Organization Liesbet Hooghe,Tobias Lenz,Gary Marks,2019-08-29 Why do international organizations IOs look so different yet so similar The possibilities are diverse Some international organizations have just a few member states while others span the globe Some are targeted at a specific problem while others have policy portfolios as broad as national states Some are run almost entirely by their member states while others have independent courts secretariats and parliaments Variation among international organizations appears as wide as that among states This book explains the design and development of international organization in the postwar period It theorizes that the basic set up of an IO responds to two forces the functional impetus to tackle problems that spill beyond national borders and a desire for self rule that can dampen cooperation where transnational community is thin The book reveals both the causal power of functionalist pressures and the extent to which nationalism constrains the willingness of member states to engage in incomplete contracting The implications of postfunctionalist theory for an IO s membership policy portfolio contractual specificity and authoritative competences are tested using annual data for 76 IOs for 1950 2010 Transformations in Governance is a major academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work

but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford

Official Governance and Self-governance Qingzhi Zhou, 2022-11-29 This book offers a new interpretation of the evolution and modernization of social order in China's grass roots communities Traditionally social order at the grass roots level was maintained through an organic combination of self rule by the people and authority rule by political leaders As a hybrid form of social order therefore it not only has features of autonomy but also reflects the power of the state apparatus Despite the modernization of the nation state the old rules sustaining social order at the grass roots level are still very much in effect and have seamlessly integrated into the new social structure Unless we fully appreciate this fundamental continuity we would not be able to understand how social order at the grass roots level today is upheld and functions And the modernization of social order at the grass roots level is most fruitfully studied from the perspectives of the construction of modern public social relations and the development of grass roots systems of social autonomy **State, Foreign**
