Public Policy and Higher Education: Strategies for Framing a Research Agenda Nicholas W Hillman, David A Tandberg, Brian A Sponsler, 2015-02-20 Conducting policy relevant research remains elusive yet important since evidence based policymaking results in better public policy decisions But how can this be done What are some promising practices to help make academic scholarship more policy relevant This monograph provides strategies that when addressed should improve the chances of a study becoming relevant to policy audiences It provides practical examples theoretical perspectives discussions of key stakeholders and promising research strategies for framing work in policy relevant ways By being more intentional about the policy relevance of our work and connecting research with emerging policy debates we can increase the likelihood that future policy solutions will be evidence based and informed by the most recent and rigorous research in our field This the 2nd issue of the 41st volume of the Jossey Bass series ASHE Higher Education Report Each monograph is the definitive analysis of a tough higher education issue based on thorough research of pertinent literature and institutional experiences Topics are identified by a national survey Noted practitioners and scholars are then commissioned to write the reports with experts providing critical reviews of each manuscript before publication

Policy Controversies in Higher Education Samuel Kimball Gove, Thomas M. Stauffer, 1986-11-18 As we enter the mid eighties higher education is faced with deepening crises stemming from declines in both funding and enrollment and from rapidly changing social needs This volume of essays contributed by distinguished scholars from various disciplines identifies and discusses the many problems that will require attention in the coming decades if our colleges and universities are to continue to supply quality educational opportunities on a broad scale In seeking solutions to these problems the authors stress the need for a realistic appraisal of the policymaking system It is emphasized that educators and policymakers will need to take into account the levels at which political and policy making activity occur and the complex political interrelationships existing among the different levels of institutional governmental and public authority

Financing Public Universities Marcel Herbst, 2007-05-16 Financing Public Universities addresses newer practices of resource allocation which tie funding to indicators of performance The gist of these efforts is to raise the quality of institutional systems Performance based budgeting and funding of public universities is part of broader efforts to reform public management and it is being promoted and implemented by various government agencies around the globe In

particular European universities with their normally strong governmental ties or higher education systems molded on European universities are prime targets of such reforms Performance funding has made its inroads in attempts to grant university systems managerial autonomy autonomy was to be granted in exchange for funding modes which are tied to the measurement of performance indicators Unfortunately performance based budgeting or funding measures cannot meet the various expectations they do not raise the quality of teaching or learning they do not raise research performance they take back a great deal of managerial autonomy which is commonly judged to be essential for the well being of higher education institutions in particular research universities and they act as automata in place of proper governance and management Financing Public Universities addresses policy makers higher education administrators scholars and students of higher education management After an introduction to the theme and to the book Chapter 1 Financing Public Universities covers the evolvement of mass higher education and the associated curtailment of funding Chapter 2 the public management reform debate Chapter 3 within which performance based budgeting or funding evolved Chapter 4 sketches alternative governance and management modes which can be used instead Chapter 5 and epitomizes inertia or challenges Chapter 6 Four appendices cover more technical matters such as a comparative exposition of the research performance of universities by nation Appendix C and examples of funding systems in the UK and in the USA Appendix D

Parsons, 2005-09-23 Much of the twentieth century saw broad political support for public funding of American higher education Liberals supported public investment because it encouraged social equity conservatives because it promoted economic development Recently however the politics of higher education have become more contentious Conservatives advocate deep cuts in public financing liberals want to expand enrollment and increase diversity Some public universities have embraced privatization while federal aid for students increasingly emphasizes middle class affordability over universal access In Public Funding of Higher Education scholars and practitioners address the complexities of this new climate and its impact on policy and political advocacy at the federal state and institutional levels Rethinking traditional rationales for public financing contributors to this volume offer alternatives for policymakers administrators faculty students and researchers struggling with this difficult practical dynamic Contributors M Christopher Brown II Pennsylvania State University Jason L Butler University of Illinois Choong Geun Ching Indiana University Clifton F Conrad University of Wisconsin Madison Saran Donahoo University of Illinois James Farmer JA SIG uPortal James C Hearn Vanderbilt University Janet M Holdsworth University of Minnesota Don Hossler Indiana University John R Thelin University of Kentucky Mary Louise Trammell University of Arizona David J Weerts University of Wisconsin Madison William Zumeta University of Washington **The Attainment Agenda** Laura W. Perna, Joni E. Finney, Patrick M. Callan, 2014-05 While the federal government seeks to promote educational attainment and equity through its extensive investment in student financial aid states have primary responsibility for policies that affect the educational attainment of their populations Despite the centrality of state policy however we know relatively little about the relationship between state policy and these outcomes This book addresses this knowledge gap Drawing on data collected from descriptive case studies of the relationship between public policy and higher education performance in five states Georgia Illinois Maryland Texas and Washington this book offers a more complete conceptual framework for understanding how state public policy can promote educational attainment The resulting framework has five central tenets that help us understanding how to improve overall educational attainment and increase equity in that attainment At its core the model assumes that higher education performance is determined by effective state policy leadership for higher education The book also illustrates the need for state policies that reduce the cumulative negative implications of policies that perpetuate differences in educational outcomes across groups and that proactively address the barriers that limit educational attainment for underachieving groups This book has important implications for public policymakers college and university leaders educational researchers and others who are interested in understanding how public policy can improve educational attainment and equity in attainment across groups Provided by publisher **Higher Education and State Governments** Edward R. Government Policy and Tuition in Higher Education Angela K. Dills, 2018 Tuition and fees for higher education have increased at a rate much higher than inflation over the past 40 years Although the amount students pay has risen much less than listed tuition net price also continues to increase faster than inflation Taxpayer funded subsidies to higher education have also increased substantially during this period The Bennett hypothesis states that tuition will increase in response to subsidies We review the variety of government programs subsidizing higher education and summarize the existing evidence on the Bennett hypothesis The evidence on the Bennett hypothesis remains mixed providing some evidence that the effectiveness of the subsidies in increasing college enrollment is diminished to the degree that taxpayer moneys are diverted to the institutions of higher education

Lobbying for Higher Education Constance Ewing Cook, 1998 Historically many faculty and administrators in higher education have regarded themselves as above the fray part of the national interest not a special interest and considered lobbying a dirty business unworthy of their lofty enterprise Now that academia no longer enjoys all the respect and good will that federal policy makers once afforded it that attitude has changed The Republican sweep of the 1994 Congressional elections served as a wake up call for the higher education community In response it made a spirited

effort to gain attention for its own policy preferences Lobbying for Higher Education is about how the major higher education associations and the constituent American colleges and universities try to influence federal policy especially congressional policy In clear prose Cook explains how the higher education community organizes itself in Washington how it lobbies and how its major interest groups are perceived both by their own members and by public officials The book focuses on the crucial development in 1995 1996 of a new lobbying paradigm which included the greater use of campus based resources and ad hoc coalitions The most engrossing part of its story is higher education s creative response to the policy turmoil and disruption of the status quo that resulted from the shift in congressional party control The author Constance Cook uses sources unique to this project over 1 500 survey responses from college and university presidents a 62% return rate and nearly 150 interviews with institutional and association leaders Fortunately the 1994 electoral upheaval provided her with an opportunity to capture analyze and interpret the responses of her subjects in a period of unusually sweeping change Lobbying for Higher Education is a timely book with an interesting and important story at its core *Public Policy and Higher Education* Cheryl Lovell, Toni E. Larson, Diane R. Dean, David Longanecker, 2010 What is the relationship between the campus and the Capitol and how can the two work together for the benefit of all State and federal policymakers staff members faculty and campus administrators alike ask these important questions on a daily basis Each of the many stakeholders affected by postsecondary public policy has a unique story to tell one that adds to the rich and complex understandings of how public policy is made This reader provides one of the few comprehensive works on public policy and higher education Since the first edition was published the scholarship and resulting literature base has grown substantially and this second edition represents the benefits of the greatly expanded literature base **The Uneasy Public Policy Triangle in Higher Education** David H. Finifter, Roger G. Baldwin, John R. Thelin, 1991 This book presents essays inspired by an October 1988 conference on recent changes in the relationship between public policy and higher education The essays appear in five sections the first of which titled Looking Backward The Historical Context of Public Policy and Higher Education serves as a retrospective and prospective examination of the relationship between public policy and the higher education sector The section contains three papers by Francis Keppel David Breneman and Maxine Greene respectively Section ii The Tenuous Connection Public Policy and Higher Education Quality addresses recent increases in federal and state funding of higher education and the attendant quality and accountability issues Contributors to this section are Gordon Davies Amy Gutmann and Denis Doyle Section iii The Goal of Diversity in Higher Education explores the link between education and opportunity with contributions from Robert Zemsky Reginald Wilson Alan Ginsburg and Maureen McLaughlin Section iv called Budgetary Efficiency The Federal and State Commitment in the Face of Severe Federal Budget Deficits examines trends and conflicts related to recent cutbacks and looks at strategies for improving efficiency Authors of the three papers in this section are Arthur Hauptman Terry Hartle and Walter McMahon Section v Conclusion Coping With the uneasy

Triangle The Tradeoff Continues contains two final papers by Lawrence Gladieux and William Byron respectively The text includes tables and charts References follow some papers and an index is provided Jb
