 Lourie Harrison, 2013-03-05 As architects and designers we struggle to reconcile ever increasing environmental

Architecture and Urbanism in Modern Korea Inha Jung, 2013-07-31 Although modernization in Korea started more than a century later than in the West it has worked as a prominent ideology throughout the past century in particular it has brought radical changes in Korean architecture and cities Traditional structures and ways of life have been thoroughly uprooted in modernity s continuous negation of the past This book presents a comprehensive overview of architectural development and urbanization in Korea within the broad framework of modernization Twentieth century Korean architecture and cities form three distinctive periods The first defined as colonial modern occurred between the early twentieth century and 1945 when Western civilization was transplanted to Korea via Japan and a modern way of life albeit distorted began taking shape The second is the so called developmental dictatorship period Between 1961 and 1988 the explosive growth of urban populations resulted in large scale construction booms and architects delved into modern identity through the locality of traditional architecture The last period began in the mid 1990s and may be defined as one of modernization settlement and a transition to globalization With city populations leveling out urbanization and architecture came to be viewed from new perspectives Inha Jung however contends that what is more significant is the identification of elements that have remained unchanged Jung identifies continuities that have been formed by long standing relationships between humans and their built environment and despite rapid modernization are still deeply rooted in the Korean way of life For this reason in the twentieth century regionalism exerted a great influence on Korean architects Various architectural and urban principles that Koreans
