Dongqi Li, 2023-05-16 The grammatical category of sentence mood has been of central interest to many branches of linguistics including linguistic typology and systemic functional linguistics This book is a successful integration of the typological and systemic functional approaches to mood aiming to investigate the commonalities and variations across languages in both mood system and mood structure To this aim it establishes a geographically genetically and typologically representative sample of 60 languages and provides detailed systemic functional descriptions of the mood system and mood structure of these languages Based on such descriptions it makes cross linguistic comparisons of the mood system and mood structure of the languages in the sample Structurally it explores the cross linguistic commonalities and variations in i the realizations of some major functional elements in mood structure ii the realizations of mood options and iii the realizations of mood system Systemically it investigates how languages resemble and vary from each other in i the subtypes of major mood types ii the organization of mood system and iii the semantic dimensions along which mood system is elaborated further in delicacy Moreover building on the descriptions and comparisons it makes some generalizations about the structural and systemic features of mood and proposes some tentative explanations for the commonalities and variations languages display in mood system and mood structure This book is an empirical and holistic approach to the typology of mood and contributes to a deeper understanding of the grammatical category It is of special interest to systemic functional linguists typologists grammarians and descriptive linguists **Morphosyntax** William Croft, 2022-08-04 Taking a functional approach this book provides a thorough overview of Morphosyntax and sets out a framework for syntactic constructions

The Oxford Handbook of Ergativity Jessica Coon, Diane Massam, Lisa deMena Travis, 2017-07-13 This volume offers theoretical and descriptive perspectives on the issues pertaining to ergativity a grammatical patterning whereby direct objects are in some way treated like intransitive subjects to the exclusion of transitive subjects This pattern differs markedly from nominative accusative marking whereby transitive and intransitive subjects are treated as one grammatical class to the exclusion of direct objects While ergativity is sometimes referred to as a typological characteristic of languages research on the phenomenon has shown that languages do not fall clearly into one category or the other and that ergative characteristics are not consistent across languages Chapters in this volume look at approaches to ergativity within generative typological and

functional paradigms as well as approaches to the core morphosyntactic building blocks of an ergative construction related constructions such as the anti passive related properties such as split ergativity and word order and extensions and permutations of ergativity including nominalizations and voice systems The volume also includes results from experimental investigations of ergativity a relatively new area of research A wide variety of languages are represented both in the theoretical chapters and in the 16 case studies that are more descriptive in nature attesting to both the pervasiveness and diversity of ergative patterns

Evidentiality Aleksandra IľUľr'evna Aikhenval'd,2004-11-04 In some languages every statement must contain a specification of the type of evidence on which it is based for example whether the speaker saw it or heard it or inferred it from indirect evidence or learnt it from someone else This grammatical reference to information source is called evidentiality and is one of the least described grammatical categories Evidentiality systems differ in how complex they are some distinguish just two terms eyewitness and noneyewitness or reported and everything else while others have six or even more terms Evidentiality is a category in its own right and not a subcategory of epistemic or some other modality nor of tense aspect Every language has some way of referring to the source of information but not every language has grammatical evidentiality In English expressions such as I guess they say I hear that the alleged are not obligatory and do not constitute a grammatical system Similar expressions in other languages may provide historical sources for evidentials True evidentials by contrast form a grammatical system In the North Arawak language Tariana an expression such as the dog bit the man must be augmented by a grammatical suffix indicating whether the event was seen or heard or assumed or reported This book provides the first exhaustive cross linguistic typological study of how languages deal with the marking of information source Examples are drawn from over 500 languages from all over the world several of them based on the author s original fieldwork Professor Aikhenvald also considers the role evidentiality plays in human cognition and the ways in which evidentiality influences human perception of the world This is an important book on an intriguing subject It will interest anthropologists cognitive psychologists and philosophers as well as linguists **Language Typology and Syntactic**
