transitivity This book discusses how to present events and situations with respect to their participants and the grammatical consequences of such decisions Organized into 21 chapters this volume begins with an overview of the grammar and pragmatics of actions and their participants This text then examines one aspect of the syntactic resolution of clause internal coreference Other chapters consider that clauses with more highly transitive components are more likely to be coded as transitive than those with fewer transitive components This book discusses as well the assumption that French causative sentences may receive either an active or a passive interpretation The final chapter deals with two types of two argument sentences in Japanese This book is a valuable resource for linguists and scholars pursuing questions of discourse language topology universal grammar semantics and grammatical description and theory *The Making and Breaking of Classification Models in Linguistics* Jane Klavan, 2024-06-04 The book provides a methodological blueprint for the study of constructional alternations using corpus linguistic methods in combination with different types of experimental data The book looks at a case study from Estonian This morphologically rich language is typologically different from Indo European languages such as English Corpus based studies allow us to detect patterns in the data and determine what is typical in the language Experiments are needed to determine the upper and lower limits of human classification behaviour They give us an idea of what is possible in a language and show how human classification behaviour is susceptible to more variation than corpus based models lead us to believe Corpora and forced choice data tell us that when we produce language we prefer one construction Acceptability judgement data tell us that when we comprehend language we judge both constructions as acceptable The book makes a theoretical contribution to the what why and how of constructional alternations **The Educational Weekly**, 1879 **Assessment for Experiential Learning** Cecilia Ka Yuk Chan, 2022-09-29 Chan's book explores the challenges in assessing experiential learning deepens our understanding and inspires readers to think critically about the purpose of assessment in experiential learning Experiential learning has been studied and proven to be effective for student learning particularly for the development of holistic competencies i.e. 21st century skills soft skills transferable skills considered essential for individuals to succeed in the increasingly global and technology infused 21st century society Universities around the world are now actively organising experiential learning activities or programmes for students to gain enriching and diversified learning experiences however the assessment of these programmes tends to be limited unclear and contested Assessment plays a central role in education policies and students approach to learning But do educators know how to assess less traditional learning such as service learning entrepreneurship cross discipline or cross cultural projects internships and student exchanges While the current assessment landscape is replete with assessments that measure knowledge of core content areas such as mathematics law languages science and social studies there is a lack of assessments and research that focus on holistic competencies How do we assess students ability to think critically problem solve adapt self manage and collaborate Central to the discussion in this book is the reason students are assessed and how they should

be assessed to bring out their best learning outcomes Offering a collection of best assessment practice employed by teachers around the world this volume brings together both theoretical and empirical research that underpins assessment and perceptions of different stakeholders understanding of assessment in experiential learning from students teachers and policymakers The idea of assessment literacy also plays an important role in experiential learning for example reflection is often used in assessing students in experiential learning but how reflection literate are educators are they aware of the ethical dilemmas that arise in assessing students These questions are discussed in detail The volume also introduces a quality assurance programme to recognise student development within experiential learning programmes The book will be particularly informative to academic developers teachers students and community partners who struggle with the development and assessment for experiential learning those who plan to apply for funding in experiential learning and policymakers and senior managements seeking evidence and advice on fine tuning curricular assessment designs and quality assurance The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
