## **Health Policy An Introduction To Process And Power:**

**Health Policy** Gill Walt, 1994-08 Making policy in WHO      **Health Policy** Gillian Walt, 2004      **Protecting the World's Children** Sidsel Roalkvam, Desmond McNeill, Stuart Blume, 2013-05-09 Vaccination programmes now represent a major part of the effort devoted to improving the health of children in developing countries These donor funded programmes tend to be global in scope and focus on worldwide goals and targets such as polio eradication and the Millennium Development Goals Health policy makers at the national level are expected to implement these programmes in a standard manner and report progress according to a few standard indicators Pressures and incentives to achieve the targets set are then transmitted down to the community level health worker who actually meets the parents and children to implement the programmes Drawing on first hand original research in India and Malawi carried out by the contributors as well as existing literature Protecting the World's Children Immunisation policies and practices suggests that there is little or no scope allowed for the effects of variance in the way health systems work the difficulties and tensions faced by health workers or differences in the way people think about childhood illnesses that reflect cultural differences The book argues that the need to show progress can create distortions and lead to the production of misleading data and an unwillingness to report problems It proposes that vaccines could more effectively serve children's health needs if immunisation programmes are better understood and acknowledged and if local knowledge and realities were enabled to inform national and international health policy Written by an international interdisciplinary team of experts in immunisation policy Protecting the World's Children is an integrative study of immunisation policy and practice at a global national and community level and is an essential resource for researchers and practitioners in international and public health as well as professionals in international and development studies      Aid Power and Politics Iliana Olivié, Aitor Pérez, 2019-07-25 Aid Power and Politics delves into the political roots of aid policy demonstrating how and why governments across the world use aid for global influence and exploring the role it plays in present day global governance and international relations In reconsidering aid as part of international relations the book argues that the interplay between domestic and international development policy works in both directions with individual countries having the capacity to shape global issues whilst at the same time global agreements and trends in turn shape the political behaviour of individual countries Starting with the background of aid policy and international relations the book goes on to explore the behaviour of both traditional and emerging donors the US the UK the Nordic countries Japan Spain Hungary Brazil and the European Union and then finally looks at some big international agendas which have influenced donors from the liberal consensus on democracy and good governance to gender equality and global health Aid Power and Politics will be an important read for international development students researchers practitioners and policy makers and for anyone who has ever wondered why it is that countries spend so much money on the well being of non citizens outside their borders      *International Encyclopedia of Public Health* William C
