Council for International Organizations of Medical Sciences,1989      *A Legal Framework for Bioethics* Cosimo Marco  
Mazzoni,2023-09-20 A comparative analysis of the legislation in the field of bioethics in several Western countries especially  
in European Union member states shows that there is a profound difference both in legislative policies and in the ethical  
principles enshrined by the laws Over the past few years bioethics as a discipline has attempted to elaborate individual and  
collective behavioural codes in several fields but it has come up against enormous difficulties it has not even been possible to  
reach a consensus between different countries on the general principles An example of this is the recent Convention on  
Bioethics endorsed by the Council of Europe The aim of the essays contained in this book is to highlight the differences  
between existing regulations in several countries and to stress how necessary it is to elaborate a legal framework that could  
be shared by the widest range of national legislations For there is no denying that technological advances in the fields of both  
biology and medicine as well as progress in surgical treatments mean that jurists the world over are faced with a common  
scientific reality The task of the jurist must therefore be to engage in a comparative analysis so as to overcome the  
differences in national legislations      **Health Policy, Ethics, and Human Values** Munazzamah al-Islāmīyah lil-'Ulūm

Responsibility Rolf Dinkel,Bruno Horisberger,Kenneth W. Tolo,2013-03-07 As the focus on pharmaceuticals has broadened  
from concern for their cost and effectiveness to their real and potential risks and benefits a critical question has been raised  
whose responsibility is it to improve drug safety In April 1990 this question became the theme for a conference at Wolfsberg  
Switzerland near the shores of Lake Constance Called an international dialogue conference by its organizers the meeting  
brought together leaders from the pharmaceutical industry regulatory authorities academia medicine consumer  
organizations and the media Opening addresses were given by representatives of the Council for International Organizations  
of Medical Sciences CIOMS the International Federation of Pharmaceutical Manufacturers Associations IFPMA the Swiss  
International Pharmaceutical Agency and the RAD AR Consortium This book documents the papers presented and  
discussions held at this conference which took the topic of risks and benefits of drug therapy one step further to  
responsibility It includes a rich menu of issues for those who care about the evaluation of drug therapy the ethics behind it

the expectations of the patient and the role of traditional and nontraditional drug safety communications The ideas expressed here come from different parts of the world but relate to common drug safety problems observations and scientific assessments they provide insights into innovative approaches cautious changes and desired actions The papers in this volume are broadly divided into conceptual perspectives ethics how the knowledge about drug risks and benefits is generated and appraised the expectations in drug safety and operational perspectives communication discussion and action
