Centers for Disease Control and Prevention (U.S.), National Center for Chronic Disease Prevention and Health Promotion
(U.S.). Division of Adolescent and School Health, Partnership for Prevention (Organization), 2008 In an age of rising rates of
chronic diseases and conditions such as diabetes and obesity increasingly scarce resources and growing healthcare costs it is
of paramount importance to incorporate the best available evidence into public health programs and make those evidence
based programs available to a wide range of state and community level leaders The Community Health Promotion Handbook
Action Guides to Improve Community Health can serve as an important tool for translating and disseminating evidence based
recommendations into practice at the state and local levels Evidence based public health practice involves the selection and
implementation of programs policies and services that are designed to enhance health and are supported by evidence and
scientific reasoning In public health many groups conduct rigorous systematic reviews of published research studies that
identify effective interventions These groups which include the Task Force on Community Preventive Services TFCPS then
review this evidence and recommend work that should be done to improve health Although these recommendations advise on
what to do they do not provide the guidance needed to successfully take the interventions from the page to the field
Partnership for Prevention and the Centers for Disease Control and Prevention CDC have worked together to bridge this gap
between research and practice by developing The Community Health Promotion Handbook This handbook translates
evidence based recommendations into the necessary how to guidance for implementation of effective community level health
promotion strategies Five selected recommendations from the TFCPS s The Guide to Community Preventive Services What
Works to Promote Health Community Guide related to diabetes self management physical activity and tobacco use treatment
have been translated into The Community Health Promotion Handbook s five Action Guides p 1 ACSM's Worksite Health
