Market Limits in Health Reform Public Success, Private Failure Daniel Drache, Terry Sullivan, 1999      Health Reform

Daniel Drache, Terry Sullivan, 2005-08-18 Health Reform explores the challenges facing health care provision in the advanced economies The book exposes the limitations of market led health reform and demonstrates the indispensable role of a vibrant public authority in the renewal of modern health care systems Issues covered include cost containment and privatisation strategies in an international perspective the role of business and the private sector in setting the agenda for health care reform the restructuring of Anglo Saxon health systems and the shift in state market boundaries in Canada the USA the UK and Australia the frontier of health care reform in terms of health and social cohesion the role of patient choice in health care reform      *The Cult of Efficiency* Janice Gross Stein, 2002 This thought provoking discourse on the unquestioned pursuit of efficiency reveals how the discussion of efficiency in the delivery of public goods such as education and health care has risen to prominence in postindustrial society Stein s provocative argument reminiscent of the thinking of Lewis Mumford demonstrates that efficiency can too often be a cloak for political agendas and that pressure for efficiency can actually be a detrimental rather than a positive force Citizens in public schools community clinics and hospitals are shown engaging directly with such agendas redrawing the face of the state as they impose new ways of delivering public goods Stein demonstrates how they are calling not only for efficiency but for accountability and choice as they confront the dilemmas of democratic processes in a global age      **Public and Private Social Policy** D. Béland, B. Gran, 2008-11-28 Exploring the increasing involvement of the private sector in social policy this collection examines the complex relationship between the public and private sectors from an international perspective focusing on health and pension policies      Health Care

Systems: Rethinking health care systems Jonathan Watson, Pavel Ovseiko, 2005 This collection covers the organization financing and regulation of health care systems in four clear contexts reforming health care systems understanding health care politics financing and delivering health care rethinking health care systems      **Fads, Fallacies And Foolishness In Medical Care Management And Policy** Theodore R Marmor, 2007-03-28 No one misses the onslaught of claims about reforming modern medical care How doctors should be paid how hospitals should be paid or governed how much patients should pay when sick in co payments how the quality of care could be improved and how governments and other buyers could better control the costs of care all find expression in the explosion of medical care conference proceedings op eds news bulletins journal articles and books This collection of articles takes up a key set of what the author regards as particularly misleading fads and fashions developments that produce a startling degree of foolishness in contemporary discussions of how to organize deliver finance pay for and regulate medical care services in modern industrial democracies The policy fads addressed include the celebration of explicit rationing as a major cost control instrument the belief in a basic package of health insurance benefits to constrain costs the faith that contemporary cross national research can deliver a large number of

transferable models and the notion that broadening the definition of what is meant by health will constitute some sort of useful advance in practice

**Informed Choice of Medical Services: Is the Law Just?** Marj Milburn, 2017-09-29 This title was first published in 2001 This work is a uniquely multi disciplinary contribution to the existing bioethical literature on the topic of informed choice of medical services It is also the first comprehensive bioethical text to confront the central issue of power in the clinical encounter and to argue for statutory protection of the right to informed choice While the majority of bioethicists argue for a conciliatory rather than adversarial approach to the chronic problem of uninformed consent the author of this work argues that the external regulation of medicine is essential if the right to informed choice is to be protected This argument is based upon an extensive review of the bioethical legal political medical sociological and philosophical literature as well as a wide range of empirical and anecdotal evidence evolving from a detailed exploration of power and the limits of rationality in the clinical encounter

**The Market or the Public Domain** Daniel Drache, 2005-07-08 Examining the powerful idea of the return reconstitution and redeployment of the public domain in a post Seattle and post Washington consensus world order this innovative book is the most forward looking and comprehensive examination of the need to

rethink the tenants of global free trade In the past two decades countries have focused on broadening and guaranteeing market access and as the pendulum swings back for the market the issue of investing in the public domain becomes a priority The authors believe that devising new institutions of governance for a globalizing world requires fundamental change nationally and internationally They argue that new public spaces places and services are required to strengthen democracy and create sanctuaries in society where the market mechanism cannot reach The public domain is an incipient concept that enables states to reduce the intrusiveness of markets and at the same time develop a strong national performance to reduce the inequality and social exclusion in an increasingly volatile global economy This original volume boasts an impressive list of international contributors who have demonstrated innovation and leadership in their fields It will strongly appeal to advanced students academics and policy makers involved in the field of global governance and international political economy
