2010 Leading Health Indicators for Healthy People 2010 Committee on Leading Health Indicators for Healthy People 2010, Institute of Medicine, 1999-05-05 Healthy People is the nation's agenda for health promotion and disease prevention. The concept first established in 1979 in a report prepared by the Office of the Surgeon General has since been revised on a regular basis and the fourth iteration known as Healthy People 2010 will take the nation into the 21st century. Leading Health Indicators for Healthy People 2010 Final Report contains a number of recommendations and suggestions for the Department of Health and Human Services that address issues relevant to the composition of leading health indicator sets, data collection, data analysis, effective dissemination strategies, health disparities, and application of the indicators across multiple jurisdictional levels. **Catalog of Publications of the National Center for Health Statistics** National Center for Health Statistics (U.S.), 1997 **Morbidity and Mortality Weekly Report**, 1997 **America's Children** Institute of Medicine and National Research Council, Institute of Medicine, Committee on Children, Health Insurance, and Access to Care, 1998-11-27 America's Children is a comprehensive easy-to-read analysis of the relationship between health insurance and access to care. The book addresses three broad questions: How is children's health care currently financed? Does insurance equal access to care? How should the nation address the health needs of this vulnerable population? America's Children explores the changing role of Medicaid under managed care, state-initiated and private sector children's insurance programs, specific effects of insurance status on the care children receive, and the impact of chronic medical conditions and special health care needs. It also examines the status of safety net health providers including community health centers, children's hospitals, school-based health centers, and others, and reviews the changing patterns of coverage and tax policy options to increase coverage of private sector employer-based health insurance. In response to growing public concerns about uninsured children, last year Congress voted to provide \$24 billion over five years for new state insurance initiatives. This volume will serve as a primer for concerned federal policymakers and regulators, state agency officials, health plan decisionmakers, health care providers, children's health advocates, and researchers. *The Journey of Becoming a Mother Among Women in Northern Thailand* Pranee Liamputtong, 2007-01-01 This book is the first book that deals with motherhood and reproduction in northern Thailand. The book covers a wide range of issues relating to pregnancy, birth, postpartum practice, motherhood, infant feeding, and infant care issues. *Transitioning Care from Pediatric to Adult Pulmonology* Cynthia D. Brown, Erin Crowley, 2021-04-28 This book addresses an unmet need in the care of adolescents and young adults with lung disease. The increasing survival of young adults with childhood-onset pulmonary conditions is a testament to major advances in treatments and health care delivery. With the increase in survival of children with chronic respiratory conditions, there is a need for formalized transition programs to integrate adolescents and young adults into the adult model of care. This book helps fill gaps in knowledge to best achieve that initiative. This book takes a comprehensive approach to transition care in pulmonary medicine by satisfying the following objectives: 1. Understand the barriers and developmental challenges in the

transition from pediatric to adult care for patients with chronic childhood onset pulmonary disease 2 Learn about successful evidence based transition models in pulmonary disease populations focusing on key process and outcome measures for success and 3 Develop knowledge to design implement and measure a transition program based on evidence and expert opinion In the first section the book outlines general principles of transition care that are applicable to all patients regardless of underlying disease process and describe best practices for performing necessary research in transition care In the second section the book explores psychosocial factors known to play a role in affecting transition outcomes including parental support psychological development and socioeconomic factors In the final section transition outcomes and best practices in specific respiratory diseases are outlined With a focus on populations with chronic pulmonary disease this book highlights the challenges and barriers of transition reviews model systems to understand the essential components of a transition program and provides evidence based information to navigate these barriers and achieve successful outcomes during transition to adulthood This is an ideal guide for pediatric and adult pulmonary providers caring for patients who are transition age as well as multidisciplinary care team members who work with these providers in care models on transition projects to improve the transition process **Health Services Reports** ,1996 **Public Health Reports** ,1996
