Operation Neptune David Wragg, 2014-02-01 Long awaited the Normandy landings were the largest amphibious operation in history Success was achieved by the advent of specialised landing craft heavy naval firepower and the creation of two artificial harbours and an underwater pipeline Operation

Neptune The Prelude to D Day tells the story of this incredible feat using eyewitness accounts of the landings and the breaching of Hitler's famed Atlantic Wall David Wragg explores the earlier Allied and Axis experiences with amphibious operations and the planning for Neptune and Overlord He reveals the naval support needed once the armies were ashore and before continental ports could be captured and cleared of mines with operations such as minesweeping off the Normandy coast which led to one of the worst friendly fire incidents of the war This is the must read book to understand what made D Day possible     Suharto R. E. Elson, 2001-11-13 Suharto is synonymous with modern Indonesia He came to the leadership of Indonesia amidst extreme social upheaval and mass violence in 1966 and established an enduring regime known as the New Order He remained in command of the world's fourth most populous country until his dramatic fall from power in 1998 This book provides fascinating insights into a man who rose from humble beginnings to exert extraordinary power over a complex and volatile nation He presented himself as an infallible father of Indonesia yet he remained a mysterious and puzzling figure He sought to transform Indonesia into a strong united and economically prosperous nation but he is remembered today for human rights abuses and profound corruption The system of power he created collapsed with his decline and he left a problematic legacy for Indonesia's current leaders as they seek to create a new beginning for their country

**Methodology for the Human Sciences** Donald E. Polkinghorne, 1984-06-30 Methodology for the Human Sciences addresses the growing need for a comprehensive textbook that surveys the emerging body of literature on human science research and clearly describes procedures and methods for carrying out new research strategies It provides an overview of developing methods describes their commonalities and variations and contains practical information on how to implement strategies in the field In it Donald Polkinghorne calls for a renewal of debate over which methods are appropriate for the study of human beings proposing that the results of the extensive changes in the philosophy of science since 1960 call for a reexamination of the original issues of this debate The book traces the history of the deliberations from Mill and Dilthey to Hempel and logical positivism examines recently developed systems of inquiry and their importance for the human sciences and relates these systems to the practical problems of doing research on topics related to human experience It discusses historical realism systems and structures phenomenology and hermeneutics action theory and the implications recent
