**Reform of Finance** Charles McDaniel, Jr., 2015-07-16 Efforts to resolve the recent financial crisis have obscured a more deeply rooted financialization crisis that impacts not only the market economy but also the vital civic and moral traditions that support it This book reveals the cultural influence of finance in reshaping the foundations of American civil society and proposes a return to certain first principles of the Republic to restore the nation s economic vision This book demonstrates how funding concerns and financial incentives revalue faith traditions educational institutions non profit organizations and even the nation s healthcare system in ways that are eroding the diversity of American culture These changes also undermine the ethical framework of both democratic government and the free market system While financial influence has diminished the value of civil society this book proposes that revitalized intermediary institutions still offer the best path forward in restoring the financial sector and more broadly enriching the American competitive ethic toward development of a more virtuous economy The book is written for an academic and professional audience offering a blueprint for the involvement of civil society with government in providing more communally integrated oversight that could contribute to a genuine democratization of finance

**Gateways to Globalisation** François Gipouloux, 2011-01-01 Gateways to Globalisation makes a significant contribution to the understanding of the emerging East Asian regional system of financial centres within the broader global context and how they interact within the global circuits of finance In particular it focuses on the emergence of the financial centres of Tokyo Shanghai Hong Kong and Singapore and the attempts by both national governments and the private sector to position them so that they become more competitive in the global and regional context The volume shows much historical sensitivity showing that while the increase in the importance of these financial centres is principally post 1945 their emergence has been aided by the deep historical roots that go back several centuries The book will be of great value in the interpretation of the role of East Asia in what many commentators have called the Asian Century Terry McGee The University of British Columbia Canada Gateways to Globalisation cogently demonstrates that Hong Kong Singapore Beijing Shanghai and Tokyo operate as gateways to Asia and as linchpins for Asia to the global economy The authors theoretical frameworks and original empirical research support provocative findings that challenge conventional thinking Tokyo may decline as a global city As Beijing and Shanghai ride China's rapid growth they face uncertainty about its future openness to the global

economy Vibrant Hong Kong and Singapore confront challenges from other rising centers David Meyer Washington University in St Louis US This book distinguishes itself in its emphasis on historical and cultural links as well as contemporary globalization processes on large East Asian cities Arising from a research program and four seminars the editor has picked scholars who can relate past and present trends Historical links of Japanese cities are explored Leading world cities in the region are analysed in their evolution from entrepôts to modern gateways service integrators transport hubs and financial centres It is a study of the integration and interrelationships of East Asian cities in the global economy Yue man Yeung Chinese University of Hong Kong Asia's trading and financial hubs have become global cities which frequently have more in common and closer linkages with each other than with their corresponding hinterlands As this book expounds these global cities illustrate to what extent world trends deeply penetrate and permeate the national territorial interiors and processes that were otherwise presumed to be controlled by the State Gateways to Globalisation is soundly based on accurate and extensive research including perspectives from historians economists geographers and sociologists from China Japan Singapore and Hong Kong in order to grasp the regional character of trade and finance beyond national borders and traditional academic frameworks The book documents that today major urban centres such as Tokyo Beijing Singapore Hong Kong and Shanghai situated on the periphery of the maritime corridor of East Asia form a system characterised by the intensity of their economic linkages and integration into the world economy Since the mid 1980s these major Asian cities have become the worldwide oriented centres for production trade finance and research This collective effort offers in addition to its regional framework up to date information that strengthens an original trans disciplinary analysis of a region and its economic characteristics which will be of interest to readers within academia and beyond This well detailed and thorough work will interest academics and post graduate students in economics geography finance history regional studies and Asian studies as well as those who have a general interest in globalisation
