Health Focus On You Grade One Pupil Edition:

The Therapeutic State James L. Nolan Jr.,1998-01-01 The United States has always been profoundly conflicted about the role and utility of its government Simmering just beneath the surface of heated public discussions over the appropriate scope and size of government are foundational questions about the very purpose of the state and the basis of its authority America's changing and diversifying cultural climate makes common agreement about the government's raison d'être all the more difficult In The Therapeutic State James Nolan shows us how these unresolved dilemmas have coalesced at century's end Today the American state faced with a steady decline in public confidence has embraced a therapeutic code of moral understanding to legitimize its very existence By ranging widely across education criminal justice welfare political rhetoric and civil law Nolan convincingly illustrates how the state increasingly turns to the therapeutic ethos as a justification for its programs and policies a development that will profoundly influence the relationship between government and citizenry In a tone refreshingly free of polemic Nolan charts the dialectic relationship between culture and politics and against the backdrop of striking historical contrasts gives example after example of the emergence of therapeutic sensibilities in the processes of the American state

Jaswal ,Desiree Forsythe,2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion particularly for students with marginalized identities This poses problems particularly when science permeates every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital We must create a STEM environment in which students with marginalized identities feel respected listened to and valued We must assist students in understanding how their positionality privilege and power both historically and currently impacts their meaning making and understanding of STEM
