**Nursing in the European Union** Sondra Z. Koff,2017-07-05 Europeanization has generated a galaxy of regimes laws organizations new actors and networks that have diluted institutional barriers to interaction across national borders Many

nation based policy competencies have been transferred to the European level The European Union EU the world's first regional regulator bears consequences for the development of public policy and for policies affiliated with the nursing profession With limited exception the EU does not have formal powers in the health care arena However as a result of its efforts in other fields it has been heavily involved with health care and its providers Nursing in the European Union demonstrates how the organization has refashioned the nursing world throughout the member states via its power in many other policy domains This volume focuses on the EU's impact on nursing education regulation and research endeavours and suggests strategies to achieve desired objectives Volume 2 Nursing in the European Union The World of Work to be published in Fall 2016 focuses on real life situations and problems EU nurses face wages stress and dispute resolution Sondra Z Koff integrates the European experience with a discussion of nursing in the real world and presents the nursing profession in light of the European Union its components its mechanisms and its output and activities A Responsive Technocracy? Christian Rauh, 2016-10-21 This book challenges the common image of the European Commission as an insulated technocracy immune to political pressures Based on an innovative combination of public opinion protest and media data it first demonstrates that European integration has become increasingly politicised since the 1990s Against this background the Commission is now much more concerned about the public appeal of its policies That however challenges and contradicts the well worn patterns of supranational regulation in Europe Rauh systematically compares 17 legislative drafting processes in consumer policy between 1999 and 2009 Based on first hand insider accounts of involved officials his analysis indicates that the Commission's policy choices indeed become more consumer friendly under higher levels of public awareness While this improves the democratic quality of European decision making the book also reveals an enhanced conflict potential within the Commission and beyond which threatens to undermine the efficiency of legislative decision making in the EU
