Debates on U.S. Health Care Jennie Jacobs Kronenfeld, Wendy E. Parmet, Mark A. Zezza, 2012-09-06 This issues based reference work available in both print and electronic formats shines a spotlight on health care policy and practice in the United States Impassioned debates about the best solutions to health care in America have perennially erupted among politicians scholars of public policy medical professionals and the general public The fight over the Health

Care Reform Act of 2010 brought to light a multitude of fears challenges obstacles and passions that often had the effect of complicating rather than clarifying the debate The discourse has never been more heated The complex issues that animate the health care debate have forced the American public to grapple with the exigencies of the present system with regard to economic fiscal and monetary policy especially as they relate to philosophical often ideologically driven approaches to the problem Americans have also had to examine their ideas about the relationship of the individual to and interaction with the state and the varied social and cultural beliefs about what an American solution to the problem of health care looks like In light of the need to keep students researchers and other interested readers informed and up to date on the issues surrounding health care in the U S this volume uses introductory essays followed by point counterpoint articles to explore prominent and perennially important debates providing readers with views on multiple sides of this complex issue Features Benefits The volume is divided into three sections each with its own Section Editor Quality of Care Debates Dr Jennie Kronenfeld Economic Fiscal Debates Dr Mark Zezza and Political Philosophical Legal Debates Prof Wendy Parmet Sections open with a Preface by the Section Editor to introduce the broad theme at hand and provide historical underpinnings Each Section holds 12 chapters addressing varied aspects of the broad theme of the section Chapters open with an objective lead in piece or headnote followed by a point article and a counterpoint article All pieces headnote point article counterpoint article are signed For each chapter students are referred to further readings data sources and other resources as a jumping off spot for further research and more in depth exploration Finally the volume concludes with a comprehensive index and the electronic version of the book includes search and browse features as well as the ability to link to further readings cited within chapters should they be available to the library in electronic format Self-determination in Health Care Leroy C. Edozien,2016-03-03 It is generally accepted in legal and bioethical discourse that the patient has a right to self determination In practice though this is often not the case Paternalism is waning and it is increasingly recognised that there are values other than medical factors which determine the choices that patients make Unfortunately these developments have not resulted in huge advances for patient self determination which is largely because the consent model has fundamental flaws that constrain its effectiveness This book sets out to offer an alternative model to consent In the property model proposed here the patient s bodily integrity is protected from unauthorised invasion and their legitimate expectation to be provided with the relevant information to make an informed decision is taken to be a proprietary right It is argued that the property model potentially overcomes the limitations of the consent model including the obstacle caused by the requirement to prove causation in consent cases The author proposes that this model could in the future provide an alternative or complementary approach for the courts to consider when dealing with cases relating to self determination in health care **Information Sources in Engineering** Roderick A. Macleod,Jim Corlett,2012-04-17 The current thoroughly revised and updated edition of this approved title evaluates information sources in the field of technology It provides the reader not only with information of
