person they have ever met Raising a child who can hear is a challenging and difficult task but raising a deaf child can seem like an overwhelming responsibility especially with the mass of conflicting information and advice offered by professionals and well meaning friends and family members In *Raising and Educating a Deaf Child* Marc Marschark offers parents and teachers a readable and comprehensive summary including everything a parent would want to know about growing up deaf Parents of a deaf child like the parents of any child want to know the answers to some apparently straightforward questions such as What kind of school will provide my child with the best education What language experience is best for my child sign or speech Will my child be able to get a good job Marschark addresses these questions and more with topics ranging from what it means to be deaf and the uniqueness of Deaf culture to the medical causes of early hearing loss from technological aids for the deaf such as TTYs and cochlear implants to the educational and social opportunities available to deaf children He describes the many ways that the environment of home and school can influence a deaf child s chances for success in both academic and social circles Above all he emphasizes the need for early detection of hearing loss and the importance of being able to communicate with deaf children from a very early age recommending that all parents of deaf children learn sign language and use it often This is not a how to book or one with all the right answers for raising a deaf child This is a guide through the many conflicting suggestions and programs for raising deaf children as well as the likely implications of taking one direction or the other A leading researcher himself Marschark makes sense of the most current educational and scientific literature including his own recent research and talks to deaf children their parents and deaf adults about what is important to them The result is a readable and enlightening survey of what we know about the language social and intellectual development of deaf children and what educational and practical issues face them and their families Parents of deaf children can and should make their own decisions based on what is right for their family and for their child Armed with *Raising and Educating a Deaf Child* parents will have access to the best information available allowing them to make informed decisions for their child

How Deaf Children Learn Marc Marschark, Peter C. Hauser, 2011-11-22 How can parents and teachers most effectively support the language development and academic success of deaf and hard of hearing children Will using sign language interfere with learning spoken language Should deaf children be placed in classrooms with hearing children Are traditional methods of teaching subjects such as reading and math to hearing children appropriate for deaf learners As many parents and teachers will attest questions like these have no easy answers and it can be difficult for caring adults to separate science from politics and fact from opinion in order to make informed decisions about how to help deaf children learn In this invaluable guide renowned authorities Marc Marschark and Peter Hauser highlight important new advances in scientific and educational research that can help parents and teachers of students with significant hearing loss The authors stress that deaf children have strengths and needs that are sometimes very different from those who can hear Consequently if deaf students are to have full academic access and optimal educational outcomes it is essential that parents and teachers learn to

recognize these differences and adjust their teaching methods to them Marschark and Hauser explain how the fruits of research conducted over the last several years can markedly improve educational practices at home and in the classroom and they offer innovative strategies that parents and teachers can use to promote learning in their children The result is a lively accessible volume that sheds light on what it means to be a deaf learner and that provides a wealth of advice on how we can best support their language development social skills and academic success *Parents and Their Deaf Children* Kathryn P. Meadow-Orlans, Marilyn Sass-Lehrer, Donna M. Mertens, 2003 Three scholars from Gallaudet U in Washington D C discuss the results of their research into the experiences of young deaf and hard of hearing children and their parents Based upon a nationwide survey of parents with six to seven year old children as well as 80 in depth interviews the text des

Foundations of Pediatric Audiology Fred H. Bess, Judith S. Gravel, 2006 This book is a compilation of readings representing the basis for the practice of pediatric audiology It contains 47 selected articles each considered critical to understanding the fundamental principles in the field Divided into five sections the book covers the development of audition in infants background information for current practice test techniques and technology and hearing loss in special populations The readings in the book provide a foundation of knowledge for anyone in the field of pediatric audiology *Hearings* United States. Congress Senate, 1941 The Child, 1937 **Psychological Development of Deaf Children** Marc Marschark, 1993 This book is the first comprehensive examination of the psychological development of deaf children Because the majority of young deaf children especially those with non signing parents are reared in language impoverished environments their social and cognitive development may differ markedly from hearing children The author here details those potential differences giving special attention to how the psychological development of deaf children is affected by their interpersonal communication with parents peers and teachers This careful and balanced consideration of existing evidence and research provides a new psychological perspective on deaf children and deafness while debunking a number of popular notions about the hearing impaired In light of recent findings concerning manual communication parent child interactions and intellectual and academic assessments of hearing impaired children the author has forged an integrated understanding of social language and cognitive development as they are affected by childhood deafness Empirical evaluations of deaf children s intellectual and academic abilities are stressed throughout The Psychological Development of Deaf Children will be of great interest to students teachers and researchers studying deafness and how it relates to speech and hearing developmental social and cognitive psychology social work and medicine **The Hard of Hearing Child** American Hearing Society, 1927 **Auditory Disorders in School Children** Ross J. Roeser, Marion P. Downs, 1995 **The Deaf Way** Carol Erting, 1994 Selected papers from the conference held in Washington DC July 9 14 1989 *Evidence-Based Practice in Educating Deaf and Hard-of-Hearing Students* Patricia Elizabeth Spencer, Marc Marschark, 2010-07-21 Debates about methods of supporting language development and academic skills of deaf or hard of hearing children have waxed and waned

for more than 100 years Will using sign language interfere with learning to use spoken language or does it offer optimal access to communication for deaf children Does placement in classrooms with mostly hearing children enhance or impede academic and social emotional development Will cochlear implants or other assistive listening devices provide deaf children with sufficient input for age appropriate reading abilities Are traditional methods of classroom teaching effective for deaf and hard of hearing students Although there is a wealth of evidence with regard to each of these issues too often decisions on how to best support deaf and hard of hearing children in developing language and academic skills are made based on incorrect or incomplete information No matter how well intentioned decisions grounded in opinions beliefs or value judgments are insufficient to guide practice Instead we need to take advantage of relevant emerging research concerning best practices and outcomes in educating deaf and hard of hearing learners In this critical evaluation of what we know and what we do not know about educating deaf and hard of hearing students the authors examine a wide range of educational settings and research methods that have guided deaf education in recent years or should The book provides a focus for future educational and research efforts and aims to promote optimal support for deaf and hard of hearing learners of all ages Co authored by two of the most respected leaders in the field this book summarizes and evaluates research findings across multiple disciplines pertaining to the raising and educating of deaf children providing a comprehensive but concise record of the successes failures and unanswered questions in deaf education A readily accessible and invaluable source for teachers university students and other professionals Evidence Based Practice in Educating Deaf and Hard of Hearing Students encourages readers to reconsider assumptions and delve more deeply into what we really know about deaf and hard of hearing children their patterns of development and their lifelong learning
