The Heart of His Mystery John Waterfield,2009-10-21 Shakespeare has traditionally been viewed as Queen Elizabeth s poet laureate and as the official mouthpiece of the Elizabethan age But the Elizabethan world was torn apart by the religious divisions initiated by the Reformation and vitiated by the government s merciless persecution of Catholics As it was the victors who wrote the history the English Reformation has been portrayed as a peaceful transition enjoying majority support when in fact it was nothing of the kind Elizabeth s regime was a police state which sanctioned the use of torture where Catholic priests and those who harboured them were liable to summary and bloody execution The persecution of Catholics was continued by James I evoking the violent response of the Gunpowder Plot The Heart of His Mystery examines Shakespeare s life and work against this background There is strong biographical evidence that he was himself a Catholic and a detailed survey of his plays and poems shows that his imagination was intimately bound up with his religious faith When we realise that his human compassion grew from his membership in a persecuted community we can glimpse the mystery he has encrypted in his works and we come closer to understanding the hidden heart of Shakespeare the man

The Delineator R. S. O'Loughlin,H. F. Montgomery,Charles Dwyer,1906 Issue for Oct 1894 has features articles on Mount Holyoke College and Millinery as an employment for women **Lead from the Heart:** Mark C. Crowley,2011-07-11

Our common belief in business is that the heart has no place in workplace management. In fact, most of us were taught that the heart acts like Kryptonite in leadership; it inherently undermines a manager's effectiveness and lowers productivity and profitability. In this stunning and groundbreaking work, however, engagement expert Mark C. Crowley provides irrefutable proof that we were wrong. Crowley begins by showing us how traditional leadership practices are failing. Across the globe, employee engagement and job satisfaction scores have fallen to crisis levels. According to astonishing research from Gallup, 70% of the US workforce is now disengaged. It once was that a job and a paycheck kept workers satisfied and productive. Today, pay barely makes the list of what inspires people to put their hearts into their work and contribute to their highest capacity. Right before our eyes, human beings have evolved in what they need and want in exchange for work. 21st Century employees are seeking to find purpose, meaning, and feelings of significance. What drives their engagement is feeling valued, respected, developed, and cared for. Crowley's profound insight draws upon recent medical science discoveries which prove it's the heart and not the mind that drives human motivation and achievement. There's nothing soft about *Lead From The Heart*. It represents the future of workplace management and a roadmap to driving uncommon engagement, productivity, and profitability.

Poetry from the Heart Carolyn Crawford, 2016-12-13 This poetry book will keep you wondering what the next poem may contain. Will it be about a memory of parents or about another newborn in your extended family? What are some of the experiences that make a family bond? Most poems are about experiences the author has had with friends or family members. However, the book also contains thoughts on nature and sacred subjects that are dear to her heart. Some poems may make you laugh and they are true experiences. Love is felt as many are read. Appreciation of the wonders of the world is seen in simple descriptions as she observes and writes about them. You will get to know the author personally as you read the section About Me. Perhaps some of the poems will trigger memories in your life and help you realize that you too have cause to rejoice of the many special times you have had with your loved ones.

The Poets and Poetry of America Rufus Wilmot Griswold, 1842 One of the most important American poetry anthologies of the nineteenth century including the works of nearly every major and minor poet of the day selected by Edgar Allan Poe's future literary executor and rarely encountered in the correct first printing. Poets included are Longfellow, Lowell, Whittier, Holmes, Bryant, Emerson, Jones, Very, William Gilmore Simms, Christopher P. Cranch, Richard Henry Dana, and an impressive selection of female poets now mostly forgotten: Sigourney, Gould, Brooks, Mrs. Seba Smith, Hall, Embury, Ellett, Dinnies, Welby, Hooper, Davidson.

Dysregulation of Autonomic Cardiac Control by Traumatic Stress and Anxiety J. P. Ginsberg, 2016-08-05 Current understanding of the interplay between sympathetic and parasympathetic influences on cardiac response to environmental stimuli and subsequent response selection e.g. maintenance of resting homeostasis, mobilization of defensive response, task performance, tonic immobilization and/or affiliation will be explored. Reference will be made to how these processes conjoin with proposed polyvagal theory. Cardiac adjustments to

environmental stimuli affect the internal physiological state of the organism as well as the quality of information processing that the individual can perform during the stimulus appraisal stage of the orienting response Bradyrdia is adaptive in early stages of orientation to novel or potential threat while greater HRV power serves to facilitate self regulation stimulus information processing and appraisal and appropriate response selection This issue is devoted to current research findings on how normal patterns of cardiac autonomic regulation of HRV are disrupted in PTSD impairing sustained attention to the environment and increasing the rate of inappropriate responding to stimuli Origins of our current state of understanding in the intake rejection hypothesis will be considered and how the intake rejection hypothesis has morphed into present day Optimal Performance practice Additionally empirical data where available will be presented on how dysregulation of the normal pattern of cardiac autonomic regulation by PTSD impairs sustained attention to the environment and increases the rate of inappropriate responding to stimuli through disinhibition poor impulse control emotional withdrawal over arousal and attentional bias Current research findings are sought that address in controlled experimental and clinical trials the restorative effects of HRV biofeedback on HRV power and how increases in HRV power relate to improved attention immediate memory and self regulation of affect using outcome measures of cognition symptoms of PTSD and depression stress perception and level of adaptive function
