Yalom, 2017-10-03

Bestselling writer and psychotherapist Irvin D Yalom puts himself on the couch in a candid insightful Abraham Verghese memoir Irvin D Yalom has made a career of investigating the lives of others In this profound memoir he turns his writing and his therapeutic eye on himself He opens his story with a nightmare He is twelve and is riding his bike past the home of an acne scarred girl Like every morning he calls out hoping to befriend her Hello Measles But in his dream the girl's father makes Yalom understand that his daily greeting had hurt her For Yalom this was the birth of empathy he would not forget the lesson As *Becoming Myself* unfolds we see the birth of the insightful thinker whose books have been a beacon to so many This is not simply a man's life story Yalom's reflections on his life and development are an invitation for us to reflect on the origins of our own selves and the meanings of our lives Psychiatry in Crisis Vincenzo Di Nicola, Drozdostoj

Stoyanov, 2021-02-03 The field of academic psychiatry is in crisis everywhere It is not merely a health crisis of resource scarcity or distribution competing claims and practice models or level of development from one country to another but a deeper more fundamental crisis about the very definition and the theoretical basis of psychiatry The kinds of questions that represent this crisis include whether psychiatry is a social science like psychology or anthropology whether it is better understood as part of the humanities like philosophy history and literature or if the future of psychiatry is best assured as a branch of medicine based on genetics and neuroscience In fact the question often debated since the beginning of modern psychiatry concerns the biomedical model so that part of psychiatry's perpetual self questioning is to what extent it is or is not a branch of medicine This unique and bold volume offers a representative and critical survey of the history of modern

psychiatry with deeply informed transdisciplinary readings of the literature and practices of the field by two professors of psychiatry who are active in practice and engaged in research and have dual training in scientific psychiatry and philosophy In alternating chapters presenting contrasting arguments for the future of psychiatry the two authors conclude with a dialogue between them to flesh out the theoretical research and practical implications of psychiatry's current crisis outlining areas of divergence consensus and fruitful collaborations to revision psychiatry today The volume is scrupulously documented but written in accessible language with capsule summaries of key areas of theory research and practice for the student and practitioner alike in the social and human sciences and in medicine psychiatry and the neurosciences **The**
