

Back-to-School Letter to Parents and Caregiver

Middle School Math

Dear Parents and Caregivers,

Welcome back to school! I'm thrilled to be your child's Math teacher this year. We have an exciting journey of learning and discovery ahead of us. My goal is to create a positive and nurturing classroom environment where each student can flourish and reach their full potential.

Throughout the year, we will explore various concepts and engage in hands-on activities to make learning math fun and meaningful. I possess a growth mindset. This means I believe all students can conquer math with consistent practice, targeted feedback, and lots of encouragement. Rest assured, I'm up for the challenge.

I'm committed to fostering a love of learning in your child and providing them with the tools they need to succeed academically and socially. In class, we will solve real-world problems, and master the learning habits required of successful math students. We will speak and write like mathematicians. We will work collaboratively and independently. We will have nightly homework assignments, Monday-Thursday, to help students reinforce what we learn in class.

In closing, let me just say that communication is essential to our collective success this year. Please don't hesitate to reach out to me with any questions or concerns you may have. I value your input and believe that working together as a team will support your child's growth and development. Together, we will make this school year a memorable and rewarding experience for all!

Respectfully,

[Your Name], Math Teacher

Cobb, 2002-06-10 The remarkable story of the Algebra Project a community based effort to develop math science literacy in disadvantaged schools as told by the program's founder Bob Moses was a hero of mine His quiet confidence helped shape the civil rights movement and he inspired generations of young people looking to make a difference Barack Obama At a time when popular solutions to the educational plight of poor children of color are imposed from the outside national standards high stakes tests charismatic individual saviors the acclaimed Algebra Project and its founder Robert Moses offer a vision of school reform based in the power of communities Begun in 1982 the Algebra Project is transforming math education in twenty five cities Founded on the belief that math science literacy is a prerequisite for full citizenship in society the Project works with entire communities parents teachers and especially students to create a culture of literacy around algebra a crucial stepping stone to college math and opportunity Telling the story of this remarkable program Robert Moses draws on lessons from the 1960s Southern voter registration he famously helped organize Everyone said sharecroppers didn't want to vote It wasn't until we got them demanding to vote that we got attention Today when kids are falling wholesale through the cracks people say they don't want to learn We have to get the kids themselves to demand what everyone says they don't want We see the Algebra Project organizing community by community Older kids serve as coaches for younger students and build a self-sustained tradition of leadership Teachers use innovative techniques And we see the remarkable success stories of schools like the predominately poor Hart School in Bessemer Alabama which outscored the city's middle class flagship school in just three years Radical Equations provides a model for anyone looking for a community based solution to the problems of our disadvantaged schools
