Lewis And Clark Lexicon Of Discovery:

Lewis and Clark Lexicon of Discovery Alan H. Hartley, 2004 What is a cataplasm and what do you do with one Would you be insulted if someone called you argillaceous Would you want someone to give you a clyster Would you eat wappato What does it mean when a canoe flacks These are all words that were familiar to Meriwether Lewis William Clark and their companions and were penned in their journals but are less commonly used and understood today In addition the lexicon explains words for which the definitions have now changed For example the word mere used to mean absolute downright Accordingly in 1768 George Washington wrote in his diary that it blew a mere Hurricane Meriwether Lewis followed the same connotation when he recorded a violent storm arose the rain fell in a mere torrent Yet in modern language the sense of the word has evolved from nothing less than to nothing more than The lexicon also includes many words that were adopted from the French and Native American languages The journals are a fascinating record of American English at the time of the greatest expansion in U S history states author Alan H Hartley He currently works as an independent lexicographer editor and researcher and has contributed to the Oxford English Dictionary New Oxford American Dictionary and the Oxford American College Dictionary Hartley spent more than five years researching the history people and physical world of the expedition hoping to help modern readers better understand the language of the time and appreciate its sounds as well His special emphasis on pronunciation will be especially valuable to historical reenactors The volume features over 1 100 entries and more than 2 000 illustrative quotations as well as considerable background material on the English and other languages of the expedition A typical entry includes the headword pronunciation definition cross reference and the related journal quotation along with date author and citation information This new title will long serve as an outstanding reference tool for the Corps of Discovery journals

The Language of Discovery, Exploration and Settlement Nicholas Brownlee, 2019-10-31 This volume offers the first fully focused study on the language and discourse employed in historical accounts of discovery exploration and settlement stretching from the 16th to 19th centuries and covering areas as far afield as the Americas Africa India Australasia and the Arctic In the examination of the discourse and accompanying paratextual features when present the contributors make use of qualitative and quantitative analysis in order to identify the manner in which the knowledge disseminators of the time adapted created and exploited the language of the genre in which they were communicating to inform or persuade contemporary readers The chapters focus in particular on six genres namely print news manuscript correspondence journals dictionaries travel books and geography schoolbooks Knowledge dissemination is mediated through these six different genres but in each case the genre in question conveys three common aspects of knowledge dissemination the factual the personal and the ideological The focus is as such on how domain specific knowledge is mediated in specialized and popularizing discourse in order to address different stakeholders

Acts of Discovery Albert Furtwangler, 1993 Meriwether Lewis and William Clark wove science and raw adventure together in their journals as they blazed a trail from St Louis to the Pacific Now with fresh information drawn from many fields Albert Furtwangler mines those journals for valuable insights into western American history as well as the process of discovery Acts of Discovery argues that Lewis and Clark surpassed the enlightened instructions given to them by President Thomas Jefferson They made a literal large scale experiment probing the interior of a continent and weighing information that eventually would supersede the science the politics and even the artistic ideals of Jefferson and his age Drawing on a background of interdisciplinary learning Furtwangler illuminates the achievements of Lewis and Clark as naturalists navigators and diplomats who faced ever new surprises as they worked their way west He shows that their journals trace two very different patterns at the same time as records of modern scientific reasoning and as a narrative of epic deeds in an American epic setting Furtwangler also attempts to define Lewis and Clark's place in American history He examines some ironic outcomes of westward expansion and conquest and brings out the peculiar courage of explorers who were the first and almost the last to cross the continent by pulling their way up the Missouri He also compares Lewis and Clark's discoveries to those of other generations from George Washington's early years as a surveyor of the new American interior to the Apollo moon landings discussing them in light of questions about progress posed by Francis Bacon Henry Adams and modern experimental scientists
