Argentine, Mexican, and Guatemalan Photography David William Foster, 2014-10-01 One of the important cultural responses to political and sociohistorical events in Latin America is a resurgence of urban photography which typically blends high art and social documentary But unlike other forms of cultural production in Latin America photography has received relatively little sustained critical analysis This pioneering book offers one of the first in depth investigations of the complex and extensive history of gendered perspectives in Latin American photography through studies of works from Argentina Mexico and Guatemala David William Foster examines the work of photographers ranging from the internationally acclaimed artists Graciela Iturbide Pedro Meyer and Marcos Lopez to significant photographers whose work is largely unknown to English speaking audiences He grounds his essays in four interlocking areas of research the experience of human life in urban environments the feminist matrix and gendered cultural production Jewish cultural production and the ideological principles of cultural works and the connections between the works and the sociopolitical and historical contexts in which they were created Foster reveals how gender marked photography has contributed to the discourse surrounding the project of redemocratization in Argentina and Guatemala as well as how it has illuminated human rights abuses in both countries He also traces photography's contributions to the evolution away from the masculinist dominated post 1910 Revolution ideology in Mexico This research convincingly demonstrates that Latin American photography merits the high level of respect that is routinely accorded to more canonical forms of cultural production

Ojo sociológico Jesús M. de Miguel, 2022. Esta obra aborda la investigación de la realidad social con imágenes. Analiza el canon visual centrándose en las imágenes en movimiento conocidas como documentales y también como videos. Estudia en detalle una decena de los mejores proyectos visuales realizados en los últimos cien años. Se complementa con las películas accesibles gratuitamente con los enlaces Web que se reseñan en cada capítulo especialmente en Youtube. Presenta además una decena de películas híbridas entre ficción y documental que sirven para seguir investigando. Se trata de un texto válido para las diversas ciencias sociales. Su objetivo es doble. En primer lugar analiza la forma en que las imágenes en movimiento películas documentales y videos muestran la realidad contribuyendo al mismo tiempo al cambio social. En segundo lugar motiva y estimula para que las personas que lean el texto y visionen los filmes decidan algún día producir documentales sociales similares. La sociología visual está poco desarrollada en España pero es cada vez más importante. A su lectura hay que
