,1989 **The Nature of Magic** Susan Greenwood,2020-06-03 This book examines how and why practitioners of nature religion Western witches druids shamans seek to relate spiritually with nature through magical consciousness Magic and consciousness are concepts that are often fraught with prejudice and ambiguity respectively Greenwood develops a new theory of magical consciousness by arguing that magic ultimately has more to do with the workings of the human mind in terms of an expanded awareness than with socio cultural explanations She combines her own subjective insights gained from magical practice with practitioners in depth accounts and sustained academic theory on the process of magic She also tracks magical consciousness in philosophy myth folklore story telling and the hi tech discourse of postmodernity and asks important questions concerning nature religion s environmental credentials such as whether it is inherently ecological as many of its practitioners claim The Sacred Network Chris H. Hardy,2011-02-23 How sacred sites amplify the energies of consciousness the earth and the universe Examines the web of geometrical patterns linking sacred sites worldwide with special focus on the sacred network of ley lines in Paris Unveils the coming state of shared consciousness for humanity fueled by the sacred network Reveals how consciousness is a tangible form of energy First marked by the standing stones of our megalithic ancestors the world s sacred sites are not only places of spiritual energy but also hubs of cosmic energy and earthly energy Generation upon generation has recognized the power of these sites with the result that each dominant culture builds their religious structures on the same spots the Cathedral of Notre Dame in Paris for example was constructed over a Temple to Diana that in turn had been built over a stone pillar worshipped by the Gauls In The Sacred Network Chris Hardy shows how the world s sacred sites coincide with the intersections of energetic waves from the earth s geomagnetic field and how via their megaliths temples and steeples these sites act as antennae for the energies of the cosmos Delving deeply in to Paris s sacred network she also explores the intricate geometrical patterns created by the alignments of churches and monuments such as pentagrams and Stars of David Revealing that consciousness is a tangible energy she explains how the sacred network is fueling an 8 000 year evolutionary cycle initiated by our megalithic ancestors that will soon culminate in a new state of shared consciousness for humanity
