

Dear Parents,

Welcome to my ESL classroom! I am very excited and look forward to having your child in my ESL classroom for the upcoming school year. I am glad that we were able to meet in person during our "Meet Your Teacher" night and your child had the opportunity to become familiar with his/her classroom. I would like to take the time to discuss over some of the methods I will include in my curriculum, which will help increase your child's reading comprehension and writing skills. I create a challenging curriculum that will help your child develop high order thinking skills in reading and writing. As you well know that reading and writing work hand in hand, and you can rest assure that your child will have the literacy engagement needed to become successful readers and writers.

For my ESL students I like to create a challenging curriculum that fits their individual needs. During our Writer's Workshop I will always start with a mini-lesson in where I will model to the students a writing strategy to use or go over proper grammar usage. After the mini-lessons students will work on their individual pieces in where I will work with students individually. When working with my ESL students individually, I like to activate the background knowledge on what they already know about writing through their native language and build upon that knowledge to make it easier for them to transfer that knowledge when writing in English. During their individual writing and reading times I allow my students to read or write in their native language if they choose, I believe this an excellent way of developing those writing skills and then transferring them in English.

I also plan of providing your child with authentic writing activities that fit your child's individual abilities. This will be done through collaborative planning which your child. I firmly believe that when we give our students the opportunities to be in charge of their own learning, they will accomplish much more. I like to give my ESL students the opportunities to choose what they like to write about and choose which genre to use to express their thoughts. I am looking forward to working with your child this year. Please feel free to contact me through email or during my after school hours.

Sincerely,

Miss. Castellanos

Landmark Essays on

ESL Writing Tony Silva, Paul Kei Matsuda, 2013-10-31 In recent years the number of nonnative speakers of English in colleges and universities in North America has increased dramatically. As a result, more and more writing teachers have found themselves working with these English as a Second Language (ESL) students in writing classes that are designed primarily with monolingual native English speaking students in mind. Since the majority of institutions require these students to enroll in writing courses at all levels, it is becoming increasingly important for all writing teachers to be aware of the presence and special linguistic and cultural needs of ESL writers. This increase in the ESL population has over the last 40 years been paralleled by a similar growth in research on ESL writing and writing instruction research that writing teachers need to be familiar with in order to work effectively with ESL writers in writing classrooms of all levels and types. Until recently, however, this body of knowledge has not been very accessible to writing teachers and researchers who do not specialize in second language research and instruction. This volume is an attempt to remedy this problem by providing a sense of how ESL writing scholarship has evolved over the last four decades. It brings together 15 articles that address various issues in second language writing in general and ESL writing in particular. In selecting articles for inclusion, the editors tried to take a principled approach. The articles included in this volume have been chosen from a large database of publications in second language writing. The editors looked for works that mirrored the state of the art when they were published and made a conscious effort to represent a wide variety of perspectives, contributions, and issues in the field. To provide a sense of the evolution of the field, this collection is arranged in chronological order.

Oxford Handbook of Deaf Studies, Language, and Education Marc Marschark, Professor at the National Technical Institute of the Deaf at Rochester Institute of Technology, Patricia Elizabeth Spencer, Research Professor in the Department of Social Work, Gallaudet University, 2003-03-27 In Plato's *Cratylus*, which dates to 360 B.C., Socrates alludes to the use of signs by deaf people. In his *Natural History*, completed in 79 A.D., Pliny the Elder alludes to Quintus Pedius, the deaf son of a Roman consul who had to seek permission from Caesar Augustus to pursue his training as an artist. During the Renaissance, scores of deaf people achieved fame throughout Europe, and by the middle of the 17th century, the talents and communication systems of deaf people were being studied by a variety of noted scientists and philosophers. However, the role of deaf people in society has always been hotly debated: could they be educated? Should they be educated? If so, how? How does Deaf culture exist within larger communities? What do advances in the technology and the genetics of hearing loss portend for Deaf communities? In this landmark volume, a wide range of international experts present a comprehensive and accessible overview of the diverse field of deaf studies, language, and education. Pairing practical information with detailed analyses of what works, why, and for whom, and banishing the paternalism once intrinsic to the field, the handbook consists of specially commissioned essays on topics such as language and language development, hearing and speech perception, education, literacy, cognition, and the complex cultural, social, and psychological issues associated with individuals who are deaf or hard of hearing. Through careful planning, collaboration, and

editing the various topics are interwoven in a manner that allows the reader to understand the current status of research in the field and recognize the opportunities and challenges that lie ahead providing the most comprehensive reference resource on deaf issues Written to be accessible to students and practitioners as well as researchers The Oxford Handbook of Deaf Studies Language and Education is a uniquely ambitious work that will alter both theoretical and applied landscapes It surveys a field that has grown dramatically over the past 40 years since sign languages were first recognized by scientists to be true languages From work on the linguistics of sign language and parent child interactions to analyses of school placement and the mapping of brain function in deaf individuals research across a wide range of disciplines has greatly expanded not just our knowledge of deafness and the deaf but of the very origins of language social interaction and thinking Bringing together historical information research and strategies for teaching and service provision Marc Marschark and Patricia Elizabeth Spencer have given us what is certain to become the benchmark reference in the field
