speed math about 2 3 years I realized that there is unique secret principle behind speed mathematics This book explains entire speed mathematics by using single principle and gives introduction to new number system called as global number system It extends VM framework in some of the area like divisibility  $n$  th root Related Videos Presentations 1 <https://www.youtube.com/watch?v=b3PFjsUgULM> 2 <http://www.slideshare.net/jadhavvitthal1989/presentations-MODERN-APPROACH-TO-SPEED-MATH-SECRET-PAPERBACK-EDITION> Due to frequent demand from reader for paperback edition of Modern Approach to Speed Math Secret it would be provided as print on demand service TO ORDER PAPERBACK EDITION REFER [http://teckguide.net/page\\_id/38](http://teckguide.net/page_id/38) For Joining course on aptitude Visual math Vedic math by author refer <http://piclearner.com> Note to Reader Reader can post suggestion constructive criticism or any question related to any math topic at <https://www.facebook.com/vjmathemagic> OR <https://www.facebook.com/groups/887201061336628> Group on mathematics for solving reader's doubt spreading new insight in mathematics by different experts bringing different researcher together boosting number sense logical thinking in student Essence of mathematics lies in its freedom Georg Cantor Pure mathematics is in its way the poetry of logical ideas Albert Einstein As far as the laws of mathematics refer to reality they are not certain and as far as they are certain they do not refer to reality Albert Einstein In my opinion all things in nature occur mathematically Ren Descartes Mathematical Knowledge adds vigour to the mind free it from prejudices superstition John Arbuthnot Some mathematician I believe has said that true pleasure lies not in the discovery of truth but in the search for it Tolstoy Mathematics is the queen of science and arithmetic the queen of mathematics Carl Friedrich Gauss Truth is ever to be found in the simplicity and not in the multiplicity and confusion of things Isaac Newton Generally researcher invests its invaluable time on research Research book in country like America etc are more than 200 Though some idea concepts seems trivial but understand that even it takes lot of time to invent discover Example decimal value system may seems simple to us but it takes thousands of year to our ancient sages to invent the symbol for numbers decimal value system In true sense researcher can understand the significance of other research because it knows value of time that other researcher invest This book is result of many years research The price of book doesn't reflect value of time invested Still by considering readers comment price of book is changed Now reader can enjoy the book at lower price Note If reader have any problem even after purchasing book then please contact google or send mail to author email given in book with your problem book purchasing receipt The problem occur in rare cases from Google We will try our best to solve problem      *Essential Math for AI* Hala Nelson, 2023-01-04 Companies are scrambling to integrate AI into their systems and operations But to build truly successful solutions you need a firm grasp of the underlying mathematics This accessible guide walks you through the math necessary to thrive in the AI field such as focusing on real world applications rather than dense academic theory Engineers data scientists and students alike will examine mathematical topics critical for AI including regression neural networks optimization backpropagation convolution Markov chains and more through popular applications such as computer vision

natural language processing and automated systems And supplementary Jupyter notebooks shed light on examples with Python code and visualizations Whether you re just beginning your career or have years of experience this book gives you the foundation necessary to dive deeper in the field Understand the underlying mathematics powering AI systems including generative adversarial networks random graphs large random matrices mathematical logic optimal control and more Learn how to adapt mathematical methods to different applications from completely different fields Gain the mathematical fluency to interpret and explain how AI systems arrive at their decisions

ARTIFICIAL INTELLIGENCE: A MODERN APPROACH

Dr. Anil Kumar,Sivasubramanian Balasubramanian,Dr. Haewon Byeon,Prof. Ganesh Vasudeo Manerkar,2024-05-18 Here we try to define artificial intelligence AI and explain why we think it deserves more attention than other worthy research topics obviously this is a prerequisite to doing any kind of study in this area We humans take great pride in our intelligence in fact we call ourselves Homo sapiens which means man the wise Human cognition has long baffled scientists who have sought to explain how a little particle of stuff like us can see understand predict and control an enormous and complex cosmos Beyond that the field of artificial intelligence AI aims to do more than just understand it aims to build intelligent objects One of the newest innovations in engineering and science is AI The name wasn t even thought of until 1956 although development started in earnest almost immediately after WWII ended Science professionals from several disciplines often mention artificial intelligence AI as the field I would most like to be in next to molecular biology If you re a physics student you could think that all the great thinkers like Galileo Newton Einstein and others have thought of everything Conversely AI is still on the market for a handful of brilliant minds to join their team full time At now AI encompasses a wide variety of subfields from the broad perception and learning to the narrow proving mathematical theorems writing poetry operating a car on a congested street and disease detection among many others These are but a few of the many activities that might be categorised as AI related Artificial intelligence AI is a field that really covers all intellectual pursuits it is relevant to everyone
