Bosque, Violeta Demonte, 1999 **Desired Language** Francesc Feliu, 2023-01-15 National linguistic ideology has been at the base of most historical processes that whether they are complete or not have brought us to the current reality a world of languages that represent with greater or lesser exactitude the diversity and convergences of human groups Various of today's thinkers have predicted the decline or even the end of national ideologies In the area of language postmodernism would make the linguistic affiliation of the community individuals irrelevant de ideologise language use and extend plurilingualism and language alternation in association with a new distribution of physical or functional spaces of linguistic practice But is this true everywhere Are languages now nowhere the core of collective identity Or are we witnessing a distinction between languages that because of their magnitude status strategic position etc can continue to exercise the function of national languages and languages that have to renounce this function Has national linguistic ideology really ceased to make sense What other strategies should the historic language of a given geographic area employ if it wants to continue forming part of the life of the community that is set up there What kinds of languages are desired by politicians intellectuals and philologists This book aims to bring some thoughts about these questions Clitics Joel Ashmore Nevis, 1994-01-01 This bibliography provides an alphabetical listing of over 1500 articles books and dissertations that treat in some way the topic of clitics and related matters e g affixes words word order movement sandhi etc The beginning point for the bibliographic entries is 1892 taking Jacob Wackernagel's classic work as the point of departure and the entries cover the subsequent 100 year period Each entry is accompanied by a series of descriptors which give an indication of the content of the item Nearly one third of the book is a detailed analytic index based on the descriptors which can aid in topical searches for relevant material Prefatory matter includes an essay What is a Clitic by Arnold M Zwicky a brief consideration of Wackernagel's scholarly career by Brian D Joseph and information on the format and use of the book itself Comparative Constructions in Spanish and French Syntax Susan Price, 2016-11-10 This study first published in 1990 presents a comprehensive description of the comparative constructions of Spanish and French and shows that the apparently numerous differences in their syntactic realisations can be accounted for by general constraints on the expression of comparison There is also a discussion of parallel constructions in other Romance languages showing that these languages display a range of constructions equally compatible with the suggested pattern of possibilities resulting from the general constraints proposed This title will be of interest to students of language and linguistics *Syntactic Geolectal Variation* Alba Cerrudo, Ángel J. Gallego, Francesc Roca Urgell, 2021-11-15 This volume brings together studies that combine both traditional and contemporary tools in the study of syntactic geolectal variation with a special focus on a subset of Iberian varieties There is an increasing body of research on syntactic micro variation but the interaction between dialectology which makes use of atlases corpora databases questionnaires interviews etc and formal syntactic studies has traditionally been weak or even nonexistent which is precisely the gap the contributions in this book aim at filling in From a broader perspective this collection is meant as a contribution to

the subfield of linguistic variation and to the more general field of Romance linguistics with special interest in Spanish and in other Iberian languages The volume is meant for both researchers and students interested in linguistic variation or dialectology and specifically in syntactic variation in Iberian languages [Cicle de conferències 96-97](#) Institut Universitari de Lingüística Aplicada, 2010-07-30 Aquest tercer volum de la col·lecció Lèxic corpus i diccionaris aplega les conferències corresponents al primer curs del programa de doctorat 1996-1997 de l'IULA Les unitats del lèxic concebudes com a elements nuclears de l'organització del llenguatge constitueixen el tema constant de totes les intervencions que s'han donades diverses per tal com les perspectives de tractament del lèxic així com els models que permeten descriure'ls són també diversos *From Latin to Romance* Adam Ledgeway, 2012-05-17 This book examines grammatical changes during the transition from Latin to the Romance languages and the factors proposed to explain them It challenges orthodoxy presents new perspectives on language change structure and variation and will appeal equally to Romance linguists Latinists philologists and historical linguists of all persuasions

Gramática descriptiva de la lengua española: Las construcciones sintácticas fundamentales. Relaciones temporales, aspectuales y modales Ignacio Bosque, Violeta Demonte, 1999 **Manual of Grammatical Interfaces in Romance** Susann Fischer, Christoph Gabriel, 2016-09-12 Different components of grammar interact in non trivial ways It has been under debate what the actual range of interaction is and how we can most appropriately represent this in grammatical theory The volume provides a general overview of various topics in the linguistics of Romance languages by examining them through the interaction of grammatical components and functions as a state of the art report but at the same time as a manual of Romance languages [Sintaxi i semàntica de l'article](#) Antonio Briz, Manuel Prunyonosa, 2016-02-08 [The Romance Languages](#) Martin Harris, Nigel Vincent, 1997 Available again this book discusses nine Romance languages in context of their common Latin origins and then in individual studies The final chapter is devoted to Romance based Creole languages a genuine innovation in a work of this kind [The Cambridge History of the Romance Languages: Volume 1, Structures](#) Martin Maiden, John Charles Smith, Adam Ledgeway, 2011 This Cambridge history is the definitive guide to the comparative history of the Romance languages Volume I is organized around the two key recurrent themes of persistence structural inheritance and continuity from Latin and innovation structural change and loss in Romance

Romance Linguistics 2013 Christina Tortora, Marcel den Dikken, Ignacio L. Montoya, Teresa O'Neill, 2016-02-03 This volume contains a selection of peer reviewed articles first presented at the 43rd Linguistic Symposium on Romance Languages LSRL held in New York in 2013 The articles deal with various synchronic and diachronic aspects of Romance languages and dialects world wide They will be of interest to scholars in Romance and in general linguistics
