code And yet as Hannah Higgins makes clear in this engaging and evocative book the grid has a history that long predates modernity it is the most prominent visual structure in Western culture In *The Grid Book* Higgins examines the history of ten grids that changed the world the brick the tablet the gridiron city plan the map musical notation the ledger the screen moveable type the manufactured box and the net Charting the evolution of each grid from the Paleolithic brick of ancient Mesopotamia through the virtual connections of the Internet Higgins demonstrates that once a grid is invented it may bend crumble or shatter but its organizing principle never disappears The appearance of each grid was a watershed event Brick tablet and city gridiron made possible sturdy housing the standardization of language and urban development Maps musical notation financial ledgers and moveable type promoted the organization of space music and time international trade and mass literacy The screen of perspective painting heralded the science of the modern period classical mechanics and the screen arts while the standardization of space made possible by the manufactured box suggested the purified box forms of industrial architecture and visual art The net the most ancient grid made its first appearance in Stone Age Finland today the loose but clearly articulated networks of the World Wide Web suggest that we are in the middle of an emergent grid that is reshaping the world as grids do in its image

Kazimir Malevich: Black Square Yekaterina Andreeva, 2018-06 Malevich's *Black Square* heralded the triumph of non objectivity when there was nothing left to destroy in the figurative form and the object lost its materiality This canvas shown at the Last Futurist Exhibition of Paintings 0 10 in Petrograd in December 1915 embodied its creator's conception of the zero of form the beginning and the end of everything The artist repeated the famous composition which undoubtedly became an icon of 20th century painting The Hermitage has a version dated ca 1930 it was formerly kept in the collection of the Malevich family

surrounds us It's a disconnect with a dire cost Our relationship to the stars and planets has moved from one of awe wonder and superstition to one where technology is king the cosmos is now explored through data on our screens not by the naked eye observing the natural world Indeed in most countries modern light pollution obscures much of the night sky from view Jo Marchant's spellbinding parade of the ways different cultures celebrated the majesty and mysteries of the night sky is a journey to the most awe inspiring view you can ever see looking up on a clear dark night That experience and the thoughts it has engendered have radically shaped human civilization across millennia The cosmos is the source of our greatest creativity in art in science in life To show us how Jo Marchant takes us to the Hall of the Bulls in the caves at Lascaux in France and to the summer solstice at a 5 000 year old tomb at Newgrange Ireland We discover Chumash cosmology and visit medieval monks grappling with the nature of time and Tahitian sailors navigating by the stars We discover how light reveals the chemical composition of the sun and we are with Einstein as he works out that space and time are one and the same A four billion year old meteor inspires a search for extraterrestrial life The cosmically liberating summary revelation is that star gazing made us human
