Kazumasa Yamashita Books Nippan, Process Architecture Editorial Staff, Process Architecture Editorial, 1996-12-07 While trying to put the work of Yamashita into some perspective we are reminded once again how difficult it is to adopt a straight forward theoretical approach to the work of this architect After all there is hardly anything in his work which reflects the age or how his ideas

have developed People tend for example to consider his early work done during the 1960 s and up to the middle of the 70 s as being a phase of plain masonry or building block style Then following close on the heels of this style came a slightly confused series of highly modeled buildings which took him into the 1980 s In fact this series of highly modeled buildings can be admirably represented by just one the Face House This small house provides us with a yard stick by which to evaluate the architecture of Yamashita although while some find it unacceptable others find it interesting and embrace it The Architecture of Tokyo Hiroshi Watanabe,2001-03-20 Over 500 buildings are presented from 15th century Buddhist temples to 20th century cultural buildings from venerable folkhouses to works by leading contemporary architects of Japan such as Kenzo Tange Fumihiko Maki Arata Isozaki Hiroshi Hara Toyo Ito and Riken Yamamoto as well as by foreign architects such as Norman Foster Peter Eisenman and Steven Holl BOOK JACKET Shinkenchiku ,1989 Polymer Preprints, Japan ,2008 Official Gazette of the United States Patent and Trademark Office United States. Patent and Trademark Office,2002 Twentieth Century Design Jonathan M. Woodham,1997-04-10 A look at the wider issues of design and industrial culture throughout Europe Scandinavia North America and the Far East The book explores the way in which 20th century designs such as the Coca Cola bottle have affected our culture more than those considered true classics *In Detail, Small Structures* Christian Schittich,2012-12-10 Shelters kiosks snack bars market stalls bus stops telephone booths toilets advertising columns ticket booths mobile tents or housing units emergency shelters tourist information booths this list of small autonomously functioning buildings could be expanded almost infinitely Small buildings shape our daily lives they are found at the nearest street corner they are present and indispensable but as architecture they attract our attention only rarely Yet these small structures occupy a definite place in the infrastructure of the city Rather than focusing on the large attractions of architecture architects find many potential ways to ensure the quality of everyday design hidden in these small sometimes charming necessities This volume in the DETAIL series spans the arc between architecture and product design since not infrequently small buildings are located precisely in the area of tension between these two professions and their successful realization is evident in the details of their construction **Kazumasa Yamashita** Kazumasa Yamashita (Architecte, Japan),1989 Tokyoids Francois Blanciak,2022-09-13 A photographic survey of the robotic face of Tokyo buildings and an argument that robot aesthetics plays a central role in architectural history In *Tokyoids* architect Fran ois Blanciak surveys the robotic faces omnipresent in Tokyo buildings offering an architectural taxonomy based not on the usual variables size material historical style but on the observable expressions of buildings Are the eyes windows twinkling the mouth door laughing Is that balcony a howl of distress Investigating robot aesthetics through his photographs of fifty buildings Blanciak argues that the robot face originated in architecture before the birth of robotics and has played a central role in architectural history Blanciak first puts the robot face into historical perspective examining the importance of the face in architectural theory and demonstrating that the construction of architecture s emblematic portraits triggered the

emergence of a robot aesthetics He then explores the emotions conveyed by the photographed buildings robot faces in chapters titled Awe Wrath Mirth Pain Angst and Hunger As he does so he considers among other things the architectural relevance of Tokyo s ordinary buildings the repression of the figural in contemporary architecture an aesthetic of dismemberment linked to the structure of the Japanese language and local building design and the influence of automation technology upon human interaction Part photographic survey part theoretical inquiry Tokyoids upends the usual approach to robotics in architecture by considering not the automation of architectural output but the aesthetic properties of the robot
