Keep Your Powder Dry An Anthropologist:

And Keep Your Powder Dry Margaret Mead, 2000-07-01 Margaret Mead wrote this comprehensive sketch of the culture of the United States the first since de Tocqueville in 1942 at the beginning of the Second World War when Americans were confronted by foreign powers from both Europe and Asia in a particularly challenging manner Mead's work became an instant classic It was required reading for anthropology students for nearly two decades and was widely translated It was revised and expanded in 1965 for a second generation of readers Among the more controversial conclusions of her analysis are the denial of class as a motivating force in American culture and her contention that culture is the primary determinant for individual character formation Her process remains lucid vivid and arresting As a classic study of a complex western society it remains a monument to anthropological analysis

And Keep Your Powder Dry Margaret Mead, 1975 *And Keep Your Powder Dry* Margaret Mead, 1967 **Anthropologists in Arms** George R. Lucas, 2009-10-15 *Anthropologists in Arms* looks at the moral and ethical debates surrounding the recent development of military anthropology particularly the practice of embedding anthropologists with combat troops in Iraq and Afghanistan Lucas traces the troubled history of social scientists collaborating with national military security and intelligence organizations and shows how these complex and frequently misunderstood historical concerns contribute to the contemporary moral controversy He gives special attention to the Human Terrain Systems project developed by the U S Army under the direction of General David Petraeus Although this project has been criticized as unethical by academic anthropologists in the U S and the U K Lucas shows that the moral status of that program is much more ambiguous than these blanket criticisms would suggest *Anthropologists in Arms* concludes with a call for a thorough review of HTS itself and suggests alternative strategies for providing anthropological knowledge to military forces engaged in irregular warfare knowledge that might in turn help military forces to ameliorate the suffering imposed on noncombatants while respecting the privacy security and human rights of indigenous populations

The Routledge Dictionary of Anthropologists Gérald Gaillard, 2004 This detailed and comprehensive guide provides biographical information on the most influential and significant figures in world anthropology from the birth of the discipline in the nineteenth century to the present day Each of the fifteen chapters focuses on a national tradition or school of thought outlining its central features and placing the anthropologists within their intellectual contexts Fully indexed and cross referenced *The Routledge Dictionary of Anthropologists* will prove indispensable for students of anthropology Margaret Mead Nancy C. Lutkehaus, 2018-06-26 Never doubt that a small group of thoughtful committed citizens can change the world Margaret Mead This quotation found on posters and bumper stickers and adopted as the motto for hundreds of organizations worldwide speaks to the global influence and legacy of the American anthropologist Margaret Mead 1901-78 In this insightful and revealing book Nancy Lutkehaus explains how and why Mead became the best known anthropologist and female public intellectual in twentieth century America Using photographs films television appearances and materials from

newspapers magazines and scholarly journals Lutkehaus explores the ways in which Mead became an American cultural heroine Identifying four key images associated with her the New Woman the Anthropologist Adventurer the Scientist and the Public Intellectual Lutkehaus examines the various meanings that different segments of American society assigned to Mead throughout her lengthy career as a public figure The author shows that Mead came to represent a new set of values and ideas about women non Western peoples culture and America s role in the twentieth century that have significantly transformed society and become generally accepted today Lutkehaus also considers why there has been no other anthropologist since Mead to become as famous Margaret Mead is an engaging look at how one woman s life and accomplishments resonated with the issues that shaped American society and changed her into a celebrity and cultural icon

And Keep Your Powder Dry Margaret Mead,1965 **Anthropologists and the Rediscovery of America, 1886-1965** John S. Gilkeson,2010-09-20 This book examines the intersection of cultural anthropology and American cultural nationalism from 1886 when Franz Boas left Germany for the United States until 1965 when the National Endowment for the Humanities was established Five chapters trace the development within academic anthropology of the concepts of culture social class national character value and civilization and their dissemination to non anthropologists As Americans came to think of culture anthropologically as a complex whole far broader and more inclusive than Matthew Arnold s the best which has been thought and said so too did they come to see American communities as stratified into social classes distinguished by their subcultures to attribute the making of the American character to socialization rather than birth to locate the distinctiveness of American culture in its unconscious canons of choice and to view American culture and civilization in a global perspective *Margaret Mead* Joan Gordan,2015-06-03 No detailed description available for Margaret Mead

Ethnography Harry F. Wolcott,1999 Harry Wolcott one of anthropology s leading writers on ethnographic methods here addresses the nature of the ethnographic enterprise itself Tracing its development from its disciplinary origins in sociology and anthropology he helps the reader understand what is distinctive about ethnography and what it means to conduct research in the ethnographic tradition In this engaging thought provoking book he distinguishes ethnography as more than just a set of field methods and practices separating it from many related qualitative research traditions as a way of seeing through the lens of culture For both beginning and experienced ethnographers in a wide range of disciplines Wolcott s book will provide important ideas for improving research practice Margaret Mead Paul Shankman,2021-07-16 This short volume is an ideal starting point for anyone wanting to learn about arguably the most famous anthropologist of the twentieth century Since her death a steady drip of books about Mead one of the most significant women in twentieth century social science and American society has appeared some interesting many quite a bit less so While Shankman s biography makes use of them it nevertheless stands out among the better ones not only for its well informed and balanced view of Mead but also for its concision Times Literary Supplement Tracing Mead s career as an ethnographer as the early voice of public

anthropology and as a public figure this elegantly written biography links the professional and personal sides of her career. The book looks at Mead's early career through the end of World War II when she produced her most important anthropological works as well as her role as a public figure in the post-war period through the 1960s until her death in 1978. The criticisms of Mead are also discussed and analyzed. From the introduction: After her death she was awarded the Presidential Medal of Freedom by President Jimmy Carter. On the other side of the world Mead's passing was remembered in a very different context. On the island of Manus off the coast of New Guinea the people of Pere village also mourned her death. Mead first studied the people of Pere in the late 1920s returning in the 1950s with further visits thereafter. Over a span of five decades she touched their lives and they touched hers. Such was Mead's stature that they commemorated her death with a ceremony befitting a great leader.

Encyclopedia of World Scientists, Updated Edition Elizabeth Oakes, 2020-07-01

Encyclopedia of World Scientists Updated Edition is a comprehensive reference tool for learning about scientists and their work. It includes 500 cross-referenced profiles of well-known scientific greats of history and contemporary scientists whose work is verging on prominence. More than 100 entries are devoted to women and minority scientists. Each entry includes the subject's full name, dates of birth/death, nationality, and field(s) of specialization. A biographical essay focuses primarily on the subject's scientific work and achievements; it also highlights additional information such as place of birth, parents' names, and occupations, names of spouse(s) and children, educational background, jobs held, and awards earned. An Ordinary Future Thomas W. Pearson, 2023-09-05

This vivid portrait of contemporary parenting blends memoir and cultural analysis to explore evolving ideas of disability and human difference. *An Ordinary Future* is a deeply moving work that weaves an account of Margaret Mead's path to disability rights activism with one anthropologist's experience as the parent of a child with Down syndrome. With this book, Thomas W. Pearson confronts the dominant ideas, disturbing contradictions, and dramatic transformations that have shaped our perspectives on disability over the last century. Pearson examines his family's story through the lens of Mead's evolving relationship to disability, a topic once so stigmatized that she advised Erik Erikson to institutionalize his son born with Down syndrome in 1944. Over the course of her career, Mead would become an advocate for disability rights and call on

anthropology to embrace a wider understanding of humanity that values diverse bodies and minds Powerful and personal An Ordinary Future reveals why this call is still relevant in the ongoing fight for disability justice and inclusion while shedding light on the history of Down syndrome and how we raise children born different **Gods of the Upper Air** Charles King, 2020-07-14 NEW YORK TIMES BESTSELLER 2020 Anisfield Wolf Book Award Winner Finalist for the National Book Critics Circle Award From an award winning historian comes a dazzling history of the birth of cultural anthropology and the adventurous scientists who pioneered it a sweeping chronicle of discovery and the fascinating origin story of our multicultural world A century ago everyone knew that people were fated by their race sex and nationality to be more or less intelligent nurturing or warlike But Columbia University professor Franz Boas looked at the data and decided everyone was wrong Racial categories he insisted were biological fictions Cultures did not come in neat packages labeled primitive or advanced What counted as a family a good meal or even common sense was a product of history and circumstance not of nature In *Gods of the Upper Air* a masterful narrative history of radical ideas and passionate lives Charles King shows how these intuitions led to a fundamental reimagining of human diversity Boas's students were some of the century's most colorful figures and unsung visionaries Margaret Mead the outspoken field researcher whose *Coming of Age in Samoa* is among the most widely read works of social science of all time Ruth Benedict the great love of Mead's life whose research shaped post Second World War Japan Ella Deloria the Dakota Sioux activist who preserved the traditions of Native Americans on the Great Plains and Zora Neale Hurston whose studies under Boas fed directly into her now classic novel *Their Eyes Were Watching God* Together they mapped civilizations from the American South to the South Pacific and from Caribbean islands to Manhattan's city streets and unearthed an essential fact buried by centuries of prejudice that humanity is an undivided whole Their revolutionary findings would go on to inspire the fluid conceptions of identity we know today Rich in drama conflict friendship and love *Gods of the Upper Air* is a brilliant and groundbreaking history of American progress and the opening of the modern mind **New Wars and New Soldiers** Asst Prof Jessica Wolfendale, Dr Paolo Tripodi, 2013-03-28 Modern conflicts now bear little relation to traditional wars between states The threat of terrorism the creation of new military technologies the rise of private military companies and the increasing involvement of the military in counter terrorism and humanitarian operations all pose challenges to traditional ideas about the ethics of war the relevance of current international law governing armed conflict and Just War theory How then should military ethics approach these new forms of conflict Modern military ethics now includes work from disciplines as diverse as philosophy history sociology international relations politics and psychology This diversity of approaches suggests that the approach to contemporary military ethics that is best suited to understanding the wars of today is a broad multidisciplinary vision By bringing together contributors from philosophy international relations security studies and strategic studies this volume offers just such an interdisciplinary analysis The chapters in this volume explore the ethical issues posed by recent developments in both the

The Lost Black Scholar David A. Varel, 2018-04-13 Allison Davis 1902-83 a preeminent black scholar and social science pioneer is perhaps best known for his groundbreaking investigations into inequality Jim Crow America and the cultural biases of intelligence testing Davis one of America's first black anthropologists and the first tenured African American professor at a predominantly white university produced work that had tangible and lasting effects on public policy including contributions to Brown v Board of Education the federal Head Start program and school testing practices Yet Davis remains largely absent from the historical record For someone who generated such an extensive body of work this marginalization is particularly surprising But it is also revelatory In *The Lost Black Scholar* David A Varel tells Davis's compelling story showing how a combination of institutional racism disciplinary eclecticism and iconoclastic thinking effectively sidelined him as an intellectual A close look at Davis's career sheds light not only on the racial politics of the academy but also the costs of being an innovator outside of the mainstream Equally important Varel argues that Davis exemplifies how black scholars led the way in advancing American social thought Even though he was rarely acknowledged for it Davis refuted scientific racism and laid bare the environmental roots of human difference more deftly than most of his white peers by pushing social science in bold new directions Varel shows how Davis effectively helped to lay the groundwork for the civil rights movement

Reading Benedict / Reading Mead Dolores Janiewski, Lois W. Banner, 2004 Publisher Description

Free Trade and Cultural Diversity in International Law Jingxia Shi, 2013-04-30 This book attempts to reconcile the concept of free trade with a key non trade social value cultural diversity in an era of economic globalisation It first shows how we can look at culture in many different ways and explains why we should care about cultural diversity The book then examines the challenges that policymakers are faced with in formulating cultural measures in the new media environment and analyses UNESCO's theories and approaches to cultural diversity This is followed by a comprehensive examination of the treatment of culture in global and regional trade agreements including the framework of the GATT WTO system the WTO's judicial practice involving cultural products and the treatment of culture under the EC EU and NAFTA This identifies the challenges trade norms encounter in dealing with cultural products The author seeks to formulate a balanced view of the challenge of protecting and promoting cultural diversity while also recognising the important goal of trade liberalisation To this end Professor Shi proposes a dual method through which the norms found in WTO agreements and in UNESCO cultural instruments may be brought into alignment the first highlighting the compatibility of cultural policy measures with trade obligations on a domestic level the second suggesting potential linkages between the WTO rules and the

UNESCO Convention from the perspectives of treaty interpretation The Meskwaki and Anthropologists Judith M. Daubenmier, 2008-10-01 The Meskwaki and Anthropologists illuminates how the University of Chicago's innovative Action Anthropology program of ethnographic fieldwork affected the Meskwaki Indians of Iowa. From 1948 to 1958 the Meskwaki community near Tama, Iowa, became effectively a testing ground for a new method of practicing anthropology proposed by anthropologists and graduate students at the University of Chicago in response to pressure from the Meskwaki Action Anthropology as the program was called. It attempted to more evenly distribute the benefits of anthropology by way of anthropologists helping the Native communities they studied. The legacy of Action Anthropology has received limited attention but even less is known about how the Meskwakis participated in creating it and shaping the way it functioned. Drawing on interviews and extensive archival records, Judith M. Daubenmier tells the story from the viewpoint of the Meskwaki themselves. The Meskwaki alternatively cooperated with, befriended, ignored, prodded, and collided with their scholarly visitors in trying to get them to understand that the values of reciprocity within Meskwaki culture required people to give something if they expected to get something. Daubenmier sheds light on the economic and political impact of the program on the community and how some Meskwaki manipulated the anthropologists and students through their own expectations of reciprocity and gender roles. Giving weight to the opinions, actions, and motivations of the Meskwaki, Daubenmier assesses more fully and appropriately the impact of Action Anthropology on the Meskwaki settlement and explores its legacy outside the settlement's confines. In so doing, she also encourages further consideration of the ongoing relationships between scholars and Indigenous peoples today.

Margaret Mead Joan Mark, 1999-03-11 The American anthropologist Margaret Mead (1901-1978) was barely 24 years old when she left New York to study the natives of Samoa, New Guinea, and other remote Pacific islands. Anthropological research to her was not a dull academic discipline but an adventure in which every little detail, from Balinese ritual dances to Polynesian tattooing, held enormous fascination. Her 1928 book *Coming of Age in Samoa* made her both famous and controversial. She boldly challenged the most deeply ingrained principles of the Western way of life: family structure, education, and child rearing. When she died in 1978, a Pacific tribe she befriended held a five-day ceremony in her honor, normally reserved for their greatest chiefs. Joan Mark guides us through the most exciting anthropological discoveries of the 20th century while following Margaret Mead's many triumphs around the globe in quick-paced, engrossing prose that reads like an adventure story. *Oxford Portraits in Science* is an ongoing series of scientific biographies. Written by top scholars and writers, each biography examines the personality of its subject as well as the thought process leading to his or her discoveries. These illustrated biographies combine accessible technical information with compelling personal stories to portray the scientists whose work has shaped our understanding of the natural world.
