The First Atomic Bomb Janet Farrell Brodie, 2023-06 2024 Southwest Book of the Year On July 16 1945 just weeks before the atomic bombing of Hiroshima and Nagasaki that brought about the surrender of Japan and the end of World War II the United States unleashed the world's first atomic bomb at the Trinity testing site located in the remote Tularosa Valley in south central New Mexico Immensely more powerful than any weapon the world had seen the bomb's effects on the surrounding and downwind communities of plants animals birds and humans have lasted decades In *The First Atomic Bomb* Janet Farrell Brodie explores the history of the Trinity test and those whose contributions have rarely if ever been discussed the men and women who constructed served and witnessed the first test as well as the downwinders who suffered the consequences of the radiation Concentrating on these ordinary people laborers ranchers and Indigenous peoples who lived in the region and participated in the testing Brodie corrects the lack of coverage in existing scholarship on the essential details and everyday experiences of this globally significant event *The First Atomic Bomb* also covers the environmental preservation of the Trinity test site and compares it with the wide range of atomic sites now preserved independently or as part of the new Manhattan Project National Historical Park Although the Trinity site became a significant node for testing the new weapons of the postwar United States it is known today as an officially designated National Historic Landmark Brodie presents a timely important and innovative study of an explosion that carries special historical weight in American memory

The Bomb and America's Missile Age Christopher Gainor, 2018-10-15 How nuclear weapons helped drive the United States into the missile age The intercontinental ballistic missile ICBM designed to quickly deliver thermonuclear weapons to distant targets was the central weapons system of the Cold War ICBMs also carried the first astronauts and cosmonauts into orbit More than a generation later we are still living with the political technological and scientific effects of the space race while nuclear armed ICBMs remain on alert and in the headlines around the world In *The Bomb and America's Missile Age* Christopher Gainor explores the US Air Force's USAF decision in March 1954 to build the Atlas America's first ICBM Beginning with the story of the guided missiles that were created before and during World War II Gainor describes how the early Soviet and American rocket programs evolved over the course of the following decade He argues that the USAF was wrongly criticized for unduly delaying the start of its ICBM program endangering national security and causing America embarrassment when a Soviet ICBM successfully put Sputnik into orbit ahead of any American satellite Shedding fresh light on the roots of America's space program and the development of US strategic forces *The Bomb and America's Missile Age* uses evidence uncovered in the past few decades to set the creation of the Atlas ICBM in its true context not only in the America of the postwar years but also in comparison with the real story of the Soviet missiles that propelled the space race and the Cold War Aimed at readers interested in the history of the Cold War and of space exploration the book makes a major

Women Succeeding in the Sciences Jody Bart, 2000
Ample evidence has been provided that women historically have suffered numerous social, political, and institutional barriers to their entrance and success in the sciences. The articles in this anthology refocus the discussion and reflect the interdisciplinary nature of the issues surrounding women in the sciences. While the barriers that women have faced as researchers, subjects of research, students of science, and theorists have been well documented, this anthology breaks new ground. It presents the ways women succeed in the sciences, overcome these historical barriers, and contribute to the social practice of science and the philosophy of science in both theory and practice.

Sachiko Caren Stelson, 2016-10-01
A Robert F. Sibert Honor Book, A National Book Award Longlist Selection, Jane Addams Children's Book Award, Flora Stieglitz Straus Award, A Booklist Editor's Choice. Magnetic and chilling in its simplicity. *The New York Times Book Review*, August 9, 1945. It began like any other day for six-year-old Sachiko. Her country was at war; she didn't have enough to eat. At 11:01 a.m., she was playing outdoors with four other children. Moments later, those children were all dead. An atomic bomb had exploded just half a mile away. In the days and months that followed, Sachiko lost family members, her hair fell out, she woke screaming in the night. When she was finally well enough to start school, other children bullied her. Through it all, she sought to understand what had happened, finding strength in the writings of Helen Keller, Gandhi, and Martin Luther King Jr. Based on extensive interviews with Sachiko Yasui, Caren Stelson shares the true story of a young girl who survived the atomic bomb and chronicles her long journey to find peace. Sachiko offers readers a remarkable new perspective on the final moments of World War II and their aftermath. The paperback edition includes an afterword with updates on Sachiko's legacy.

Far Strike Anthony James, 2024-12-15
Far Strike: Take the fight to the enemy. Humanity's first engagements with the invading Trivar have not gone to plan, and the aliens have shown no mercy in exacting punishment, destroying several Confederation worlds and killing billions of people. Surrender is not an option. One of the Space Corps monitoring stations finds hints of a Trivar world countless galaxies away, and a mission is formed to search for a way to counter the enemy space fleet's seemingly impregnable defences. The newly promoted Captain Becky Keller is in charge, and with her is Lieutenant Joe Nation, as well as a contingent of the Space Corps' best soldiers. The Confederation knows how to fight. What this mission promises is savage conflict and endless destruction. An enemy base on a distant world holds a secret which answers many questions about the Trivar, as well as hinting at further players in this particular game. Keller and Nation will require every ounce of skill and guts to win this one. Luckily, they've been sent to battle in a legend from the Space Corps fleet: the heavy cruiser ES Rampage has seen a thousand battles and never once been destroyed. The

Trivar will soon learn that the reputation of this warship for toughness is well earned Far Strike is a high action science fiction adventure involving massive space battles overwhelming odds and exciting technologies It continues the Transcended series and picks up straight after book 2 Fleet Vanguard
