Derry, 2003-11-11 How did animal breeding emerge as a movement Who took part and for what reasons How do the pedigree and market systems work What light might the movement shed on the assumptions behind human eugenics In *Bred for Perfection* Margaret Derry provides the most comprehensive and accessible book yet published on the human quest to improve and develop livestock Derry herself a breeder and trained historian of science explores the triangle of genetics eugenics and practical breeding focusing on Shorthorn cattle show dogs and working dogs and one type of purebred horse the Arabian By examining specific breeders and the animals they produced she illuminates the role of technology genetics culture and economics in the system of purebred breeding *Bred for Perfection* also provides the historical context in which this system arose adding to our understanding of how domestication works and how our welfare since the dawn of time has been intertwined with the lives of animals      *The Arabian Horse and Its Influence in South Africa* Charmaine Grobbelaar, 2007      *The Crabbet Arabian Stud* Rosemary Archer, Colin Pearson, Cecil Covey, 1978      **Horses in Society** Margaret Elsinor Derry, 2006-01-01 Before crude oil and the combustion engine the industrialized world relied on a different kind of power the power of the horse *Horses in Society* is the story of horse production in the United States Britain and Canada at the height of the species usefulness the late nineteenth and early twentieth century Margaret E Derry shows how horse breeding practices used during this period to heighten the value of the animals in the marketplace incorporated a intriguing cross section of influences including Mendelism eugenics and Darwinism Derry elucidates the increasingly complex horse world by looking at the international trade in army horses the regulations put in place by different countries to enforce better horse breeding and general aspects of the dynamics of the horse market Because it is a story of how certain groups attempted to control the market for horses by protecting their breeding activities or patenting their work *Horses in Society* provides valuable background information to the rapidly developing present day problem of biological ownership Derry's fascinating study is also a story of the evolution of animal medicine and humanitarian movements and of international relations particularly between Canada and the United States      *Made to Order* Margaret E. Derry, 2022-03-01 Animal breeding has been complicated by persisting factors across species cultures geography and time In *Made to Order* Margaret E Derry explains these factors and other breeding concerns in relation to both animals and society in North America and Europe over the past three centuries *Made to Order* addresses how breeding methodology evolved what characterized the aims of breeding and the way structures were put in place to regulate the occupation Illustrated by case studies on important farm animals and companion species the book presents a synthetic overview of livestock breeding as a whole It gives

considerable emphasis to genetics and animal breeding in the post 1960 period the relationship between environmental and improvement breeding and regulation of breeding as seen through pedigrees In doing so Made to Order shows how studying the ancient human practice of animal breeding can illuminate the ways in which human thinking theorizing and evolving characterize our interactions with all natural processes     **Horse Lover's Magazine** ,1959     The Historical Volume and Reference Works, Los Angeles County Robert Paul Studer,1962     Indiana Authors and Their Books, 1917-1966 ,1974
