Keltische Ring Roman:

Roman Cult Images Philip Kiernan, 2020-06-11 In this book Philip Kiernan explores how cult images functioned in Roman temples from the Iron Age to Late Antiquity in the Roman west. He demonstrates how and why a temple's idols were more important to ritual than other images such as votive offerings and decorative sculpture. These idols were seen by many to be divine and possessed of agency. They were thus the primary focus of worship. Aided by cross-cultural comparative material, Kiernan's study brings a biographical approach to explore the lives of idols and cult images: how they were created, housed in temples, used and worshipped, and eventually destroyed or buried. He also shows how the status of cult images could change; how new idols and other cult images were being continuously created; and how in each phase of their lives we find evidence for the significant power of idols.

Der keltische Ring Björn Larsson, 1998 Die Welt der Kelten offenbart sich für den Segler Ulf dem ein Mann ein Manuskript anvertraut hat, dessen Lektüre Ulf veranlasst, sofort nach Schottland aufzubrechen, um einen geheimnisvollen keltischen Ring zu suchen.

Roman Artefacts and Society Ellen Swift, 2017-02-09 In this book Ellen Swift uses design theory, previously neglected in Roman archaeology, to investigate Roman artefacts in a new way, making a significant contribution to both Roman social history and our understanding of the relationships that exist between artefacts and people. Based on extensive data collection and the close study of artefacts from museum collections and archives, the book examines the relationship between artefacts, everyday behaviour, and experience. The concept of affordances, features of an artefact that make possible and incline users towards particular uses for functional artefacts, is an important one for the approach taken. This concept is carefully evaluated by considering affordances in relation to other sources of evidence, such as use wear, archaeological context, the end products resulting from artefact use, and experimental reconstruction. Artefact types explored in the case studies include locks and keys, pens, shears, glass vessels, dice boxes, and finger rings, using material mainly drawn from the north-western Roman provinces, with some material also from Roman Egypt. The book then considers how we can use artefacts to understand particular aspects of Roman behaviour and experience, including discrepant experiences according to factors such as age, social position, and left or right handedness, which are fostered through artefact design. The relationship between production and users of artefacts is also explored, investigating what particular production methods make possible in terms of user experience, and also examining production constraints that have unintended consequences for users. The book examines topics such as the perceived agency of objects, differences in social practice across the provinces, cultural change and development in daily practice, and the persistence of tradition and social convention. It shows that design intentions, everyday habits of use, and the constraints of production processes each contribute to the reproduction and transformation of material culture.
