**Handbook of Psychotherapy Integration** John C. Norcross, Marvin R. Goldfried, 2005-02-24 The 13 years between the publication of the original edition of the handbook and this second edition have been marked by memorable growth in psychotherapy integration. In the interim, psychotherapy integration has grown into a mature empirically supported and international movement. This second edition provides a state-of-the-art comprehensive description of psychotherapy and its clinical practices by leading proponents. In addition to updates of all of the chapters, the new edition features: 1) eight new chapters covering topics such as cognitive analytic therapy, integrative psychotherapy with culturally diverse clients, cognitive behavioral analysis system, and blending spirituality with psychotherapy; 2) an entirely new section with two chapters on assimilative integration; 3) updated reviews of the empirical research on integrative and eclectic treatments; 4) chapter guidelines that facilitate comparative analyses and ensure comprehensiveness; and 5) a summary outline to help readers compare the integrative approaches. Blending the best of clinical expertise, empirical research, and theoretical pluralism, the revision of this integration bible will prove invaluable to practitioners, researchers, and students alike.

**Handbook of Psychotherapy Integration** George Stricker, Jerold R. It provides in-depth coverage of select psychodynamic, cognitive-behavioral, humanistic, critical, and postmodern theories. The third edition features a new section on Critical Theories where a new chapter on Empowerment Theory is included with a completely revised chapter on Feminist Theory. A new chapter on Strengths-based Social Work has been added to the section on meta-theories for social work practice. Other new chapters include Emotion-focused Therapy and Collaborative Therapy. These revisions are based on suggestions from an extensive survey of professors. New to the Third Edition: A new section on Critical Theories; New chapters on Strengths-based Social Work, Emotion-focused Therapy, Empowerment Theory, and Collaborative Therapy; Updated research on the debate about the importance of theory/technique versus common-sense relationship factors and on the critique of the empirically supported treatment movement.
