International Law Jan Wouters, Cedric Ryngaert, Tom

Ruys, Geert De Baere, 2018-12-13 This textbook offers for the first time a comprehensive analysis of the classic doctrines and main areas of international law from a European perspective meeting the needs of the many European law schools teaching public international law in English. Special attention is devoted to the practice of the European Union, the Council of Europe and European States, both civil law and common law countries with regard to international law. In particular, the book analyses the interplay between international law, EU law and national law in the case law of the Court of Justice of the EU, the European Court of Human Rights and national jurisdictions in Europe. It provides the reader with insights into how the international legal practice of the EU and its Member States impacts the development of international law, both in terms of doctrines such as treaty making and customary law, the exercise of extraterritorial jurisdiction, state responsibility and the settlement of disputes, as well as particular sub-fields of international law such as human rights law and international economic law. In addition, the book covers other important areas such as the use of force and collective security, the law of armed conflict and global and regional international organisations. It provides European perspectives on all these issues and will be of great value to students, scholars and practitioners.

The International Legal Régime for the Protection of the Stratospheric Ozone Layer Osamu Yoshida, 2019-02-19 The first edition of Professor Yoshida's monograph *The International Legal Régime for the Protection of the Stratosphere Ozone Layer* provided a renowned and comprehensive contemporary study of the international ozone régime. In the second revised edition, the author analyses important developments in the ozone treaty régime.

Oceans Pierre Jacquet, Rajendra K Pachauri, Laurence Tubiana, 2011-01-01 *Oceans: The New Frontier* explores how human community insistently pushes the oceans' limits, seeking to exploit all of their varied resources: minerals, fisheries, fuels, and genetic material. The ocean frontier is constantly being redefined by new discoveries, technologies, national strategies, and ecological imperatives. Increasing dependence of humanity on the resources of the oceans has blurred the boundaries between the mainland and oceans. As humanity's footprint extends, oceans are seeing intense conflicts between actors and issues. The book questions the ability of global governance to regulate access to resources and services provided by the oceans, so as to protect the ocean ecosystems. The chapters show how the global governance system has not been adequately responsive, while in many cases local initiatives have contributed the solutions. Special sites like sea ports can provide levers for action. *Oceans: The New Frontier* is part of a series of annual publications on sustainable development: *A Planet for Life*, prepared under the scientific leadership of leading figures in the field of sustainable development.
