HeartMemo, 1999 **The Healing Home** Steven Ash, 2020-07-10 We carry our own space with us wherever we go We expand and soften it with meditation and relaxation and we contract and sharpen it with irritability and anger In the space in front of us we carry our dreams and expectations behind us we carry our memories history and old baggage We live in houses with memories stored in the walls and wonder why we are affected by the atmosphere in certain rooms But because our senses and intuition become so dulled by our stressful lives we forget to look beyond what is physically obvious and to stop long enough to notice that which we can often feel instinctively with our whole being Layers and layers of unwanted memories and negative and stagnant energies can build up within a home and within your very self but they can all be removed and cleared simply and effectively both from your home and from your inner spirit The Healing Home explores the skills needed to do this looking at both the ancient and modern perspective and by using simple tools and exercises handed down from a variety of cultures and traditions Learn the value of using a medicine wheel crystals stones and symbols to help you create sacred space find out how to use a smudging stick bells and blessed water to refine the energies in your home learn how to clear and purify the energy in a new home and experience for yourself the very real benefits of keeping your inner self in balance with chakra cleansing aura cleansing and grounding exercises *Kodaly in the Kindergarten Classroom* Micheal Houlahan, Philip Tacka, 2015-03-06 Since the mid twentieth century Zolt n Kod ly s child developmental philosophy for teaching music has had significant positive impact on music education around the world and is now at the core of music teaching in the United States and other English speaking countries Kod ly in the Kindergarten Classroom is the first comprehensive handbook to update and apply the Kod ly concepts to teaching music in early childhood classrooms Kod ly in the Kindergarten Classroom provides teachers with a step by step road map for developing children s performance creative movement and literacy skills in an organic and thoughtful manner Through six years of field testing with music kindergarten teachers in the United States Great Britain and Hungary the home country of Zolt n Kod ly authors Miche l Houlahan and Philip Tacka have developed a methodology specifically for 21st century classrooms Houlahan and Tacka use the latest research findings in cognition and perception to create a system not only appropriate for kindergarteners particular developmental stages but also one which integrates vertically between kindergarten and elementary music classes The methods outlined in this volume encourage greater musical ability and creativity in children by teaching kindergarteners to sing move play instruments and develop music literacy skills In addition Kod ly in the Kindergarten Classroom promotes critical thinking problem solving and collaboration skills Although the book uses the Kod ly philosophy its methodology has also been tested by teachers certified in Orff and Dalcroze and has proven an essential guide for teachers no matter what their personal philosophy and specific training might be Over 100 children s books are incorporated into Kod ly in the Kindergarten Classroom as well as 35 detailed lesson plans that demonstrate how music and literacy curriculum goals are
