Kellers Math Sat Game Plan:

The New Math SAT Game Plan Philip Keller, 2016-03-07 The New Math SAT Game Plan is Phil Keller's classic refreshing and somewhat subversive guide to the math SAT updated to meet the challenges of the revised SAT. As you follow the Game Plan, he maps out how you will learn a more creative way to approach this test while also reviewing all of the necessary math content. You will learn the best way to manage your time and maximize your score. And of course, Keller still teaches those classic methods that will help you to evade some of the algebra on this test. You can see more about The New Math SAT Game Plan at Mr K's blog www.advancedmathyoungstudents.com. Be sure to check out the Alternative Solutions to the Official Practice Tests. Here are some excerpts from reader reviews of the previous edition. These were all from verified purchasers; you can still see the old listing on Amazon if you don't believe me. NelMom said: "After less than two weeks of concentrated practice using this book, she did the SAT test for the 3rd time. Her math score shot up 150 points from her highest previous score. The improvement in her score pushed her to a level that qualifies for merit scholarships and Honors Colleges. Thus far, our \$16.95 investment has translated into 4-year merit scholarship offers from 3 schools equal to a total of over 200,000, and we haven't even heard from the rest of the colleges yet. So I can honestly say that buying this book has been the single best financial investment I have ever made." The book is nothing less than BRILLIANT. PHYSICS BOSS said: "Awesome SAT and PSAT math book. Thanks so much, Mr. Keller. Just found out my son got a 76 out of 80 on the PSAT math section. Training with your New SAT Math book was a big key to his success." KHH said: "It was very simple to follow and easy to understand. I ordered for my daughter to boost her SAT math score, but much of it will help for any multiple-choice math test she takes in the future. It has made me feel like even I could do well on the SAT math section." Mradkins said: "It has fantastic score-raising tips that I would have never thought about. It is also very effective in teaching and reviewing quickly with methods that work best on SAT. It raised my score significantly and helped me better understand some math." Rahman said: "Within two days, I've seen TREMENDOUS improvement for myself. I improved from 500 to 640 WITHIN 2 days. REALLY HELPFUL." Sam Rolfe said: "With exposure to only the first half of this book, my daughter caught on to what the SAT math is all about. She quickly grasped the concepts presented for attacking problems and actually liked applying them. An AH-HA over and over again. If you have stumbled onto this book, you are very fortunate." *Keller's Math SAT Game Plan* Philip Keller, 2004. Devised for high school students who want to improve their math SAT scores, this study guide offers a comprehensive strategy for approaching the test. Concise and efficiently organized, this book provides powerful techniques for improving scores dramatically in the short term as well as acquiring long-term test-taking savvy. Difficult test questions are explained in a clear, step-by-step fashion to give students the skills to approach the test with confidence. Included are tips that are particularly useful for students who have been granted extended time to take the test. *The New Math SAT Game Plan* Philip Keller, 2008-03. A new edition. The New Math SAT Game Plan features updated strategy guides, more Algebra II topics.

and all of those subversive tactics that have brought higher math SAT scores to hundreds of Philip Keller's students As a college professor and long time test prep tutor I've evaluated the gamut of test prep resources This is hands down the best math SAT book I've seen clear articulate and accessible without being condescending I was so impressed that I researched the author and found out that he's won several teaching awards as a high school math and science teacher in New Jersey which may explain this book's effectiveness it's written by a teacher who can anticipate student questions and areas of confusion not a desk jockey After using it with a few kids I have decided to make it the required math text for all my student clients Professor Laura Harrington

The New Math SAT Game Plan will help you to learn the math you need and make the most of the math you know It provides a clear efficient way to approach the test emphasizing strategy and time management while also providing a review of the necessary math skills
