The Dramaturgy of History Tom Bryant,2023-12-06 In this book dramaturg Tom Bryant shares with readers and writers his insights into the process of historical adaptation The book uses case studies from Bryant s collaborations with playwrights on successful Broadway and regional productions to work through the fundamental questions of historical adaptation Why do you want to adapt history For what purpose What is your approach How does that approach affect the portrayal of events How does that choice by the playwright and the dramaturg then determine the framing and focus in the story the selection of

the key events and the choice of characters What is the meaning you want the audience to take away from the events How is your adaptation of past events relevant to contemporary times In addition the author explores the moral and ethical responsibilities involved for the dramaturg and the playwright in the adaptation of history and how issues of diversity equity and inclusion impact the presentation of historical material This is an indispensable resource for anyone whose craft brings them to the task of adapting historical material for the stage in postgraduate work teaching or professional practice The Buildings of Peter Harrison John Fitzhugh Millar,2014-10-20 Perhaps the most important architect ever to have worked in America Peter Harrison s renown suffers from the destruction of most of his papers when he died in 1775 He was born in Yorkshire England in 1716 and trained to be an architect as a teenager He also became a ship captain and soon sailed to ports in America where he began designing some of the most iconic buildings of the continent In a clandestine operation he procured the plans for the French Canadian fortress of Louisbourg enabling Massachusetts Governor William Shirley to capture it in 1745 This setback forced the French to halt their operation to capture all of British America and to give up British territory they had captured in India As a result he was rewarded with commissions to design important buildings in Britain and in nearly all British colonies around the world and he became the first person ever to have designed buildings on six continents He designed mostly in a neo Palladian style and invented a way of building wooden structures so as to look like carved stone wooden rustication He also designed some of America s most valuable furniture including inventing the coveted block front and introducing the bombe motif In America he lived in Newport Rhode Island and in New Haven Connecticut where he died at the beginning of the War of Independence **The Register of the Kentucky State Historical Society** Kentucky Historical Society,1919 Congressional Record United States.
