Key Issuers In Hunter Gatherer Research:

Key Issues in Hunter-Gatherer Research Linda J. Ellanna, Ernest S. Burch, 2020-08-25 Hunter gatherer research has experienced enormous expansion over the past three decades In the late 1950s less than a score of anthropologists were actively engaged in issue oriented studies of foraging populations Since then the number of active researchers has grown into the hundreds This book offers the most up to date anthology of papers on hunter gatherer research and contains possibly the most comprehensive bibliography on hunter gatherers ever published It will be essential reading for all students of hunter gatherer societies *Handbook of Archaeological Theories* R. Alexander Bentley, Herbert D. G.

Maschner, Christopher Chippindale, 2008 This handbook a companion to the authoritative Handbook of Archaeological Methods gathers original authoritative articles from leading archaeologists on all aspects of the latest thinking about archaeological theory It is the definitive resource for understanding how to think about archaeology **The Oxford**

Handbook of the Archaeology and Anthropology of Hunter-Gatherers Vicki Cummings, Peter Jordan, Marek Zvelebil, 2014-04-24 For more than a century the study of hunting and gathering societies has been central to the development of both archaeology and anthropology as academic disciplines and has also generated widespread public interest and debate The Oxford Handbook of the Archaeology and Anthropology of Hunter Gatherers provides a comprehensive review of hunter gatherer studies to date including critical engagements with older debates new theoretical perspectives and renewed obligations for greater engagement between researchers and indigenous communities Chapters provide in depth archaeological historical and anthropological case studies and examine far reaching questions about human social relations attitudes to technology ecology and management of resources and the environment as well as issues of diet health and gender relations all central topics in hunter gatherer research but also themes that have great relevance for modern global society and its future challenges The Handbook also provides a strategic vision for how the integration of new methods approaches and study regions can ensure that future research into the archaeology and anthropology of hunter gatherers will continue to deliver penetrating insights into the factors that underlie all human diversity

Hunter-Gatherers in History, Archaeology and Anthropology Alan Barnard, 2020-05-26 The study of hunter gatherers has had a profound impact on thinking about human nature and about the nature of society The subject has especially influenced ideas on social evolution and on the development of human culture Anthropologists and archaeologists continue to investigate living hunter gatherers and the remains of past hunter gatherer societies in the hope of unearthing the secrets of our ancestors and learning something of the natural existence of humankind Hunter Gatherers in History Archaeology and Anthropology provides a definitive overview of hunter gatherer historiography from the earliest anthropological writings through to the present day What can early visions of the hunter gatherer tell us about the societies that generated them How do diverse national traditions such as American Russian and Japanese manifest themselves in

hunter gatherer research What is the most up to date thinking on the subject and how does it reflect current trends within the social sciences This book provides a much needed overview of the history of thought on one of science s most intriguing subjects It will serve as a landmark text for anthropologists archaeologists and students researching anthropological theory or the history of social anthropology and related disciplines **The Lifeways of Hunter-Gatherers** Robert L.

Kelly,2013-04-15 Challenges the preconceptions that hunter gatherers were Paleolithic relics living in a raw state of nature instead crafting a position that emphasizes their diversity *The Social Science Encyclopedia* Adam Kuper,2004-10-14 The

Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society *The Evolution of Complex Hunter-Gatherers* Ben Fitzhugh,2012-12-06 In 1987 I had the good fortune

to join in the excavation of a phenomenal archaeological site on the western coast of Kodiak Island in Alaska The New Karluk site a k a Karluk One was perched on the edge of the small village of Karluk at the mouth of the river of the same name once one of the most productive salmon rivers in the North Pacific I had just completed my sophomore year of college and under the direction of Richard Jordan I enthusiastically joined several other students in the Kodiak Archaeology Projects New Karluk excavation I had participated in my father s archaeological research in Eastern Canada since early childhood but the Karluk dig was unlike any archaeology I had experienced before For three months we peeled back layers of grass wood and earth floors separated by remnants of ancient sod roofs Due to the unusual preservation and richness of the site at every turn we uncovered perishable items such as bent wood bowls masks dolls puffin beak rattles grass baskets fragments of fiber netting locks of hair and food waste Preservation was so excellent in fact that we often exposed grass blades still green after hundreds of years which once exposed to air would turn brown before our eyes Structured Worlds Aubrey

Cannon,2014-10-14 Hunter gatherer societies are constrained by their environment and the technologies available to them However until now the role of culture in foraging communities has not been widely considered Structured Worlds examines the role of cosmology values and perceptions in the archaeological histories of hunter fisher gatherers The essays examine a range of cultures Mesolithic Europe Siberia Jomon Japan the Northwest Coast the northern Plains and High Arctic of North

America to show the role of conceptual frameworks in subsistence and settlement technology mobility migration demography and social organization Spanning from the early Holocene period to the present day Structured Worlds draws on archaeology and ethnography to explore the role of beliefs ritual and social values in the interaction between foragers and their physical and social landscape Material culture animal bones and settlement patterns show that the behaviours of hunter gatherers were shaped as much by cultural concepts as by material need

From Equality to Inequality Csilla Dallos, 2011-04-09 The egalitarian society once enjoyed by the Lanoh hunter gatherers of Peninsular Malaysia is quickly changing Throughout a year of ethnographic fieldwork among the Lanoh Csilla Dallos studied and interpreted social change in order to better understand the processes leading to inequality and the concurrent development of social complexity within a community From Equality to Inequality provides rich empirical data on the factors within a community that significantly affect the development of inequality including the effects of sedentism integration leadership competition self aggrandizement marginalization and feuding kinship groups In this case study Dallos argues that in order to understand emerging inequality anthropologists and social scientists need to revisit current conceptions of politics in small scale egalitarian societies Offering a new model of developing social inequality that is congruent with the principles of complexity theory From Equality to Inequality is a sterling example of how anthropological practice can further our general understanding of human behaviour

Hunters and Gatherers in the Modern World Megan Biesele, Robert K. Hitchcock, Peter P. Schweitzer, 2000-04-01 In an age of heightened awareness of the threat that western industrialized societies pose to the environment hunters and gatherers attract particularly strong interest because they occupy the ecological niches that are constantly eroded Despite the denial of sovereignty the world's more than 350 million indigenous peoples continue to assert aboriginal title to significant portions of the world's remaining bio diversity As a result conflicts between tribal peoples and nation states are on the increase Today many of the societies that gave the field of anthropology its empirical foundations and unique global vision of a diverse and evolving humanity are being destroyed as a result of national economic political and military policies Although quite a sizable body of literature exists on the living conditions of the hunters and gatherers this volume is unique in that it represents the first extensive east west scholarly exchange in anthropology since the demise of the USSR Moreover it also offers new perspectives from indigenous communities and scholars in an exchange that be termed south north as opposed to north north denoting the predominance of northern Europe and North America in scholarly debate The main focus of this volume is on the internal dynamics and political strategies of hunting and gathering societies in areas of self determination and self representation More specifically it examines areas such as warfare and conflict resolution resistance identity and the state demography and ecology gender and representation and world view and religion It raises a large number of major issues of common concerns and therefore makes important reading for all those interested in human rights issues ethnic conflict grassroots development and community organization and environmental topics

Our Box Was Full Richard

Daly,2007-10-01 For the Gitksan and Witsuwit en peoples of northwest British Columbia the land is invested with meaning that goes beyond simple notions of property or sustenance Considered both a food box and a storage box of history and wealth the land plays a central role in their culture survival history and identity In Our Box Was Full Richard Daly explores the centrality of this notion in the determination of Aboriginal rights with particular reference to the landmark Delgamuukw case that occupied the British Columbia courts from 1987 to 1997 Called as an expert witness for the Aboriginal plaintiffs Daly an anthropologist was charged with helping the Gitksan and Witsuwit en to prove they existed and to make the case for Aboriginal self governance In order to do this Daly spent several years documenting their institutions system of production and exchange dispute settlement and proprietorship before Pax Britannica and colonization His conclusions which were originally rejected by Justice MacEachern were that the plaintiffs continue to live out their rich and complex heritage today albeit under very different conditions from those of either the pre contact or fur trade eras Our Box Was Full provides fascinating insight into the Delgamuukw case and sheds much needed light on the role of anthropology in Aboriginal rights litigation A rich compassionate and original ethnographic study the book situates the plaintiff peoples within the field of forager studies and emphasizes the kinship and gift exchange features that pervade these societies even today It will find an eager audience among scholars and students of anthropology Native studies law and history **ARCHAEOLOGY - Volume**

I Donald L. Hardesty,2010-06-15 Archaeology is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Archaeology is a road for traveling into the past that is independent of and complementary to documents and memory The archaeological record provides historical perspectives on variability and change in human life support systems with the potential for use in planning for future sustainable development The Theme is organized into four different topics which represent the main scientific areas of the theme Foundations of Archaeology The Archaeology of Life Support Systems World Cultural Heritage Preserving Archaeological Sites and Monuments which are then expanded into multiple subtopics each as a chapter The first topic deals with historical methodological and theoretical foundations of archaeology The second topic explores the archaeological record of human life support systems and includes chapters on foraging food production such as farming and nomadic lifestyles civilizations water management systems and sustainability World cultural heritage is the third topic Finally the fourth topic covers the preservation of cultural memorials such as archaeological sites landscapes and monuments These two volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs

The Handbook of Evolutionary Psychology, Volume 1 David M. Buss,2015-10-01 The indispensable reference tool for the groundbreaking science of evolutionary psychology Why is the mind designed the way it is How does input from the environment interact with the mind to produce behavior These are the big unanswered questions that the field of

evolutionary psychology seeks to explore The Handbook of Evolutionary Psychology is the seminal work in this vibrant quickly developing new discipline In this thorough revision and expansion luminaries in the field provide an in depth exploration of the foundations of evolutionary psychology and explain the new empirical discoveries and theoretical developments that continue at a breathtaking pace Evolutionary psychologists posit that the mind has a specialized and complex structure just as the body has a specialized and complex structure From this important theoretical concept arises the vast array of possibilities that are at the core of the field which seeks to examine such traits as perception language and memory from an evolutionary perspective This examination is intended to determine the human psychological traits that are the products of sexual and natural selection and as such to chart and understand human nature Join the discussion of the big questions addressed by the burgeoning field of evolutionary psychology Explore the foundations of evolutionary psychology from theory and methods to the thoughts of EP critics Discover the psychology of human survival mating parenting cooperation and conflict culture and more Identify how evolutionary psychology is interwoven with other academic subjects and traditional psychological disciplines The Handbook of Evolutionary Psychology is the definitive guide for every psychologist and student interested in keeping abreast of new ideas in this quickly developing field

The Causes of War and the Spread of Peace Azar Gat, 2017-05-05 Azar Gat sets out to resolve one of the age old questions of human existence why people fight and can they stop Spanning warfare from prehistory to the 21st century the book shows that neither an irresistible drive nor a cultural invention deadly violence and warfare have figured prominently in our behavioural toolkit since the dawn of our species People have always alternated between cooperation peaceful competition and violence to attain evolution shaped human desires A marked shift in the balance between these options has occurred since the onset of the industrial age Rather than modern war becoming more costly it hasn't it is peace that has become more rewarding Scrutinizing existing theories concerning the decline of war such as the democratic peace and capitalist peace Gat shows that they in fact partake of a broader Modernization Peace that has been growing since 1815 By now war has disappeared within the world's most developed areas Finally Gat explains why the Modernization Peace has been disrupted in the past as during the two World Wars and how challenges to it may still arise They include claimants to alternative modernity such as China and Russia anti modernists and failed modernizers that may spawn terrorism potentially unconventional While the world has become more peaceful than ever before there is still much to worry about in terms of security and no place for complacency

People of the Middle Fraser Canyon Anna Marie Marie Prentiss, Ian Kuijt, 2012-05-15 The Middle Fraser Canyon contains some of the most important archaeological sites in British Columbia including the remains of ancient villages that supported hundreds if not thousands of people How and why did these villages come into being Why were they abandoned In search of answers to these questions Prentiss and Kuijt take readers on a voyage of discovery into the ancient history of the Stikine or Upper Lillooet a people whose struggles and successes are brought to vivid life through

photographs artistic and fictionalized reconstructions of life in the villages and discussions of evidence from archaeological surveys and excavations Wild Harvest Karen Hardy, Lucy Kubiak Martens, 2016-04-20 Plants are fundamental to life they are used by all human groups and most animals They provide raw materials vitamins and essential nutrients and we could not survive without them Yet access to plant use before the Neolithic can be challenging In some places plant remains rarely survive and reconstructing plant use in pre agrarian contexts needs to be conducted using a range of different techniques This lack of visible evidence has led to plants being undervalued both in terms of their contribution to diet and as raw materials This book outlines why the role of plants is required for a better understanding of hominin and pre agrarian human life and it offers a variety of ways in which this can be achieved Wild Harvest is divided into three sections In section 1 each chapter focuses on a specific feature of plant use by humans this covers the role of carbohydrates the need for and effects of processing methods the role of plants in self medication among apes plants as raw materials and the extent of evidence for plant use prior to the development of agriculture in the Near East Section 2 comprises seven chapters which cover different methods available to obtain information on plants and the third section has five chapters each covering a topic related to ethnography ethnohistory or ethnoarchaeology and how these can be used to improve our understanding of the role of plants in the pre agrarian past **Archaeology and Apprenticeship** Willeke Wendrich, 1982 Demonstrates how archaeology can benefit from the understanding of the social dimensions of knowledge transfer Also examines apprenticeship in archaeology against a backdrop of sociological and cognitive psychology literature **War, Peace, and Human Nature** Douglas P. Fry, 2015-02 The chapters in this book posit that humans clearly have the capacity to make war but since war is absent in some cultures it cannot be viewed as a human universal And counter to frequent presumption the actual archaeological record reveals the recent emergence of war It does not typify the ancestral type of human society the nomadic forager band and contrary to widespread assumptions there is little support for the idea that war is ancient or an evolved adaptation Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking Amazon com Introduction to Cultural Ecology Mark Q. Sutton, E. N. Anderson, 2013-12-12 All peoples and cultures face environmental issues but as this accessible text shows how they respond to such issues varies widely around the world and across human history Introduction to Cultural Ecology Third Edition familiarizes students with the foundations of the field and provides a framework for exploring what other cultures can teach us about human environment relationships Drawing on both biological and cultural approaches the authors first cover basic principles of cultural anthropology environmental studies and human biological adaptations to the environment They then consider environmental concerns within the context of diverse means of making a living from hunting and gathering to modern industrial societies detailed case studies add depth and breadth to the discussion An Introduction to Cultural Ecology Mark Q. Sutton, E. N. Anderson, 2020-08-26 This contemporary introduction to the principles and research base of cultural ecology is the ideal textbook for advanced

undergraduate and beginning graduate courses that deal with the intersection of humans and the environment in traditional societies After introducing the basic principles of cultural anthropology environmental studies and human biological adaptations to the environment the book provides a thorough discussion of the history of and theoretical basis behind cultural ecology The bulk of the book outlines the broad economic strategies used by traditional cultures hunting gathering horticulture pastoralism and agriculture Fully explicated with cases illustrations and charts on topics as diverse as salmon ceremonies among Northwest Indians contemporary Maya agriculture and the sacred groves in southern China this book gives a global view of these strategies An important emphasis in this text is on the nature of contemporary ecological issues how peoples worldwide adapt to them and what the Western world can learn from their experiences A perfect text for courses in anthropology environmental studies and sociology
