Key Issues In Hunter Gatherer Research:

Key Issues in Hunter-Gatherer Research Linda J. Ellanna, Ernest S. Burch, 2020-08-25 Hunter gatherer research has experienced enormous expansion over the past three decades In the late 1950s less than a score of anthropologists were actively engaged in issue oriented studies of foraging populations Since then the number of active researchers has grown into the hundreds This book offers the most up to date anthology of papers on hunter gatherer research and contains possibly the most comprehensive bibliography on hunter gatherers ever published It will be essential reading for all students of hunter gatherer societies

The Lifeways of Hunter-Gatherers Robert L. Kelly, 2013-04-15 Challenges the preconceptions that hunter gatherers were Paleolithic relics living in a raw state of nature instead crafting a position that emphasizes their diversity

Hunter-Gatherers in History, Archaeology and Anthropology Alan Barnard, 2020-05-26 The study of hunter gatherers has had a profound impact on thinking about human nature and about the nature of society The subject has especially influenced ideas on social evolution and on the development of human culture Anthropologists and archaeologists continue to investigate living hunter gatherers and the remains of past hunter gatherer societies in the hope of unearthing the secrets of our ancestors and learning something of the natural existence of humankind

Hunter Gatherers in History Archaeology and Anthropology provides a definitive overview of hunter gatherer historiography from the earliest anthropological writings through to the present day What can early visions of the hunter gatherer tell us about the societies that generated them How do diverse national traditions such as American Russian and Japanese manifest themselves in hunter gatherer research What is the most up to date thinking on the subject and how does it reflect current trends within the social sciences This book provides a much needed overview of the history of thought on one of science s most intriguing subjects It will serve as a landmark text for anthropologists archaeologists and students researching anthropological theory or the history of social anthropology and related disciplines

Handbook of Archaeological Theories R. Alexander Bentley, Herbert D. G. Maschner, Christopher Chippindale, 2008 This handbook a companion to the authoritative *Handbook of Archaeological Methods* gathers original authoritative articles from leading archaeologists on all aspects of the latest thinking about archaeological theory It is the definitive resource for understanding how to think about archaeology

The Oxford Handbook of the Archaeology and Anthropology of Hunter-Gatherers Vicki Cummings, Peter Jordan, Marek Zvelebil, 2014-04-24 For more than a century the study of hunting and gathering societies has been central to the development of both archaeology and anthropology as academic disciplines and has also generated widespread public interest and debate The Oxford Handbook of the Archaeology and Anthropology of Hunter Gatherers provides a comprehensive review of hunter gatherer studies to date including critical engagements with older debates new theoretical perspectives and renewed obligations for greater engagement between researchers and indigenous communities Chapters provide in depth archaeological historical and anthropological case studies and examine far reaching questions about human

social relations attitudes to technology ecology and management of resources and the environment as well as issues of diet health and gender relations all central topics in hunter gatherer research but also themes that have great relevance for modern global society and its future challenges The Handbook also provides a strategic vision for how the integration of new methods approaches and study regions can ensure that future research into the archaeology and anthropology of hunter gatherers will continue to deliver penetrating insights into the factors that underlie all human diversity

Our Box Was Full Richard Daly, 2007-10-01 For the Gitksan and Witsuwit'en peoples of northwest British Columbia the land is invested with meaning that goes beyond simple notions of property or sustenance Considered both a food box and a storage box of history and wealth the land plays a central role in their culture survival history and identity In *Our Box Was Full* Richard Daly explores the centrality of this notion in the determination of Aboriginal rights with particular reference to the landmark Delgamuukw case that occupied the British Columbia courts from 1987 to 1997 Called as an expert witness for the Aboriginal plaintiffs Daly an anthropologist was charged with helping the Gitksan and Witsuwit'en to prove they existed and to make the case for Aboriginal self governance In order to do this Daly spent several years documenting their institutions system of production and exchange dispute settlement and proprietorship before Pax Britannica and colonization His conclusions which were originally rejected by Justice MacEachern were that the plaintiffs continue to live out their rich and complex heritage today albeit under very different conditions from those of either the pre contact or fur trade eras *Our Box Was Full* provides fascinating insight into the Delgamuukw case and sheds much needed light on the role of anthropology in Aboriginal rights litigation A rich compassionate and original ethnographic study the book situates the plaintiff peoples within the field of forager studies and emphasizes the kinship and gift exchange features that pervade these societies even today It will find an eager audience among scholars and students of anthropology Native studies law and history

Complex Hunter Gatherers William C Prentiss, Ian Kuijt, 2004-09-15 A broad synthesis of the archaeology of the Plateau region of the Pacific Northwest and the evolution and organization of the complex hunter gatherers in general

Public Theology for the 21st Century Duncan B. Forrester, William Storrar, Andrew Morton, 2004-01-01 The book is a unique stocktaking by a leading international group of theologians social scientists and other scholars on issues facing public theology at the beginning of the 21st century It combines retrospect and prospect in that it reflects on the issues and approaches that have characterized public theology in the 20th century especially its latter half and attempts to anticipate those which will or should come to the fore in the 21st century seeking to discern continuities and changes Three opening chapters deal with the overall theme of public or political theology with Jurgen Moltmann giving a critical historical account from the Second World War onwards Raymond Plant relating such theology to cultural pluralism and Andrew Morton illustrating it from the work of Duncan Forrester These are followed by pairs of contributions relating public theology to more specific topicsr History Technology and Creation Globalization Spirituality Punishment and Forgiveness Medical Ethics Tolerance and Human Rights

Social Exclusion and Equality **The Diversity of Hunter Gatherer Pasts** Bill Finlayson, Graeme Warren, 2017-06-30 This thought provoking collection of new research papers explores the extent of variation amongst hunting and gathering peoples past and present and the considerable analytical challenges presented by this diversity This problem is especially important in archaeology where increasing empirical evidence illustrates ways of life that are not easily encompassed within the range of variation recognized in the contemporary world of surviving hunter gatherers Put simply how do past hunter gatherers fit into our understandings of hunter gatherers Furthermore given the inevitable archaeological reliance on analogy it is important to ask whether conceptions of hunter gatherers based on contemporary societies restrict our comprehension of past diversity and of how this changes over the long term Discussion of hunter gatherers shows them to be varied and flexible but modeling of contemporary hunter gatherers has not only reduced them into essential categories but has also portrayed them as static and without history It is often said that the study of hunter gatherers can provide insight into past forms of social organization and behavior unfortunately too often it has limited our understandings of these societies In contrast contributors here explore past hunter gather diversity over time and space to provide critical perspectives on general models of hunter gatherers and attempt to provide new perspectives on hunter gatherer societies from the greater diversity present in the past

Nukak Gustavo Politis, 2016-09-17 From Gustavo Politis one of the most renowned South American archaeologists comes the first in depth study in English of the last undiscovered people of the Amazon His work is groundbreaking and urgent both because of encroaching guerrilla violence that makes Nukak existence perilously fragile and because his work with the Nukak represented one of the last opportunities to conduct research with hunter gatherers using contemporary methodological and the theoretical tools Through a rich and comprehensive ethno archaeological portrait of material culture in the making this work makes methodological and conceptual advances in the interpretation of hunter gather societies Politis s conclusions based on six years of original research and on comparative analysis are integrative and contribute to the identification of the multiple factors involved in the formation of hunter gatherer archaeological assemblages

Medicine and Evolution Sarah Elton, Paul O'Higgins, 2008-06-02 Can an evolutionary perspective be integrated in day to day practice and is it of value in medical education and training If so when and how Highlighting exciting areas of research into the evolutionary basis of health and disease *Medicine and Evolution Current Applications and Future Prospects* answers these questions and more I

The Evolution of Complex Hunter-Gatherers Ben Fitzhugh, 2012-12-06 In 1987 I had the good fortune to join in the excavation of a phenomenal archaeological site on the western coast of Kodiak Island in Alaska The New Karluk site a Karluk One was perched on the edge of the small village of Karluk at the mouth of the river of the same name once one of the most productive salmon rivers in the North Pacific I had just completed my sophomore year of college and under the direction of Richard Jordan I enthusiastically joined several other students in the Kodiak Archaeology Projects New Karluk excavation I had participated in my father s archaeological research in Eastern

Canada since early childhood but the Karluk dig was unlike any archaeology I had experienced before For three months we peeled back layers of grass wood and earth floors separated by remnants of ancient sod roofs Due to the unusual preservation and richness of the site at every tum we uncovered perishable items such as bent wood bowls masks dolls puffin beak rattles grass baskets fragments of fiber netting locks of hair and food waste Preservation was so excellent in fact that we often exposed grass blades still green after hundreds of years which once exposed to air would tum brown before our eyes

Structured Worlds Aubrey Cannon,2014-10-14 Hunter gatherer societies are constrained by their environment and the technologies available to them However until now the role of culture in foraging communities has not been widely considered *Structured Worlds* examines the role of cosmology values and perceptions in the archaeological histories of hunter fisher gatherers The essays examine a range of cultures Mesolithic Europe Siberia Jomon Japan the Northwest Coast the northern Plains and High Arctic of North America to show the role of conceptual frameworks in subsistence and settlement technology mobility migration demography and social organization Spanning from the early Holocene period to the present day *Structured Worlds* draws on archaeology and ethnography to explore the role of beliefs ritual and social values in the interaction between foragers and their physical and social landscape Material culture animal bones and settlement patterns show that the behaviours of hunter gatherers were shaped as much by cultural concepts as by material need

War, Peace, and Human Nature Douglas P. Fry,2015-02 The chapters in this book posit that humans clearly have the capacity to make war but since war is absent in some cultures it cannot be viewed as a human universal And counter to frequent presumption the actual archaeological record reveals the recent emergence of war It does not typify the ancestral type of human society the nomadic forager band and contrary to widespread assumptions there is little support for the idea that war is ancient or an evolved adaptation Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking Amazon com

Hunters and Gatherers in the Modern World Megan Biesele,Robert K. Hitchcock,Peter P. Schweitzer,2000-04-01 In an age of heightened awareness of the threat that western industrialized societies pose to the environment hunters and gatherers attract particularly strong interest because they occupy the ecological niches that are constantly eroded Despite the denial of sovereignty the world s more than 350 million indigenous peoples continue to assert aboriginal title to significant portions of the world s remaining bio diversity As a result conflicts between tribal peoples and nation states are on the increase Today many of the societies that gave the field of anthropology its empirical foundations and unique global vision of a diverse and evolving humanity are being destroyed as a result of national economic political and military policies Although quite a sizable body of literature exists on the living conditions of the hunters and gatherers this volume is unique in that it represents the first extensive east west scholarly exchange in anthropology since the demise of the USSR Moreover it also offers new perspectives from indigenous communities and scholars in an exchange that be termed south north as opposed to north north denoting the predominance

of northern Europe and North America in scholarly debate The main focus of this volume is on the internal dynamics and political strategies of hunting and gathering societies in areas of self determination and self representation More specifically it examines areas such as warfare and conflict resolution resistance identity and the state demography and ecology gender and representation and world view and religion It raises a large number of major issues of common concerns and therefore makes important reading for all those interested in human rights issues ethnic conflict grassroots development and community organization and environmental topics **Seasonality and Sedentism** Thomas R. Rocek, Ofer

Bar-Yosef, 1998-04-28 The papers in this volume explore the issues and techniques of archaeological site seasonality and settlement analysis Examples introduce a broad range of specific analytical techniques of seasonality assessment and show variability and similarity in settlement patterns worldwide **The Self and Social Relationships** Joanne V. Wood, Abraham

Tesser, John G. Holmes, 2013-05-13 Although the two major research areas of the Self and Social Relationships have flourished they have done so largely independently of each other More and more research however has indicated that relationships shape the nature of the self and identity and that self views influence interpersonal processes and the manner in which people navigate their close relationships The integration of research on self and social relationships has proved a particularly rich one generating some of the most creative and insightful theories in psychology The Self and Social Relationships is the first volume that marks expedites and defines this exciting new research synthesis It serves both as a platform for authors to present their latest ideas on the topic and to encourage continued integration in this emerging field The contributions represent a diverse set of perspectives from social personality and clinical psychology Each chapter covers a topic that is central to the study of self and relationships and presents some of the most exciting research programs in the field This volume is essential reading for researchers and students in the areas of both self and relationships **The Causes**

of War and the Spread of Peace Azar Gat, 2017-05-05 Azar Gat sets out to resolve one of the age old questions of human existence why people fight and can they stop Spanning warfare from prehistory to the 21st century the book shows that neither an irresistible drive nor a cultural invention deadly violence and warfare have figured prominently in our behavioural toolkit since the dawn of our species People have always alternated between cooperation peaceful competition and violence to attain evolution shaped human desires A marked shift in the balance between these options has occurred since the onset of the industrial age Rather than modern war becoming more costly it hasn't it is peace that has become more rewarding Scrutinizing existing theories concerning the decline of war such as the democratic peace and capitalist peace Gat shows that they in fact partake of a broader Modernization Peace that has been growing since 1815 By now war has disappeared within the world's most developed areas Finally Gat explains why the Modernization Peace has been disrupted in the past as during the two World Wars and how challenges to it may still arise They include claimants to alternative modernity such as China and Russia anti modernists and failed modernizers that may spawn terrorism potentially unconventional While the

world has become more peaceful than ever before there is still much to worry about in terms of security and no place for complacency

Anthropology and the Economy of Sharing Thomas Widlok, 2016-10-04 This book examines the economy of sharing in a variety of social and political contexts around the world with consideration given to the role of sharing in relation to social order and social change political power group formation individual networks and concepts of personhood Widlok advocates a refreshingly broad comparative approach to our understanding of sharing with a rich range of material from hunter gatherer ethnography alongside debates and empirical illustrations from globalized society helping students to avoid Western economic bias in their thinking Anthropology and the Economy of Sharing also demonstrates that sharing is distinct from gift giving exchange and reciprocity which have become dominant themes in economic anthropology and suggests that a new focus on sharing will have significant repercussions for anthropological theory Breaking new ground in this key topic this volume provides students with a coherent and accessible overview of the economy of sharing from an anthropological perspective The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution ShareAlike CC BY SA 4.0 license Open Access funding of this book was made possible through the Leo Spitzer Prize of the University of Cologne This generous funding is gratefully acknowledged

From Equality to Inequality Csilla Dallos, 2011-04-09 The egalitarian society once enjoyed by the Lanoh hunter gatherers of Peninsular Malaysia is quickly changing Throughout a year of ethnographic fieldwork among the Lanoh Csilla Dallos studied and interpreted social change in order to better understand the processes leading to inequality and the concurrent development of social complexity within a community From Equality to Inequality provides rich empirical data on the factors within a community that significantly affect the development of inequality including the effects of sedentism integration leadership competition self aggrandizement marginalization and feuding kinship groups In this case study Dallos argues that in order to understand emerging inequality anthropologists and social scientists need to revisit current conceptions of politics in small scale egalitarian societies Offering a new model of developing social inequality that is congruent with the principles of complexity theory From Equality to Inequality is a sterling example of how anthropological practice can further our general understanding of human behaviour
