Key Features Of Modern History:

Key Features of Modern History Bruce Dennett, Stephen Dixon, 2005 Points of View in the Modern History of Psychology Claude E. Buxton, 2013-10-22 Points of View in the Modern History of Psychology is a collection of papers that presents each individual contributor's expert knowledge of history in the field of psychology. One paper examines Wilhelm Wundt's concept of psychology as the propaedeutic science surviving and inspiring a generation or more of psychologists. Another paper discusses the early sources and the basic conceptions of functionalism as used in America. John B. Watson proclaims behaviorism as a new discipline in psychology with defining features such as an objective deterministic scientific and experimental method that can be used in both human and animal studies. Lieberman 1979, Mackenzie 1977, Miller Galanter and Pribram 1960 oppose behaviorism on the grounds that it slights the purpose of psychology and focuses more on methodology to the detriment of theory. One paper notes that the acceptance or influence that a point of view has is based in some ways on the range and clarity of its connections with experimental and observational reality. This collection can prove useful for psychologists, behavioral scientists, psychiatrists, psychoanalysts, students of psychology, philosophy, or general history who are interested in the many viewpoints of psychology.

A History of Modern Political Thought Gary K. Browning, 2016 How are we to understand past political thinkers? Is it a matter simply of reading their texts again and again? Do we have to relate past texts of political thought to the contexts in which ideas were composed and in which the aims of past thinkers were formulated? Or should past political theories be deconstructed so as to uncover not what their authors maintain but what the texts reveal? In this book theories of interpreting past political thinkers are examined and the interpretive methods of a range of theories are reviewed including those of Hegel, Marx, Oakeshott, Collingwood, the Cambridge School, Foucault, Derrida, and Gadamer. The application of these theories of interpretation to notable modern political theorists Machiavelli, Hobbes, Locke, Rousseau, Kant, Hegel, Marx, Bentham, Mill, Nietzsche, and Beauvoir is then used as a way of understanding modern political thought and of assessing interpretive theories of past political thought. The result is a book which sees the history of modern political thought as more than a procession of political theories but rather as a reflection on the meaning of past political thought and its interpretation. It provides a way of reading the history of modern political thought in which the question of interpretation matters both for understanding how we interpret the past but also for considering what it means to undertake political thinking.

History of Modern Art Nicky Huys, 2025-08-05 History of Modern Art offers a comprehensive exploration of the evolution of modern art from the late 19th century to the present day. On Slowness Lutz Koepnick, 2014-10-07 Speed is an obvious facet of contemporary society whereas slowness has often been dismissed as conservative and antimodern Challenging a long tradition of thought Lutz Koepnick instead proposes we understand slowness as a strategy of the contemporary a decidedly modern practice that gazes firmly at and into the present s velocity As he engages with late twentieth and early twenty first century art photography video film and literature Koepnick explores slowness as a critical medium to intensify our temporal and spatial experiences Slowness helps us register the multiple layers of time history and motion that constitute our present It offers a timely and untimely mode of aesthetic perception and representation that emphasizes the openness of the future and undermines any conception of the present as a mere replay of the past Discussing the photography and art of Janet Cardiff Olafur Eliasson Hiroshi Sugimoto and Michael Wesely the films of Peter Weir and Tom Tykwer the video installations of Douglas Gordon Willie Doherty and Bill Viola and the fiction of Don DeLillo Koepnick shows how slowness can carve out spaces within processes of acceleration that allow us to reflect on alternate temporalities and durations

A History of Modern Computing, second edition Paul E. Ceruzzi, 2003-04-08 From the first digital computer to the dot com crash a story of individuals institutions and the forces that led to a series of dramatic transformations This engaging history covers modern computing from the development of the first electronic digital computer through the dot com crash The author concentrates on five key moments of transition the transformation of the computer in the late 1940s from a specialized scientific instrument to a commercial product the emergence of small systems in the late 1960s the beginning of personal computing in the 1970s the spread of networking after 1985 and in a chapter written for this edition the period 1995 2001 The new material focuses on the Microsoft antitrust suit the rise and fall of the dot coms and the advent of open source software particularly Linux Within the chronological narrative the book traces several overlapping threads the evolution of the computer s internal design the effect

of economic trends and the Cold War the long term role of IBM as a player and as a target for upstart entrepreneurs the growth of software from a hidden element to a major character in the story of computing and the recurring issue of the place of information and computing in a democratic society The focus is on the United States though Europe and Japan enter the story at crucial points on computing per se rather than on applications such as artificial intelligence and on systems that were sold commercially and installed in quantities
