Key Issues For Mountain Areas:

Key Issues for Mountain Areas Martin F. Price, Libor Jansky, Andrei A. Iatsenia, 2004 Mountain areas cover almost one quarter of the earth's land surface with a quarter of the global population living on them or very close by and they are sources of water food timber minerals and other natural resources They provide many opportunities for recreation as well as being centres of biological and cultural diversity and religious significance Unfortunately mountain environments and populations are also particularly threatened by climate change and political conflicts and their inhabitants include many of the poorest and most vulnerable in the world This publication includes a number of papers which explore a range of sustainable development challenges for mountain regions

Mountain Geography Martin F. Price, Alton C. Byers, Donald A. Friend, Thomas Kohler, Larry W. Price, 2013-08-24 Mountains cover a quarter of the Earth's land surface and a quarter of the global population lives in or adjacent to these areas The global importance of mountains is recognized particularly because they provide critical resources such as water food and wood contain high levels of biological and cultural diversity and are often places for tourism and recreation and or of sacred significance This major revision of Larry Price's book Mountains and Man 1981 is both timely and highly appropriate The past three decades have been a period of remarkable progress in our understanding of mountains from an academic point of view Of even greater importance is that society at large now realizes that mountains and the people who reside in them are not isolated from the mainstream of world affairs but are vital if we are to achieve an environmentally sustainable future Mountain Geography is a comprehensive resource that gives readers an in depth understanding of the geographical processes occurring in the world's mountains and the overall impact of these regions on culture and society as a whole The volume begins with an introduction to how mountains are defined followed by a comprehensive treatment of their physical geography origins climatology snow and ice landforms and geomorphic processes soils vegetation and wildlife The concluding chapters provide an introduction to the human geography of mountains attitudes toward mountains people living in mountain regions and their livelihoods and interactions within dynamic environments the diverse types of mountain agriculture and the challenges of sustainable mountain development

Mountains: A Very Short Introduction Martin Price, 2015-09-24 Mountains cover a quarter of the Earth's land surface and are home to about 12 percent of the global population They are the sources of all the world's major rivers affect regional weather patterns provide centres of biological and cultural diversity hold deposits of minerals and provide both active and contemplative recreation Yet mountains are also significantly affected by climate change as melting and retreating glaciers show Given the manifold goods and services which mountains provide to the world such changes are of global importance In this Very Short Introduction Martin Price outlines why mountains matter at the global level and addresses the existing and likely impacts of climate change on mountain hydrological and ecological systems Considering the risks associated with the increasing frequency of extreme events and natural hazards caused by climate change he discusses the implications for both mountain

societies and wider populations and concludes by emphasizing the need for greater cooperation in order to adapt to climate change in our increasingly globalized world ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable *Mountains, Mobilities and Movement* Christos Kakalis, Emily Goetsch, 2017-09-25 This book explores the moving qualities of mountains by utilising theories ideas and processes which contribute to a larger understanding of these geological forms In highlighting the fluid attributes of mountains the authors offer an alternative to the traditional approach of the sciences and the humanities which address mountains as static geological or geographical features The essays in this collection posit that movement impacts the relationship between society and mountains travelling landscape objects constructing design and artistic translations climbing and experiencing changing atmospheres and the different ways of seeing from mountain peaks and that physical intellectual and spiritual motion is integral to their understanding This innovative collection will be of great interest to scholars of geography art architecture history theology and philosophy **Environmental Resilience and Transformation in times of COVID-19** A.L.
