on Public Management Digital Economy and Internet Technology ICPDI 2023 was successfully held on 13 September 2023 in Chongqing China. This conference aimed to bring together researchers, scholars, and practitioners from various fields to exchange ideas and discuss advancements in the areas of public management, digital economy, and internet technology. The conference featured a diverse range of research topics, including but not limited to Public Management, Digital Economy, and Internet Technology. The conference fostered a rich and stimulating intellectual environment. The program included keynote speeches by renowned experts in the field, parallel sessions for paper presentations, and panel discussions addressing emerging trends and challenges. The conference proceedings showcased a wide array of research papers providing valuable insights into the latest theoretical and practical developments in the field of public management, digital economy, and internet technology. Participants had the opportunity to engage in constructive discussions, offer feedback, and establish potential collaborations for future research endeavors. We extend our gratitude to all participants, presenters, organizers, and sponsors for their contributions in making this conference a resounding success. We look forward to the 3rd edition of this conference where we can further explore the dynamic intersections of public management, digital economy, and internet technology.

Energy Cluster Policies for Sustainable Industrial Transformation Marta Gancarczyk, Joanna

Bohatkiewicz-Czaicka, Jacek Gancarczyk, Damian Tomczyk, 2025-04-24. Environmental changes and related public policies require an energy-focused sustainable industrial transformation (SIT) that reconciles economic, environmental, and social objectives. Local energy clusters are conducive to these transformative processes since they represent institutional structures that link key actors and factors in territorial communities to form niches for the green transition. However, SIT policies at the local level are in a nascent stage, and empirical evidence on these processes remains scarce. Furthermore, it is necessary to advance a conceptual background for SIT and identify the development conditions for territorial energy communities. In response to these theory- and policy-related challenges, this monograph aims to conceptualize the role of energy cluster policies in SIT using an institutional approach, as well as to identify the progress of the energy cluster policies and the development stages, drivers, and obstacles of local energy clusters. The author's empirical basis will be Polish energy clusters analyzed against international policies and experience in territorial energy communities. This book provides unique value by developing an institutional analytical framework for energy cluster policies, identifying the conditions for the development of energy clusters, and proposing actionable policy recommendations in this area. There is a growing concern among Chinese researchers and policymakers about China's industrial development being unsustainable and the irreversible depletion of natural resources and deterioration of the ecological environment. The relationship between industrial development, pollution, and the environmental quality is an important issue.

that deserves careful study Environmental considerations play a crucial role in shaping China's development strategies Green development of China creates strong pressures for continuous transforming upgrading and restructuring of the Chinese economy This book explores how China's industrial development relates to pollution and environmental quality and how considerations about such issues associated with the ecological system affect China's development strategies New Perspectives and Possibilities in Strategic Management in the 21st Century: Between Tradition and Modernity

Martínez-Falcó, Javier, Marco-Lajara, Bartolomé, Sánchez-García, Eduardo, Millán-Tudela, Luis A., 2023-07-28 The field of strategic management is facing new challenges as two phenomena sustainability and information and communication technologies have altered the classic pillars of business strategy These far reaching changes require companies to make rapid adaptations in order to achieve optimal situations which can no longer be developed as they did in the past To help academics and managers understand the new fields of study and research within strategic management Javier Martínez Falcó Assistant Professor at the University of Alicante has written a groundbreaking book New Perspectives and Possibilities in Strategic Management in the 21st Century Between Tradition and Modernity This book is an essential guide for reflection and critique offering insights into the new currents and challenges of the discipline shedding light on the modernization of strategies in the corporate world It addresses the renewal and future directions of the field covering topics such as sustainability circular economy green innovation and information and communication technologies including blockchain big data artificial intelligence and IoT The book serves as a must read for academics academic students and policymakers interested in gaining a deeper understanding of current issues impacting deliberate business planning and organization It also serves as a valuable support material for undergraduate and master's business students providing a comprehensive understanding of the new fields of study in the discipline This book is an excellent addition to any academic collection and offers a thought provoking perspective on strategic management Annual Report on the Development of China's Special Economic Zones (2019)

Yitao Tao, Yiming Yuan, 2022-08-12 This book provides with its readers an objective overview of the latest development of China's special economic zones in 2019 It aims to inform researchers what achievements have been attained in one year and tells stories to general readers about how to address economic concerns through public policies Its case studies illustrate economic achievements attained in public health social security and cultural industries Its in depth analyses of green environmental friendly and resource efficient policies can satisfy the curiosity about strategies applied by China meeting its economic challenges **Economic Growth and the Environment** Sander M. de Bruyn, 2012-12-06 Is economic growth good for the environment A number of economists have claimed that economic growth can benefit the environment recruiting political support and finance for environmental policy measures This view has received increasing support since the early 1990s from empirical evidence that has challenged the traditional environmentalist's belief that economic growth degrades the environment This book reviews the theoretical and empirical literature on growth and the

environment giving an in depth empirical treatment of the relationship between the two Various hypotheses are formulated and tested for a number of indicators of environmental pressure The test results indicate that alternative models and estimation methods should be used altering previous conclusions about the effect of economic growth on the environment and offering an insight into the forces driving emission reduction in developed countries *The New Environmental Regulation* Daniel J. Fiorino, 2006 Winner 2007 Louis Brownlow Award presented by the National Academy of Public Administration NAPA and 2006 Best Book in Environmental Management and Policy American Society for Public Administration Environmental regulation in the United States has succeeded to a certain extent in solving the problems it was designed to address air water and land are indisputably cleaner and in better condition than they would be without the environmental controls put in place since 1970 But Daniel Fiorino argues in *The New Environmental Regulation* that given recent environmental economic and social changes it is time for a new more effective model of environmental problem solving Fiorino provides a comprehensive but concise overview of U S environmental regulation its history its rationale and its application and offers recommendations for a more collaborative flexible and performance based alternative Traditional environmental regulation was based on the increasingly outdated assumption that environmental protection and business are irreversibly at odds The new environmental regulation Fiorino describes is based on performance rather than on a narrow definition of compliance and uses such policy instruments as market incentives and performance measurement It takes into consideration differences in the willingness and capabilities of different firms to meet their environmental obligations and it encourages innovation by allowing regulated industries especially the better performers more flexibility in how they achieve environmental goals Fiorino points to specific programs including the 33 50 Program innovative permitting and the use of covenants as environmental policy instruments in the Netherlands that have successfully pioneered these new strategies By bringing together such a wide range of research and real world examples Fiorino has created an invaluable resource for practitioners and scholars and an engaging text for environmental policy courses **Proceedings of the 2022**
