Industrial Change In China Economic Restructuring And Conflicting Interests:

Industrial Change in China Kate Hannan, 2012-10-12 This book analyses the industrial reform measures taken by the Chinese government during the decade 1985-95 and identifies the economic and political tensions and contradictions that state enterprise reform has presented to a leadership intent on maintaining its authoritative political position. Using government sources and interviews with economists and workers at one of China's largest state-owned enterprises, The Second Automobile Dongfeng corporation, Hannan concludes that the relationship between state policy and enterprise is a complex two-way process characterised by tensions resulting from conflicting priorities. *Reform and the Non-State Economy in China* H. Lai, 2006-11-27 Built on rich data, this book offers a fresh and in-depth explanation of how China's pro-reform leaders successfully launched controversial policies to promote private and foreign economic sectors, managed leadership conflict and ensured reform in the provinces and rapid growth in the nation. *Choosing China's Leaders* Chien-wen Kou, Xiaowei Zang, 2013-10-08 Political elites are a key topic in contemporary China studies and have been investigated in relation to factional politics, generation politics, technocracy and crucially institutionalization. The institutionalization of elite replacement began in China in the 1980s and quickly accelerated after the early 1990s as mechanisms emerged to regulate political elites' entry and exit, including age limits, term limits and step-by-step promotion. By examining the various processes of elite selection, this book explores the role played by institutionalization in elite recruitment, promotion and turnover in China. While existing studies have developed our understanding of Chinese elite politics, two key puzzles regarding institutionalisation remain. Although institutionalisation is recognised as an important trend in Chinese politics, there is as yet no theoretical framework to explain the forces that have brought about and sustained this. Further, it is unclear how the process of institutionalisation has impacted on factional politics and how factions would continue to operate within the parameters of formal politics. Drawing on a wide range of studies, this book looks at Politburo members, senior People's Liberation Army officers, provincial leaders, heads of major central state-owned enterprises and Youth League affiliates to provide a comprehensive understanding of elite recruitment and mobility in contemporary China. This book will be of great interest to students and scholars of Chinese politics and government, Chinese studies and Asian politics more broadly. *China's Thought Management* Anne-Marie Brady, 2012-02-06 China's Thought Management argues that by re-emphasizing and modernizing propaganda and thought work since 1989, the CCP has managed to overcome a succession of local and national level crises: the Tiananmen Square protests of 1989, the impact of the collapse of Socialism in the Eastern bloc, SARS, ethnic clashes in Tibet and Xinjiang, to name but a few. Emerging re-strengthened and as dominant in Chinese society as ever, the contributors to this book address such crucial issues as the new emphasis on economic propaganda, the continued importance of the PLA propaganda system in China's overall propaganda work and political stability, how the CCP uses Confucianism in its foreign and domestic propaganda and new approaches to mass persuasion such

as campaigns of mass distraction Each chapter is a case study of the multiple ways in which the CCP has modified and adjusted its propaganda to reflect China's changed economic and political environment Challenging readers to reconceptualise mainstream understandings of the CCP's hold on power and the means the CCP government adopts to maintain its authority to rule this book will be invaluable reading for anyone interested in the Chinese media and Chinese politics

China's Urban Space Terry McGee, George C.S. Lin, Mark Wang, Andrew Marton, Jiaping Wu, 2007-10-18 China's urban growth is unparalleled in the history of global urbanization and will undoubtedly create huge challenges to China as it modernizes its society Adopting an interdisciplinary approach this book presents an overview of the radical transformation of China's urban space since the 1970s arguing that to study the Chinese urbanization process one must recognize the distinctive political economy of China After a long period as a planned socialist economy China's rapid entry into the global economy has raised suggestions that modernization in China will inevitably result in urban patterns and features like those of cities in developed market economies This book argues that this is unlikely in the short term because processes of urban transition in China must be interpreted through the lens of a unique and unprecedented juxtaposition of socialism and the market economy which is leading to distinctive patterns of Chinese urbanization Richly illustrated with maps diagrams and in depth case studies this book will be an invaluable resource to students and scholars of urban economics and policy geography and the development of China

Young Chinese in Urban China Alex Cockain, 2012-08-21 This book examines the condition of being a young person in China and the way in which changes in various dimensions of urban life have affected Chinese youths' quests to understand themselves The author examines social factors such as changes in the physical construction of urban neighbourhoods changes in family life including reduced family size increasing rates of divorce and increased physical mobility of the family unit school life and mounting pressure to perform well in examinations and be a good student access to foreign and domestic media as well as access to the internet Drawing on the fields of social and cultural anthropology Alex Cockain shows that the process of self understanding in a changing spatial social and cultural world involves ongoing disjointed efforts to achieve a sense of security and belonging on the one hand and a degree of increased autonomy in their relationships with for example parents and teachers on the other This book will appeal to anyone interested in Chinese Society Social and Cultural Anthropology Asian Anthropology and Youth Studies

Small Town China Beatriz Carrillo Garcia, 2011-04-19 While much has been written about rural migrant workers' experiences in the big cities population movements into China's vast network of towns and small cities has been largely neglected This book presents a detailed case study of rural migrant workers' experiences in a small town in a north China county The author explores the processes and institutions that enable or preclude the social inclusion of rural workers into the town's socio-economic system Inclusion and exclusion are assessed through an examination of rural workers' immersion into the urban labour market their access to welfare benefits and to social services such as housing education and health The book proposes

that outside the larger cities there are alternative accounts of urban social change and of the integration of rural migrant workers. It stresses the fact that the particular socio economic structure of towns where the state owned share of the economy has been smaller and where consequently social and private forces have been more active allowed for a more open inclusion of rural workers. Though shortcomings are still observed the book suggests that China's transformation may not necessarily result in dysfunctional and socially polarized urban environments. This book will be of interest to students and scholars of China's rural migrant workers bottom up urbanization and small town development social policy and more broadly on contemporary social change in China.

International Aid and China's Environment Katherine Morton, 2006-05-17 Rapid economic growth in the world's most populous nation is leading to widespread soil erosion desertification deforestation and the depletion of vital natural resources. The scale and severity of environmental problems in China now threaten the economic and social foundations of its modernization. Using case studies Morton analyzes the relationship between international and local responses to environmental problems in China challenging the prevailing wisdom that weak compliance is the only constraint upon local environmental management in China. It advances two interrelated discussions first it constructs a conceptual framework for understanding the key dimensions of environmental capacity. This is broadly defined to encompass the financial institutional technological and social aspects of environmental management. Second the book presents the results of an empirical inquiry into the implementation of donor funded environmental projects in both China's poorer and relatively developed regions. By drawing upon extensive fieldwork it seeks to explain how and under what conditions international donors can strengthen China's environmental capacity especially at the local level. It will be of interest to those studying Chinese politics environmental studies and international relations.

NGO Governance and Management in China Reza Hasmath, Jennifer Y. J. Hsu, 2015-07-16 As China becomes increasingly integrated into the global system there will be continuing pressure to acknowledge and engage with non governmental organizations NGOs. Suffice to say without a clear understanding of the state's interaction with NGOs and vice versa any political economic and social analysis of China will be incomplete. This book provides an urgent insight into contemporary state NGO relations. It brings together the most recent research covering three broad themes namely the conceptualizations and subsequent functions of NGOs state NGO engagement and NGOs as a mediator between state and society in contemporary China. The book provides a future glimpse into the challenges of state NGO interactions in China's rapidly developing regions which will aid NGOs strategic planning in both the short and long term. In addition it allows a measure of predictability in our assessment of Chinese NGOs behaviour notably when they eventually move their areas of operation from the domestic sphere to an international one. The salient themes concepts theories and practice discussed in this book will be of acute interest to students scholars and practitioners in development studies public administration and Chinese and Asian politics. Reza Hasmath is a Lecturer in Chinese Politics at the University of Oxford UK and an Associate Professor in Political

Science at the University of Alberta Canada His research looks at state society relationships the labour market experiences of ethnic minorities and development theories and practices Jennifer Y J Hsu is an Assistant Professor in Political Science at the University of Alberta Canada Her recent publications include a co authored book HIV AIDS in China The Economic and Social Determinants Routledge 2011 and a co edited book The Chinese Corporatist State Adaption Survival and Resistance

Routledge 2012 **Transforming Rural China** Chih-Jou Jay Chen,2012-12-06 It is often assumed that privatization leads to profit and that well delineated property rights and a strong private sector will help boost an economy This book investigates the property rights in Chinese enterprises in the reform era finding that distinction between the public and the private are blurred that national reform policies are implemented unevenly across the country and that enterprises owned by local governments in Shanghai for example are actually extremely profitable *China's Changing Welfare Mix* Beatriz

Carrillo,Jane Duckett,2011-06-10 This book draws attention to two neglected areas in the growing body of research on welfare in China subnational variation and the changing mix of state and non state provision The contributors to this volume demonstrate the diversity of local welfare provision that lies behind broad national policies and programmes Their focus on local diversity is particularly relevant to understanding the welfare system in China because national state programmes are so often organized by local governments in line with the specifics of their economic and social development At the same time that social and economic development is itself independently creating an array of different conditions that shape non state family business and third sector welfare roles Through chapters that draw on original research in eight provinces the book adopts a local perspective to illustrate and explain some of the transformations that are under way and discuss not only local government initiatives and programmes but also the services and support provided by families informal social networks and community or third sector organizations as well as those delivered by private businesses on a commercial for profit basis This book will be of interest to students and scholars of Chinese society social policy and Chinese studies more widely Beatriz Carrillo is Lecturer in Asian Studies at the University of Technology Sydney Australia Jane Duckett is Professor of Chinese and Comparative Politics at the University of Glasgow UK **Translocal China** Tim Oakes,Louisa Schein,2006-08-21 Inter

disciplinary in approach this collection of essays explores China s reform era development within the concept of translocality A key element of spatial change in today s China has been the unprecedented geographic mobility of millions of labour migrants tourists brides entrepreneurs and many others But translocality doesn t just mean people It is crucially constituted by the circulation of capital ideas images goods styles services and disease to name but a few With contributions from well respected China specialists the essays focus simultaneously on mobilities and localities drawing our attention to the multiplying forms of mobility in China whilst retaining the importance of localities in people s lives The book provides a clear path to understanding the importance of translocality as a concept along with concrete examples of its operation in China Unique in approach it is at once a study of the connections between location and culture politics economics bodies gender

and technology **Locating China** Jing Wang, 2007-05-07 Taking a multidisciplinary approach this volume examines the relationship between space and the production of local popular culture in contemporary China The international team of contributors examine the inter relationship between the cultural imaginary of a given place and China's continuing drive towards urbanization This has led to the development of new spaces and places and new forms of spatial practices that destabilize old concepts of the local and locality Delivering ethnographic observations and theoretical speculations this work furthers our understanding of the link between spatial thinking and the production of consumer culture in China Elites and Governance in China Xiaowei Zang, Chien-wen Kou, 2013-09-13 This book reveals the complex relationship between elite perceptions and behaviour and governance in China It moves away from existing scholarship by focusing on functionaries grass roots elites leading intellectuals and opinion makers in China and by looking beyond the top leadership makes a significant contribution to our understanding of shared governance and broadened political participation in China The chapters in this collection explore the elites role as opinion makers technical experts producers of knowledge and executives or managers and pose a number of questions the answers to which are crucial to understanding future political and economic development in China What are elite perceptions of governance inequality and justice what do the elites mean by good governance what is the influence of non Chinese Communist Party elites in policy making and implementation in China how have they exerted their influence in the PRC and influenced its direction of future development and what have grass roots elites contributed to governance in local communities Providing a keen insight into the role elites have played in governing China since 1978 this book is a pioneering effort to bring together elite studies and governance studies As such it will be highly relevant for policy makers within international organizations governments and NGOs outside China as well as appealing to scholars and students interested in Chinese politics and governance **China's Embedded Activism** Peter Ho, Richard Edmonds, 2007-10-19 In recent years China has been remarkable in achieving extraordinary economic transformation yet without fundamental political change To many observers this would seem to imply a weakness in Chinese civil society However though the idea of democracy as multitudes of citizens taking to the streets may be attractive it is simultaneously misleading as it disregards the nature of political change taking place in China today a gradual shift towards a polity adapted to a pluralist society At the same time one may wonder what the limited political space implies for the development of a social movement in China This book explores this question by focusing on one of the most active areas of Chinese civil society the environment China's Embedded Activism argues that China's semi authoritarian limitations on the freedom of association and speech coupled with increased social spaces for civic action has created a milieu in which activism occurs in an embedded fashion The semi authoritarian atmosphere is restrictive of but paradoxically also conducive to nationwide collective action with less risk of social instability and repression at the hand of the governing elite Rich in case studies about environmental civic organizations in China and written by a team of international experts on social movements

NGOs democratization and civil society this book addresses a wide readership of students scholars and professionals interested in development geography and environment political change and contemporary Chinese society Tiger Girls Minglu Chen,2012-03-29 The existing scholarship on women in China suggests that gender inequality still exists against the background of the country's reform and opening in recent years However the situation of women in enterprise ownership and leadership seems to indicate that despite such notions of disadvantage amongst women some of them are playing a more active and significant role in China's economic development Based on a series of interviews with female enterprise owners wives of enterprise owners and women managers conducted in diverse locations in three different provinces of China Tiger Girls examines the deeper realities of women entrepreneurs in China and by extension the role of leading women in the workforce By analyzing information on these women's personal experiences careers and families this book investigates their status at work and at home as well as their connections with local politics The research results suggest that although traces of gender inequality can still be found in these women's lives they appear to be actively engaged in the business establishment and operation and gradually casting off the leash of domestic responsibilities This book will be of interest to students and scholars of Chinese Studies Chinese Business Chinese Economics and Asian Studies Minglu Chen is ARC Postdoctoral Fellow in the Department of Government and International Relations at Sydney University Australia

Regional Development in China Yehua Dennis Wei,2013-04-15 This study systematically examines uneven regional development in China focusing on three central agents the foreign investor the state and the region Wei's findings have important implications for theories of and policy towards Chinese regional development This book is a vital resource for those with an interest in transition economies Ethnicity and Urban Life in China Xiaowei Zang,2007-04-13 This much needed work on ethnicity in Asia offers a major sociological analysis of Hui Muslims in contemporary China Using both qualitative and quantitative data derived from fieldwork in Lanzhou between March 2001 and July 2004 it looks at the contrast between the urban life of the Han people the ethnic majority in the city of Lanzhou and the Hui people the largest ethnic minority in the city and assesses the link between minority ethnicity and traditional behaviour in urban sociology and research on ethnic groups of China In depth interviews and survey data provides a fresh perspective to the study of ethnic behaviour in China and offers a rich account of Hui behaviour in seven aspects of urban life neighbouring interaction friendship formation network behaviour mate selection methods spouse choice marital homogamy and household structure Contributing to the global discourse on Islam religious fundamentalism and modernity this book will be invaluable to anyone interested in Chinese society Islam religion development urban studies anthropology and ethnicity **Marketization and Democracy in China** Jianjun Zhang,2008-02-25 This book questions whether China's market reforms have created favorable social conditions for democracy whether the emerging entrepreneurial class will serve as the democratic social base and the role of government in the process of transition **Rural Policy Implementation in Contemporary China** Anna

Ahlers, 2014-01-10 At the turn of the millennium the disparities between rural and urban livelihoods underdevelopment and administrative shortcomings in the Chinese countryside were increasingly seen as posing a manifest threat to social harmony and economic and political stability At that time the term three rural problems sannong wenti was coined which defined the main issues of rural life that needed to be targeted by government action agriculture nongye villages nongcun and farmers nongmin In turn with the launch of the 11th Five Year Plan in 2006 a pledge was made to shift the focus of developmental efforts to the long neglected countryside which is still home to half of the Chinese population This book presents an analysis of adaptive local policy implementation in China in the context of the Building of a New Socialist Countryside BNSC policy framework Based on intensive field work in four counties in Fujian Jiangxi Shaanxi and Zhejiang Provinces between 2008 and 2011 it offers detailed analyses of the form and impact of county governments strategic agency at certain stages and within certain fields of the implementation process for example the design of local BNSC programs the steering of project funding implementation and evaluation the establishment of model villages and the management of public participation Further this study illustrates that BNSC is far more than the empty slogan described by many observers when it was launched in 2005 2006 Instead it has already brought about considerable shifts in terms of the process and outcomes of rural policy implementation Altogether the results of this research challenge existing paradigms by showing how against the background of contemporary approaches to rural development and recent reforms initiated by the central state local bureaucracies strategic agency can actually push forward effective albeit not necessarily optimal policy implementation to some extent which serves the interests of central authorities local implementors and rural residents By tying into the larger debates on China's state capacity and authoritarian adaptability this book enriches our understanding of the inner workings of the Chinese political system As such it will prove invaluable to students and scholars of Chinese politics public policy and development studies more generally
