Inequality Poverty And Neoliberal Governance:

Inequality, Poverty, and Neoliberal Governance Vincent Lyon-Callo, 2004-10-01 Why did the rate of homelessness remain at significant levels while the US economy was supposedly booming and hundreds of millions of dollars were spent in the homeless sheltering industry Drawing upon five years of ethnographic fieldwork in a homeless shelter in Northampton Massachusetts Lyon Callo argues that homelessness must be understood within the context of increasing neoliberal policies practices and discourses As advocates activists policy makers and homeless people focused attention on market based and individualized practices of reform and governance collective efforts that challenged an economy dependent on low wage jobs declining housing affordability and the dismantling of the social safety net were marginalized and ignored Homelessness continued despite and partly due to the limitations of the neoliberal approach Combining the rich detail of an ethnographic study with the systemic examination of political economic studies this book offers a view of homelessness and inequality that is rarely explored elsewhere Chapters include discussion of the medicalization of homelessness the difficulty of finding paid employment given broader political economic conditions how shelter staff are trained to manage homeless people how statistics are used to produce ideas of homeless people as deviants and how funding concerns affect possibilities for resistance Key to the study is an activist approach that raises the possibilities and problems associated with a publicly engaged anthropology

Inequality, Poverty, and Neoliberal Governance Vincent Lyon-Callo, 2004 This is a terrific book Lyon Callo s descriptions shatter stereotypes about homeless people and focus instead on the dysfunction of the system that allegedly serves them Susan Greenbaum University of South Florida [Research Handbook on Homelessness](#) Guy Johnson, Dennis Culhane, Suzanne Fitzpatrick, Stephen Metraux, Eoin O'Sullivan, 2024-08-06 The Research Handbook on Homelessness presents a comprehensive account of the current knowledge and understanding of homelessness the substantial challenges it presents and the latest developments in responding to the issue Bringing together 54 of the world s leading scholars in this field this multidisciplinary Research Handbook acknowledges the increasing interest in homelessness across various academic disciplines and highlights the constant evolution of this issue as well as the research methods that accompany it [The Value of Homelessness](#) Craig Willse, 2015-09-15 It is all too easy to assume that social service programs respond to homelessness seeking to prevent and understand it The Value of Homelessness however argues that homelessness today is an effect of social services and sciences which shape not only what counts as such but what will or ultimately won t be done about it Through a history of U S housing insecurity from the 1930s to the present Craig Willse traces the emergence and consolidation of a homeless services industry How to most efficiently allocate resources to control ongoing insecurity has become the goal he shows rather than how to eradicate the social economic and political bases of housing needs Drawing on his own years of work in homeless advocacy and activist settings as well as interviews conducted with program managers counselors and staff at homeless services organizations in New York Los Angeles San Francisco and

Seattle Willse provides the first analysis of how housing insecurity becomes organized as a governable social problem An unprecedented and powerful historical account of the development of contemporary ideas about homelessness and how to manage homelessness The Value of Homelessness offers new ways for students and scholars of social work urban inequality racial capitalism and political theory to comprehend the central role of homelessness in governance and economy today

Living Faithfully in an Unjust World Melissa L. Caldwell, 2017 What does it mean to be a compassionate caring person in Russia which has become a country of stark income inequalities and political restrictions How might ethics and practices of kindness constitute a mode of civic participation in which doing good helping caring for and loving one another in a world marked by many problems and few easy solutions is a necessary part of being an active citizen Living Faithfully in an Unjust World explores how following the retreat of the Russian state from social welfare services Russians efforts to do the right thing for their communities have forged new modes of social justice and civic engagement Through vivid ethnography based on twenty years of research within a thriving Moscow based network of religious and secular charitable service providers Melissa L Caldwell examines how community members care for a broad range of Russia s population in Moscow and beyond through programs that range from basic health services to human rights advocacy As the experiences of assistance workers government officials recipients and supporters reveal their work and beliefs are shaped by a practical philosophy of goodness and kindness Despite the hardships these individuals witness on a regular basis there is a pervasive sense of optimism that human kindness will prevail over poverty injury and injustice Ultimately what connects members of this diverse group is a shared belief that caring for others is not simply a practical matter or an idealistic vision but a project of faith and hope Together care seekers and care givers destabilize and remake the meaning of faith and faith based by putting into practice a vision of humanitarianism that transcends the boundaries between state and private religious and secular **The Man in the Dog Park** Cathy A. Small, 2020-04-15 The Man in the Dog Park offers the reader a rare window into homeless life Spurred by a personal relationship with a homeless man who became her co author Cathy A Small takes a compelling look at what it means and what it takes to be homeless Interviews and encounters with dozens of homeless people lead us into a world that most have never seen We travel as an intimate observer into the places that many homeless frequent including a community shelter a day labor agency a panhandling corner a pawn shop and a HUD housing office Through these personal stories we witness the obstacles that homeless people face and the ingenuity it takes to negotiate life without a home The Man in the Dog Park points to the ways that our own cultural assumptions and blind spots are complicit in US homelessness and contribute to the degree of suffering that homeless people face At the same time Small Kordosky and Moore show us how our own sense of connection and compassion can bring us into touch with the actions that will lessen homelessness and bring greater humanity to the experience of those who remain homeless The raw emotion of The Man in the Dog Park will forever change your appreciation for and understanding of the homeless life so many deal with outside of the limelight of

contemporary society **Better Must Come** Matthew D. Marr, 2015-06-04 In *Better Must Come* Matthew D. Marr reveals how social contexts at various levels combine and interact to shape the experiences of transitional housing program users in two of the most prosperous cities of the global economy Los Angeles and Tokyo Marr who has conducted fieldwork in U S and Japanese cities for over two decades followed the experiences of thirty four people as they made use of transitional housing services and after they left such programs This comparative ethnography is groundbreaking in two ways it is the first book to directly focus on exits from homelessness in American or Japanese cities and it is the first targeted comparison of homelessness in two global cities Marr argues that homelessness should be understood primarily as a socially generated traumatic and stigmatizing predicament rather than as a stable condition identity or culture He pushes for movement away from the study of homeless people and homeless culture toward an understanding of homelessness as a condition that can be transcended at individual and societal levels *Better Must Come* prescribes policy changes to end homelessness that include expanding subsidized housing to persons without disabilities and experiencing homelessness chronically as well as taking broader measures to address vulnerabilities produced by labor markets housing markets and the rapid deterioration of social safety nets that often results from neoliberal globalization *Trauma-Informed Juvenile Justice in the United States* Judah Oudshoorn, 2016-08-23 Most youth who come in conflict with the law have experienced some form of trauma yet many justice professionals are ill equipped to deal with the effects trauma has on youth and instead reinforce a system that further traumatizes young offenders while ignoring the needs of victims By taking a trauma informed perspective this text provides a much needed alternative one that allows for interventions based on principles of healing and restorative justice rather than on punishment and risk assessment In addition to providing a comprehensive historical overview of youth justice in Canada Judah Oudshoorn addresses the context of youth offending by examining both individual trauma including its emotional cognitive and behavioural effects and collective trauma The author tackles some of the most difficult problems facing youth justice today especially the ongoing cycles of intergenerational trauma caused by the colonization of Indigenous peoples and patriarchal violence and demonstrates how a trauma informed approach to youth justice can work toward preventing crime and healing offenders victims and communities Featuring a foreword written by Howard Zehr case stories from the author's own work with victims and offenders questions for reflection and annotated lists of recommended readings this engaging text is the perfect resource for college and university students in the field of youth justice *Homelessness in America* Michele Wakin, 2022-02-18 This title provides a one stop resource for understanding the crisis of homelessness in the United States It covers risk factors for homelessness societal attitudes about the homeless and public and private resources designed to prevent homelessness and help those in need There are a number of questions to be answered when addressing the subject of homelessness in the United States What are the primary causes of homelessness What are the economic and socioeconomic factors that have an impact on homeless people What demographic trends can be identified in homeless

populations Is the U S addressing the needs and concerns of homeless people adequately Where are the areas with the highest homeless populations What can be done to help homeless people who live with mental illness and or addiction problems Homelessness in America A Reference Handbook answers all of these questions and more It thoroughly examines the history of homelessness in the U S shining a light on the key issues events policies and attitudes that contribute to homelessness and shape the experience of being homeless It places special emphasis on exploring the myriad problems that force people into homelessness such as inadequate levels of affordable housing struggles with substance abuse and gaps in the U S social welfare system In addition it explains why some demographic groups are at heightened risk of homelessness

The Archaeology of the Homed and the Unhomed Daniel O. Sayers, 2023-02-28 The first comprehensive discussion of the historical archaeology of homelessness this book highlights the social complexities ambiguities and significance of the home and the unhomed in the archaeological record

Responsible Citizens B. J. Brown, Sally Baker, 2012-06-01 The individual has never been more important in society in almost every sphere of public and private life the individual is sovereign Yet the importance and apparent power assigned to the individual is not all that it seems As Responsible Citizens investigates via its UK based case studies this emphasis on the individual has gone hand in hand with a rise in subtle authoritarianism which has insinuated itself into the government of the population Whilst present throughout the public services this authoritarianism is most conspicuous in the health and social welfare sectors such that a kind of governance through responsibility is today enforced upon the population

Human Security, Changing States and Global Responses Sangmin Bae, Makoto Maruyama, 2014-12-05 This book critically assesses the human security challenges faced by states focusing on how and to what extent the state is influenced by global structures and operations Having grown rapidly since the 1990s the field of human security has spawned a wide variety of academic research This research has helped to reconceptualize the notion of security both broadening and deepening it and it has created a space where unconventional and multidimensional forms of security inform international policy practices However while various issues and cases of human security have received growing academic attention and policy interest many of the existing books on human security focus primarily on non state actors This leaves a key question unanswered why do sovereign states take on leadership roles in promoting human security To answer the question of why and how national governments influence international human security policy this volume examines the domestic political factors and structures that mediate the range of policy choices Important domestic variables include the cultural match e g Does the country often favor multilateralism and promote a rule bound international society the nature of the political interests and realities that are present e g Does the country see the promotion of human security as a strategic choice and the occurrence of important historical events such as wars revolutions or natural disasters e g Does the country during the crisis help to foster a new way of managing enduring security threats Using this line of analysis the book illuminates the role of the state in handling critical human security issues and its rationale

for doing so This book will be of much interest to students of human security peace studies global governance development studies and IR in general **Medical Anthropology and the World System** Hans A. Baer, Merrill Singer, Ida Susser, 2013-05-23 Now in its third edition this textbook serves to frame understandings of health health related behavior and health care in light of social and health inequality as well as structural violence It also examines how the exercise of power in the health arena and in society overall impacts human health and well being **Medical Anthropology and the World System Critical Perspectives Third Edition** includes updated and expanded information on medical anthropology resulting in an even more comprehensive resource for undergraduate students graduate students and researchers worldwide As in the previous versions of this text the authors provide insights from the perspective of critical medical anthropology a well established theoretical viewpoint from which faculty researchers and students study medical anthropology It addresses the nature and scope of medical anthropology the biosocial and political ecological origins of disease health inequities and social suffering and the nature of medical systems in indigenous and pre capitalist state societies and modern societies The third edition also includes new material on the relationship between climate change and health Finally this textbook explores health praxis and the struggle for a healthy world **The Sociology of Housing** Brian J. McCabe, Eva Rosen, 2023-10-19 A landmark volume about the importance of housing in social life In 1947 the president of the American Sociological Association Louis Wirth argued for the importance of housing as a field of sociological research Now seventy five years later the sociology of housing has still not developed as a distinct subfield leaving efforts to understand housing s place in society to other disciplines such as economics and urban planning With this volume the editors and contributors solidify the importance of housing studies within the discipline of sociology by tackling topics like racial segregation housing instability the supply of affordable housing and the process of eviction In doing so they showcase the very best traditions of sociology they draw on diverse methodologies present unique field sites and data sources and foreground a range of theoretical approaches to elucidate the relationships between contemporary housing public policy and key social outcomes The Sociology of Housing is a landmark volume that will be used by researchers and students alike to define this growing subfield map continued directions for research and center sociologists in interdisciplinary conversations about housing

Disrupting Homelessness Laura Stivers, 2011-04-01 Disrupting Homelessness unmask the futile assumptions of our present approaches to homelessness and suggests ways in which Christians and Christian communities can create a prophetic social movement to end poverty and homelessness Some Christian organizations focus on fixing the person and the behaviors that contribute toward homelessness Others promote home ownership for low income households Stivers criticizes both approaches and assesses to what extent these approaches buy into our culture s dominant ideologies on housing and homelessness and whether they promote justice and liberation for the least well off She then outlines an advocacy approach for churches to address the multiple causes of homelessness and prophetically to aim to make a home for all in God s just and

compassionate community *Trial by Treatment* Mary Ellen Stitt, 2025-05-20 A troubling account of the unexpected impacts of treatment based alternatives to criminal punishment Every year courts send hundreds of thousands of people to treatment based programs as alternatives to traditional punishment These alternatives known as diversion programs are widely celebrated as reforms that reduce the punishment of the mentally ill But in *Trial by Treatment* Mary Ellen Stitt shows that they have in fact expanded the reach of the criminal legal system and its power over the lives of the most vulnerable The inner workings of diversion programs are obscure partially by design and data on outcomes is hard to come by Stitt draws on two years of fieldwork in criminal courtrooms and court mandated treatment sessions as well as an original national dataset in depth interviews and experimental survey data to document the hidden impacts of diversion She shows that placing mental healthcare under the control of the courts has helped to legitimize the criminalization of illness warped treatment environments and amplified inequalities in punishment In vivid and humanizing detail *Trial by Treatment* shows how reforms that keep power and discretion in the same hands can entrench the very problems they promised to solve Using Space: Critical Geographies of Drugs and Alcohol Christopher M. Moreno, Robert Wilton, 2014-03-05 The consumption of drugs and alcohol and the pleasures and problems arising from this consumption can be understood as embedded and constitutive elements of social family and recreational life At the same time they are key sites of intervention for a broad array of state and non state actors focused on regulation treatment and recovery This edited volume showcases current research on the complex social and cultural geographies of drugs and alcohol Taking an avowedly critical approach the authors draw from a variety of theoretical traditions to explore the socially and spatially embedded nature of alcohol and drug consumption regulation and treatment and the ways in which these give rise to particular lived experiences while foreclosing on others Together the chapters question taken for granted assumptions about the nature of and motivations for drug and alcohol use and pay direct attention to both the intended and unintended consequences of regulation and treatment initiatives Despite and in part because of this critical stance chapters hold immediate implications for drug and alcohol policy and public health interventions This book was originally published as a special issue of *Social and Cultural Geography* **Neoliberalism, Nordic Welfare States and Social Work** Masoud Kamali, Jessica Jönsson, 2018-04-17 How have three decades of neoliberalism affected the Nordic welfare states as well as the organisation education and practices of social work in those countries During recent decades the welfare states of Denmark Finland Norway and Sweden have gone through dramatic changes influenced by the political triumph of neoliberalism This has led to both the electoral success of extreme right and mainstream neoliberal parties and to the neoliberal ideological transformations of social democratic parties The neoliberal doctrine of making governance cheaper has thus been made the focus of governance and has led to increased marginalisation and social problems This is the first book to comparatively explore the role of neoliberal reforms on social work and social policy across the Nordic welfare states The richly theoretical and empirical chapters explore and illustrate

the consequences of the dominance of neoliberal policies and provide an analysis of the effects of globalisation glocalisation welfare nationalism symbolic violence and forced migration The book provides valuable insights into the shortcomings of retreating welfare states in a time of increasing glocal social problems Neoliberalism Nordic Welfare States and Social Work should be considered essential reading for critical social work education Students scholars educators and researchers of Nordic countries and beyond have much to learn from this book *Neoliberalism and Unequal Development* Roser Manzanera-Ruiz, Carmen Lizárraga, Fernando López-Castellano, 2022-04-07 Since the 1970s neoliberalism has evolved from ideology to political programme from political programme to public policy and from public policy to constitutional rule This process of change has been made possible through the endorsement of an uncritical a historical and apolitical economic theory that legitimized technocratic despotism financial deregulation precarious labour and constitutional political emptying This book examines critical perspectives in mainstream neoliberal development analysis It examines the neoliberal experiment as a global historical construct through the cases of Africa Latin America and Europe The analysis begins in 1980 with the Structural Adjustment Plans in Latin America and Africa followed in 1990 by Maastricht in the case of Europe and the euphoric shift that took place typified by the Africa Rising narrative which attempts to promote the idea of an economically emerging continent It also considers the weakness of the state resulting from neo liberal austerity and fiscal stabilization policies which have amplified the inability to collectively deal with the social economic and political impact of the COVID 19 crisis One of the key features of the book is the extensive comparative analysis between regions using case studies including examples from African countries The authors connect the different regional perspectives included in the book in a clear and coherent way such that it will appeal to students and scholars interested in the social economic and political outcomes of globalization and will also be of interest to official development agencies and third sector organizations in Latin America Sub Saharan Africa and Europe *Homeless Narratives & Pretreatment Pathways* Jay S. Levy, 2010-01-01 On any given night there are over 643 000 homeless people residing in shelters and on the streets across America What can we do to help Levy crafts stories of characters who sear the memory Old Man Ray the World War II veteran who resents the VA system and regards himself as the de facto night watchman at Port Authority Ben who claims to be a prophet disowned in his own country crucified by the government and enslaved by poverty finds a bridge to the mainstream services and a path to housing through the common language of religious metaphors including redemption and forgiveness and Andrew who has been mentally murdered is helped to understand his own situation and gain disability benefits through the language of trauma among others These stories are deftly interwoven with theory and practice as Levy constructs his developmental model of the engagement and pretreatment process The outreach worker strives to understand the language and the culture of each homeless individual builds a bridge to the mainstream services and helps those providers to understand the special circumstances of these vulnerable people Levy bears witness to the courage of these pilgrims who wander the streets of our
