Infection Control Management Forms Checklists And Guidelines:

Infection Control Management Martha J. Grimes, 1996 *Infection Control Management Forms Checklists Guidelines* was designed for people assigned the responsibility of managing the diverse components of a comprehensive program. The manual addresses business planning and administrative functions as well as suggestions for appropriate data to collect, analyze, present, and use for developing scientifically based recommendations for quality improvement through epidemiology. This manual supports the infection control practitioner by providing reference materials on every aspect of infection control, including recommendations, policies, procedures, contact studies, outbreak investigations, and information on bioterrorism, methods of surveillance, education, and training tools for employees, sterilization, disinfection, and antisepsis practices, and facility-specific infection control information for extended care and long-term care environments, home care, and dental practices. The manual creates an instant library of ready-to-use forms, sample policies and procedures, data collection tools, infection control referrals, surveillance worksheets, health assessment and surveys, exposure reports, follow-up reports, and checklists.
