

Diagnosis

Based on clinical findings:

Raised white cell count (neutrophilia suggestive of acute inflammatory process)

Reduced white cell count (neutropenia in severe infections)

Raised C reactive protein and ESR (erythrocyte sedimentation rate)

Adnexal masses on ultrasound

Laparoscopy is the gold standard to give a definitive diagnosis, however, in mild cases it may not be very obvious.

Infectious Diseases in the Female Patient Rudolph P. Galask, Bryan Larsen, 2012-12-06 In obstetrics and gynecology as in other medical disciplines great satisfaction comes from doing but a greater satisfaction comes from knowing The desire to know raises clinical practice to its highest level This principle guided us in determining

the objectives for this volume Several standard textbooks of obstetrics and gynecology include information about infectious problems Infectious Diseases in the Female Patient is unique in that it emphasizes primarily the basic science aspects of infections in obstetrics and gynecology Although providing a practitioner's handbook was not our goal the reader nevertheless will find discussions of the management of infections in the female patient The continued growth of knowledge about infectious disease encountered in obstetrics and gynecology has come from many sources bacteriology virology genetics immunology biochemistry physiology and pharmacology Insights from all these disciplines contribute to the conceptual framework of this volume Many of the authors who contributed to this text are leaders in their respective areas of research and bring to the book a diversity of expertise and experience Controversial issues are developed in a balanced fashion and in most cases opposing views are discussed Since medical texts usually are read piece meal rather than cover to cover we have allowed some overlap between chapters The slight degree of redundancy allows each chapter to stand on its own so that the reader may obtain the necessary information from a single chapter *National Nosocomial Infections Study Report* Center for Disease Control,1977 *National Nosocomial Infections Study Report, Annual Summary* ,1982
