K. Das,2021-06-01 The field of strategy science has grown in both the diversity of issues it addresses and the increasingly interdisciplinary approaches it adopts in understanding the nature and significance of problems that are continuously emerging in the world of human endeavor These newer kinds of challenges and opportunities arise in all forms of organizations encompassing private and public enterprises and with strategies that experiment with breaking the traditional molds and contours The field of strategy science is also perhaps inevitably being impacted by the proliferation of hybrid organizations such as strategic alliances the upsurge of approaches that go beyond the customary emphasis on competitiveness and profit making and the intermixing of time honored categories of activities such as business industry commerce trade government the professions and so on The blurring of the boundaries between various areas and types of human activities points to a need for academic research to address the consequential developments in strategic issues Hence research and thinking about the nature of issues to be tackled by strategy science should also cultivate requisite variety in issues recognized for research inquiry including the conceptual foundations of strategy and strategy making and the examination of the critical roles of strategy makers strategic thinking time and temporalities business and other goal choices diversity in organizing modes for strategy implementation and the complexities of managing strategy to name a few This

Futurizing the Jews Tsvi (Howard) Bisk, Moshe Dror, 2003-11-30 Bisk and Dror assert that the 21st Century can be the Jewish Century that no other people is better prepared to face its challenges However to do so a stress on the Jewish Future must replace a preoccupation with the Jewish Past They offer a neo Zionist ideological analysis of modern Jewish life as an alternative to both classical Zionism and post Zionism They conceptualize a Jewish Grand Strategy by clearly defining and delineating between ideology policy grand strategy strategy and tactics with compelling proposals for what such a revised Grand Strategy might entail They suggest a concept of reinvigorated Israel Diaspora relations based on this new Grand Strategy and the potential of the Information Technology Revolution They also offer a conception of Jewish spirituality that could be as appealing to secular as to religious Jews They reject the concept of a Nation that Dwells Alone Throughout the ages Jews have affected and been affected by the world more than any other People they assert They also reject the view that suffering is the dominant feature of Jewish history as this lachrymose perception cannot inspire needed Jewish ambitions in the young They stress the needs of the Jewish person and insist that there can be no real significance to the continued existence of the Jewish People unless the real life concrete needs of the individual are addressed As former Israeli Ambassador to the United Nations and former Cabinet Minister Gad Yaacobi asserts in his foreword The book is original iconoclastic and in some ways revolutionary it challenges inherited assumptions and calls for positive action I believe we have before us a book that must become a reference point for Jewish policy makers as quickly as possible
