**Universal Infinite and Zero** Metin Sahin, 2023-11-30 Considering the concept of parallel universes originating and structured from the Main Universe even on an intellectual basis it can be calculated at least how many parallel universes there are It can be accepted that the same living and non living things live at a different time in each parallel universe In this case if a living creature is considered to live for a maximum of 150 years in line with today's knowledge and conditions and if the difference between different time periods is considered to be 1 second the following result can be obtained  $150 \times 365 \times 24 \times 60 \times 60$  The result of this process shows how many seconds 150 years are In this case it can be calculated that there are at least 4 730 400 000 parallel universes In addition with a calculation it can be determined when the parallel universes will be completely free of living things or when the living things will die and this can give an idea about when the apocalypse will occur For this the following information is required the number of all living things should not increase but should stop and go backwards that is enter into a process of decrease For example if the rate of increase in living beings is 0% after m years and the number of living beings at that moment human animal plant etc is accepted as n and one living creature among these living beings lives for a maximum of k years then the intellectual Basically we can say that the apocalypse may happen in the year  $2024 + \frac{m}{n} \times 2k$  On an A D basis This calculation also includes the possibility of teleportation and time travel applications at the scientific and technological level m years from now and the possibility of going back and forward in time n years

**FUNDAMENTALS OF RELIGION, THE BRAHMA**, NALINI KANTA, 2007-09-22 We find today in different parts of the world fierce feuds and strifes Religious fanaticism and fundamentalism contribute in a substantial way to such strifes and conflicts among people We also find a large number of people are steeped in superstitions irrational beliefs and indulge in mere ritualism Where true religion prevails such fanaticism and fundamentalism find no place A deep comparative study of world religions enables one to drive away all superstitions and fanaticism For religion in the true sense is an abiding faith in the values of life and God is the embodiment of all values Religious experience accordingly implies the realisation of the Absolute What Prof Nalini Kanta Brahma tries to do in this well researched book written in a clear and straightforward style is to demonstrate the nobility and positive aspects of each religion he has discussed He classifies religion into three categories Impersonal under which he brings in Buddhism Jainism and Confucianism Personal in this category he describes Christianity Islam and Vaishnavism and Supra personal under which he analyzes Vedantism Sufism Taoism and the Johanine Gospel the Gospel of St John one of the twelve disciples of Jesus Christ The fundamentals of each religion are discussed with great clarity and genuine appreciation Knowing very

well there are a large number of opponents to religion the author vigorously defends the religious view He successfully meets the various objections of Freud Marx and Bertrand Russel among others For he says agnosticism atheism and scepticism are based on a narrow and limited view of life Realisation of divinity by man is the universal characteristic of all religions and the author contends that it should aptly be called the universal religion This realisation of the divinity is so marked in the supra personal religions and being a votary of such religions he stresses that they are on a different level If a study of this world religion is included in the course on comparative religion for students it would certainly help towards dispelling erroneous notions about religion and drive away many superstitions fanaticism and communalism the last being a cancerous growth that eats into the very fabric of a nation Besides students of philosophy who study comparative religion as one of their subjects all enlightened persons who have an abiding faith in religion should find reading this text an exhilarating and ennobling experience

**Ideas, Concepts, and Reality** John W. Burbidge, 2013-04-01 Do concepts exist independently of the mind Where does objective reality diverge from subjective experience John Burbidge calls upon the work of some of the foremost thinkers in philosophy to address these questions developing a nuanced account of the relationship between the mind and the external world In *Ideas Concepts and Reality* John Burbidge adopts as a starting point Gottlob Frege's distinction between ideas which are subjective recollections of past sensations and concepts which are shared by many and make communication possible Engaging with Aristotle Descartes Kant Hegel and many others the book argues that concepts are not eternal and unchanging as Frege suggested but open to revision We can move from ideas to thoughts Burbidge suggests that can be refined to the point where they acquire independent and objective status as concepts At the same time they are radically connected to other concepts which either complement or are differentiated from them *Ideas Concepts and Reality* offers a fresh perspective on the ways in which rigorous thought differs from other operations of the mind Daringly inventive and accessibly written the book will appeal to philosophers at all levels of interest

cohort of experts     Experiencing the Beyond Gert Melville, Carlos Ruta, 2017-11-20 Experiencing the dimension that lies beyond our empirical grasp of the world has always been a challenge for human beings for it can expose the limitations of our agency Such experience while potentially terrifying can also furnish a basis for religious faith or hope of a better future The intercultural essays in this volume analyze ways of dealing with the beyond including magic religion myth and all promising utopias     Science and Beyond Rolf Sattler, 2021-06-22 Science coupled with technology has become the dominant force in most parts of the world Thus it affects our lives and society in many ways Yet misconceptions about science are widespread in governments the general public and even among many scientists Science and Beyond explores these misconceptions that may have grave and even disastrous consequences for individuals and society as was evident during the COVID 19 pandemic where they led to much unnecessary suffering sickness and death The misconceptions also obscure the limitations of science Not seeing these limitations prevents us from seeing and going beyond them which leads to a crippled life and an impoverished society But reaching beyond the limitations of science as outlined in this book can open the doors to a more fulfilled saner healthier happier and more peaceful life and society     Imaginatio Creatrix Anna-Teresa Tymieniecka, 2005-12-11 The fulgurating power of creative imagination Imaginatio Creatrix setting in motion the Human Condition within the unity of everything there is alive is the key to the rebirth of philosophy From as early as 1971 see the third volume of the Analecta Husserliana series The Phenomenological Realism of the Possible Worlds Anna Teresa Tymieniecka ed Imaginatio Creatrix has been the leitmotif for the research work of the World Phenomenology Institute now published in eighty three Analecta Husserliana volumes one that is eliciting echoes from all around Husserl's diagnosis of a crisis in Western science and culture the inspiration of much of postmodern phenomenology has yielded place to a wave of scientific discovery technological invention and change in societal life individual lifestyles the arts etc These throw a glaring light on human creative genius and the crucial role of the imagination that gives it expression This present collection is an instance of that expression and the response it evokes It manifests the role of imagination in forming and interpreting our world in transformation in a new way and opens our eyes to marvel at the new world on the way Papers by Semiha Akinci John Baldacchino Angela Ales Bello Elif Cirakman Tracy Colony Carmen Cozma Charles de Brantes Mamuka G Dolidze Edward Domagala Shannon Driscoll Nader El Bizri Ignacy Fiut William Franke Elga Freiberga Beata Furgalska Nicoletta Ghigi Jennifer Anna Gosetti Ferencei David Gr nberg Oliver W Holmes Milan Jaros Rolf K hn Maija Kule Rimma Kurenkova Matthew Landrus Nancy Mardas David Martinez William D Melaney Mieczyslaw Pawel Migon Martin Nkafu Nkemnkia Leszek Pyra W Kim Rogers Bruce Ross Osvaldo Rossi Julio E Rubio Diane G Scillia Mina Sehdev Dennis E Skocz Mariola Sulkowska Robert D Sweeney Jan Szmyd Piero Trupia Anna Teresa Tymieniecka Richard T Webster     The Gift of Beauty Stephen David Ross, 1996-01-01 Traces the history of the idea of art as an ethical movement interpreting the good as nature's abundance giving rise to an ethics of inclusion expressed in art     **Whitehead and China** Wenyu Xie, Zhihe Wang, George E.

**Beyond the Aesthetic and the Anti-Aesthetic** James Elkins, Harper Montgomery, 2013-08-20

Each of the five volumes in the Stone Art Theory Institutes series and the seminars on which they are based brings together a range of scholars who are not always directly familiar with one another's work The outcome of each of these convergences is an extensive and unpredictable conversation on knotty and provocative issues about art This fourth volume in the series Beyond the Aesthetic and the Anti Aesthetic focuses on questions revolving around the concepts of the aesthetic the anti aesthetic and the political The book is about the fact that now almost thirty years after Hal Foster defined the anti aesthetic there is still no viable alternative to the dichotomy between aesthetics and anti or nonaesthetic art The impasse is made more difficult by the proliferation of identity politics and it is made less negotiable by the hegemony of anti aesthetics in academic discourse on art The central question of this book is whether artists and academicians are free of this choice in practice in pedagogy and in theory The contributors are Stephanie Benzaquen J M Bernstein Karen Busk Jepsen Luis Camnitzer Diarmuid Costello Joana Cunha Leal Angela Dimitrakaki Alexander Dumbadze T Brandon Evans Geng Youzhuang Boris Groys Beata Hock Gordon Hughes Michael Kelly Grant Kester Meredith Kooi Cary Levine Sunil Manghani William Mazzarella Justin McKeown Andrew McNamara Eve Meltzer Nadja Millner Larsen Maria Filomena Molder Carrie Noland Gary Peters Aaron Richmond Lauren Ross Toni Ross Eva Schürmann Gregory Sholette Noah Simblist Jon Simons Robert Storr Martin Sundberg Timotheus Vermeulen and Rebecca Zorach
