Infinitive Constructions With Specified Subjects:

Infinitive Constructions with Specified Subjects Guido Mensching, 2000-07-06 Overt subjects are usually considered as a property of finite clauses. However, most Romance languages permit specified subjects in a broad range of infinitive constructions. Guido Mensching analyzes this phenomenon in stages of French, Italian, Spanish, Portuguese, and other Romance varieties.

Infinitive Constructions with Specified Subjects Guido Mensching, 2000 This book is intended for linguists.

Non-nominative Subjects Peri Bhaskararao, Karumuri Venkata Subbarao, 2004-09-30 Volume 2 of Non-nominative Subjects NNSs presents the most recent research on this topic from a wide range of languages from diverse language families of the world with ample data and in-depth analysis. A significant feature of these volumes is that authors with different theoretical perspectives study the intricate questions raised by these constructions. Some of the central issues include the subject properties of noun phrases with ergative, dative, accusative, and genitive case, case assignment, and checking, anaphor, antecedent coreference, the nature of predicates with NNSs, whether they are volitional or non-volitional, possibilities of control, coreference, and agreement phenomena. These analyses have significant implications for theories of syntax and verbal semantics, first language acquisition of NNSs, convergence of case marking patterns in language contact situations, and the nature of syntactic change.

Studies on Agreement João Costa, Maria Cristina Figueiredo Silva, 2006 The status of agreement is a core issue in current morphological and syntactic theory. The collection of papers in this volume focuses on important issues such as the nature of the relation between syntax and morphology in determining agreement relations, whether and which syntactic configurations are relevant for determining agreement, the relevance of verbal agreement for the purposes of EPP, the inquiry into the existence of connections between verbal and DP internal agreement, on the morphological and syntactic distinction of person, number, and gender agreement, how and why AGREE and Spec-head relations trigger different agreement effects, and the type of relation that exists between head movement and morphological agreement. The data collected come from a wide variety of languages, and the studies presented discuss innovative and thought-provoking ideas for dealing with agreement phenomena.

Coreference, Modality, and Focus Luis Eguren, Olga Fernández-Soriano, 2007-11-21 This volume is a collection of selected papers originally presented at the XVIth Colloquium on Generative Grammar that was held at the Universidad Autónoma de Madrid. All the papers deal with current issues within the generative framework, mostly paying attention to phenomena pertaining to the syntax-semantics interface. The major concerns are coreference relations, modals and modality, and focus ellipsis. More specifically, the contributions present research findings from different languages, often adopting a comparative perspective, and include studies on sub-extraction from subjects and objects, on obviation and Control structures, on specificity and Weak Crossover effects, and on reconstruction without movement, as well as papers that address the scopal interactions between tense aspect and modals, the syntactic and semantic properties of different types of left periphery operators, and the role focus plays in elliptical

constructions **Agreement Systems** Cedric Boeckx, 2006-01-01 Agreement plays a central role in modern generative grammar The present collection brings together contributions from experts on various aspects of agreement systems in the world's languages in an attempt to formulate formal and substantive universals in this domain All the papers contained here focus on the formalization of the mechanisms of agreement and on the relationship between case and agreement All the papers propose solutions by seriously examining cross linguistic data from the usual Germanic and Romance languages to Lummi Greek Hindi Turkish and other Turkic languages Japanese Tsez Masaai Russian Arabic Basque Warlpiri Kaltakungu and Bantu *Prepositional Infinitives in Romance* Kim Schulte, 2007 This book examines the present day distribution and diachronic evolution of a set of infinitival structures in Spanish Portuguese and Romanian making use of extensive corpus data and investigating how pragmatic factors and usage patterns interact with syntax After a contrastive account of the patterns of clausal subordination in Latin and Romance the rise of prepositional infinitives is traced through the documented history of the three languages revealing astonishing parallels in their development The analysis of the data shows how cognitive principles such as reanalysis and entrenchment combine with parameters such as relevance and usage frequency to cause syntactic change Beyond providing a genuine explanation for the observed processes in the Romance languages this study offers new evidence for the existence of language independent cross linguistically applicable principles and mechanisms in language change A half century of Romance linguistics: Selected proceedings of the 50th Linguistic Symposium on Romance Languages Barbara E. Bullock, Cinzia Russi, Almeida Jacqueline Toribio, 2023-02-14 The present volume presents a selection of the revised and peer reviewed proceedings articles of the 50th Linguistic Symposium on Romance Languages LSRL 50 which was hosted virtually by the faculty and students from the University of Texas at Austin With contributions from rising and senior scholars from Europe and the Americas the volume demonstrates the breadth of research in contemporary Romance linguistics with articles that apply corpus based and laboratory methods as well as theory to explore the structure use and development of the Romance languages The articles cover a wide range of fields including morphosyntax semantics language variation and change sociophonetics historical linguistics language acquisition and computational linguistics In an introductory article the editors document the sudden transition of LSRL 50 to a virtual format and acknowledge those who helped them to ensure the continuity of this annual scholarly meeting *Subject Clitics in the Northern Italian Dialects* Cecilia Goria, 2012-11-02 1 0 INTRODUCTION This book provides an encompassing analysis of Subject Clitics SCLs by giving a detailed description of these elements in two varieties of Piedmontese a Northern Italian Dialect Astigiano and Turinese spoken in the areas of Asti and Turin respectively It accounts for the structural position and function of these elements inside the computational system and for their morphological and distributional properties It also provides an empirical and theoretical comparison between Piedmontese SCLs and SCLs in other Northern Italian Dialects NIDs of SCLs types in the NIDs have been regarded as Since the 1980s the majority elements of agreement in that they

contribute to the realisation of subject verb agreement by expressing features of the subject similar in a way to verbal inflection. Nonetheless SCLs are not to be assimilated to verbal affixes as they exhibit different properties. Most distinctively they can be separated from the verb by other clitic elements and in the case of the varieties considered here SCLs are optional in all contexts and may be omitted in coordination. A more refined identification of SCLs separates SCLs which encode agreement features from those which do not and are related to pragmatic factors as originally observed by Beninca 1994 with respect to the clitic *a* in Paduano. The different morphological and syntactic properties that characterise SCLs across the NIDs have justified numerous accounts which regard them as head of their own projection.

French subject islands Elodie Winckel, 2024-06-20 This book examines extractions out of the subject which is traditionally considered to be an island for extraction. There is a debate among linguists regarding whether the subject island constraint is a syntactic phenomenon or an illusion caused by cognitive or pragmatic factors. The book focusses on French that provides an interesting case study because it allows certain extractions out of the subject despite not being a typical null subject language. The book takes a discourse based approach and introduces the Focus Background Conflict constraint which posits that a focused element cannot be part of a backgrounded constituent due to a pragmatic contradiction. The major novelty of this proposal is that it predicts a distinction between extractions out of the subject in focalizing and non focalizing constructions. The central contribution of this book is to offer the detailed results of a series of empirical studies, corpus studies and experiments on extractions out of the subject in French. These studies offer evidence for the possibility of extraction out of the subject in French. But they also reveal a clear distinction between constructions. While extractions out of the subject are common and highly acceptable in relative clauses this is not the case for interrogatives and clefts. Finally the book proposes a Head Driven Phrase Structure Grammar (HPSG) analysis of subject islands. It demonstrates the interaction between information structure and syntax using a representation of information structure based on Minimal Recursion Semantics (MRS).

Nonfinite Structures in Theory and Change D. Gary Miller, 2002 This book investigates the precise nature of nonfinite structures and explores the ways in which they change. Gary Miller examines a broad range of structures including traditional infinitives, gerunds and participles across different Indo European and some non Indo European languages now and in the past. As structures which are nonfinite in some languages are not so in others the question arises whether the concept nonfinite has any meaning or explanatory power. In seeking an answer to this conundrum the author shows that infinitives with subject person agreement such as in West Greenlandic, Modern Greek, Portuguese, Welsh and Hungarian share properties with prototypical nonfinite formations. Professor Miller examines languages with morphologically marked tense on infinitives including Ancient Greek and Latin and Modern Turkish. He demonstrates that nonfinite structures that can be assigned non structural inherent or semantic case differ systematically from those with either structural or no case. The book concludes with a substantial history of infinitives, gerunds and participles in Old and Middle English which reveals why and how

nonfinite structures change and vary over time Gary Miller's innovative theoretical reasoning and the wide range of evidence on which it is brought to bear make this book a considerable contribution to the understanding of grammatical change and its formal expression as well as to the history of English

Linguistic Variation: Structure and Interpretation Ludovico Franco, Paolo Lorusso, 2019-12-16 In this volume scholars honor M Rita Manzini for her contributions to the field of Generative Morphosyntax The essays in this book celebrate her career by continuing to explore inter area research in linguistics and by pursuing a broad comparative approach investigating and comparing different languages and dialects

The Function of the Tautological Infinitive in Classical Biblical Hebrew Yoo-Ki Kim, 2018-08-14 One of the intriguing and insufficiently understood features of Biblical Hebrew is the use of an infinitive form alongside a finite verb of the same root The function of this construction has generally been understood as serving to provide some kind of emphasis However neither translations nor grammars are consistently able to explain what is being emphasized by the use of this construction This volume which is a revision of the author's Ph D dissertation at the Johns Hopkins University 2006 examines the tautological infinitive construction in Classical Biblical Hebrew that is the Hebrew written during the First Temple Period more or less equivalent to the material in Genesis 2 Kings excluding P in order to give a coherent and consistent explanation of its function In a final chapter Kim discusses the use of the tautological infinitive in Classical Biblical Hebrew in relation to its use in non Classical biblical texts and Semitic languages in order to set it in a broader context

Control in Generative Grammar Idan Landau, 2013-02-21 The subject of nonfinite clauses is often missing and yet is understood to refer to some linguistic or contextual referent e g Bill preferred __ to remain silent is understood as Bill preferred that he himself would remain silent This dependency is the subject matter of control theory Extensive linguistic research into control constructions over the past five decades has unearthed a wealth of empirical findings in dozens of languages Their proper classification and analysis however have been a matter of continuing debate within and across different theoretical schools This comprehensive book pulls together for the first time all the important advances on the topic Among the issues discussed are the distinction between raising and control obligatory and nonobligatory control syntactic interactions with case finiteness and nominalization lexical determination of the controller and phenomena like partial and implicit control The critical discussions in this work will stimulate students and scholars to further explorations in this fascinating field

Complement Clauses in Portuguese Ana Lúcia Santos, Anabela Gonçalves, 2018-08-15 This volume addresses core issues on complement clauses focusing on Portuguese European Brazilian and Mozambican varieties It contributes to the discussion of complementation providing an overview of how theoretical syntax and acquisition studies may combine to broaden our knowledge about the topic The articles are organized in two sections each one followed by a comment paper the first section more theoretical in its nature gathers contributions analyzing major syntactic aspects of complementation in Portuguese from a synchronic and a diachronic point of view the second section includes articles on L1

and L2 acquisition of Portuguese complementation Both sections especially focus on infinitival structures mood selection and the interpretation of subjects in finite complement clauses are also topics of particular relevance The volume is meant for researchers and students interested in formal syntax and acquisition in general and Portuguese syntax and acquisition in particular

Studies in Historical Ibero-Romance Morpho-Syntax Miriam Bouzouita, Ioanna Sitaridou, Enrique Pato, 2018-07-15 This volume features fourteen papers by leading specialists on various aspects of historical morpho syntax in the Ibero Romance languages In these papers fine grained analyses are developed to capture the richness of undiscussed or often previously unknown data Comparative across the Ibero Romance languages and diverse in terms of the approaches considered ranging from cognitive functionalist to generativist to variationist they combine in this volume to showcase the merits of different yet complementary perspectives in understanding linguistic variation and language change The gamut of phenomena scrutinised varies from morpho phonological puzzles and word formation to syntax and interface related phenomena to as a coda methodological suggestions for future research in old Ibero Romance thus making it ideal reading for scholars and postgraduate students alike

Infinitives at the Syntax-Semantics Interface Lukasz Jedrzejowski, Ulrike Demske, 2017-06-26 The major aim of this volume is to investigate infinitival structures from a diachronic point of view and simultaneously to embed the diachronic findings into the ongoing theoretical discussion on non finite clauses in general All contributions subscribe to a dynamic approach to infinitival clauses by investigating their origin development and loss in miscellaneous patterns and across different languages

Comparative and Diachronic Perspectives on Romance Syntax Gabriela Pană Dindelegan, Irina Nicula, 2018-04-18 The volume brings together fifteen papers focusing on the morphosyntax of different Romance varieties It is based on papers presented at the workshop bearing the same title held at the University of Bucharest in November 2015 and is dedicated to Professor Martin Maiden of the University of Oxford in honour of his 60th birthday The contributions tackle different theoretical issues concerning current linguistic theory relevant both for comparative and diachronic approaches including parameters features and their hierarchical organization word order changes the level of verb movement in different varieties inflected infinitives clitic placement and clitic doubling ethical datives and personal subject pronouns among others As such the volume represents diverse theoretical approaches to addressing a number of key morphological and syntactic issues in the morphosyntactic development of the Romance languages drawing on modern research methods and current linguistic theory with a clear preference for parametric syntax The most significant areas of grammar are well represented here The volume will appeal to advanced graduate and postgraduate students in diachronic linguistics theoretical linguistics and Romance linguistics as well as researchers in the fields of historical and typological linguistics morphosyntactic theory and the history of the Romance languages

Manual of Romance Morphosyntax and Syntax Andreas Dufter, Elisabeth Stark, 2017-09-25 This volume offers theoretically informed surveys of topics that have figured prominently in morphosyntactic and syntactic research into Romance languages

and dialects We define syntax as being the linguistic component that assembles linguistic units such as roots or functional morphemes into grammatical sentences and morphosyntax as being an umbrella term for all morphological relations between these linguistic units which either trigger morphological marking e g explicit case morphemes or are related to ordering issues e g subjects precede finite verbs whenever there is number agreement between them All 24 chapters adopt a comparative perspective on these two fields of research highlighting cross linguistic grammatical similarities and differences within the Romance language family In addition many chapters address issues related to variation observable within individual Romance languages and grammatical change from Latin to Romance

Cuban Spanish Dialectology Alejandro Cuza, 2017 This volume covers existing lacunae on Cuban Spanish dialectology by providing a state of the art collection of articles from different theoretical perspectives and linguistic areas including phonological and phonetic variation morphosyntactic approaches sociolinguistic perspectives and the acquisition of Cuban Spanish as a heritage language
